5BARz™ Reveals the First Look and Feature Set of its State-Of-The-Art ‘ROVR’ Smart Hub to the World

SAN DIEGO--(BUSINESS WIRE)-- **5BARz International (OTCQB:BARZ)**

(www.5BARz.com) (“5BARz” or “the Company”), a technology leader in the cellular network extender industry and broadband networks, has unveiled the first look of its top-of-the-line Wi-Fi router and IoT hub, ‘**ROVR**’, for people to experience its intuitive features and designed to provide a state-of-the-art living experience, enabling them to customize their internet experience completely around actual usage within a home. As previously announced, our subsidiary, 5BARz India, has entered into an agreement with a top Indian internet service provider (ISP) to deploy a minimum of 5 million Wi-Fi routers.

The trendy and futuristic device draws design inspiration from the foundations of simplistic minimalism advocated by many consumer electronics majors today. It is also designed to look like a friendly addition to every household, though the technology is cutting-edge; it comes with high-tech features not experienced by the homes of today.

THE 5BARz™

variants: BLACK & WHITE

On the technology front, the features have been broken down into six smart functionalities: **SMART POWER** enables users to access 4 hours of power backup for uninterrupted power supply. **SMART WIRELESS** with fiber and a wireless backhaul and dynamic switchover. **SMART USAGE** creates mini instances of the Wi-Fi with variable bandwidth, speeds and data download allowances for each device based on user profile. **SMART STORAGE** enables a house to share a common drive for storing pictures, videos, music relevant to the family. **SMART BANDWIDTH** which alerts when usage is likely to exceed thresholds based on patterns of usage.

Adding to this are the **SMART HOME** functionalities which enable the power of the IoT to provide a household with safety and comfort. With a small IoT accessory designed, the 'ROVR' can provide functionalities such as temperature, humidity, gas detection, motion sensors and cameras which can alert the home owners with a call or SMS. More innovative IoT features can be accessed by a household with additional accessories in the future as more integrations are added by the company into the Connectivity Suite.

According to **Samartha Raghava Nagabhushanam, CEO of 5BARz India Private Limited**, "The product combines cutting-edge technology and world-class design with exquisite attention to detail. It's a high-quality design envelope for a set of some disruptive features in the Wi-Fi domain. 'ROVR' has functionalities that enable Wi-Fi users to smartly monitor, manage and control their home networks while at home or away using intuitive features that we are making available through the Connectivity Suite. You will basically be able to talk to your devices without knowing code."

About 5BARz India

5BARz India Private Limited is one of India's most promising technology start-ups that is well equipped to provide seamless connectivity solutions. **5BARz India** is a part of **5BARz International Inc.**, a start-up that is delivering solutions for cellular and broadband network operators in providing clear, high quality signal and superior connectivity for their subscribers. **5BARz™** with its two state-of-the-art products, **5BARz™ Network Extender** for cellular connectivity and the [5BARz™ 'ROVR' Wi-Fi Router](#) for broadband connectivity, is striving to solve the problem of last mile connectivity. Due to the plug & play nature and zero installation cost, the **5BARz™** suite of products is emerging as the most attractive proposition in India.

The ultra-portable [5BARz™ Network Extender](#) incorporates a patented technology to create a high engineering based, single-piece, plug and play device that strengthens weak cellular signals by amplifying even the poorest cellular signals from 1 bar to 5 bars, ensuring uninterrupted connectivity at home and work.

The **5BARz™ 'ROVR' Wi-Fi Router** through its single-piece, plug and play device introduces a break through approach in providing uninterrupted and superior coverage and connectivity across home and work with a smart approach to broadband.
