Forward-Looking Statements

Statements in this presentation that are not descriptions of historical facts are "forward-looking statements" relating to future events, as that term is defined in Section 27(a) of the Securities Act of 1933, as amended, and Section 21(e) of the Securities Exchange Act of 1934, as amended. Statements may contain certain forward-looking statements pertaining to future anticipated or projected plans, performance and developments, as well as other statements relating to future operations and results. Any statements in this presentation that are not statements of historical fact may be considered to be forward-looking statements. Words such as "may," "will," "expect," "believe," "anticipate," "estimate," "intends," "goal," "objective," "seek," "attempt," or variations of these or similar words, identify forward-looking statements. These forward-looking statements by their nature are estimates of future results only and involve substantial risks and uncertainties, including but not limited to risks associated with the uncertainty of future financial results, additional financing requirements, successful commercialization of the Company's products, development of new products, the impact of competitive products or pricing, technological changes, the uncertainty regarding the laws and regulations governing the use and sale of cannabis, the effect of economic conditions, and other uncertainties detailed from time to time in our reports filed with the Securities and Exchange Commission. Except as required by Federal securities law, the Company does not undertake any obligation to release publicly any revisions to any forward-looking statements.

This presentation is for informational purposes only. This presentation does not constitute an offer to sell, or a solicitation to purchase, any securities of the Company.

The Untapped Data Science of Cannabis

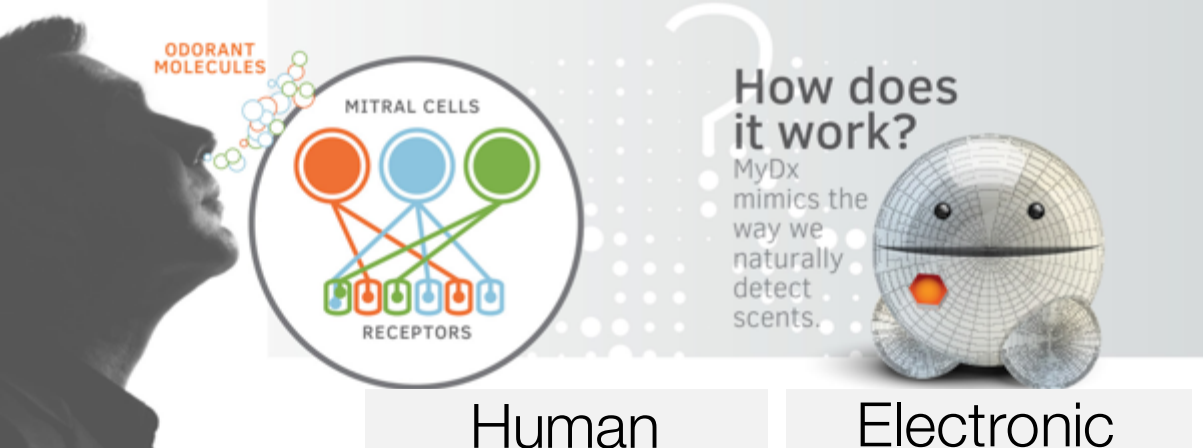

Terpenes to Remember

- There are 400+ chemicals in Cannabis, it's not just about THC.
- Most of them fall into three categories: cannabinoids, terpenoids, & flavonoids.
- Each of these compounds can modify the therapeutic effects of the plant.
- There are hundreds of different chemical combinations, each producing a different effect on different people.
- Our CannaDx™ Application tests cannabis flower for 25 important chemicals of interest, including Cannabinoids and Terpenes and associates them with feelings and ailment relief.
