

Hello,

As the holiday season draws near, retailers are starting to roll out their marketing plans and holiday strategies. Cue in new marketing technologies that are combining digital signage with mobile marketing - presenting retailers with the opportunity to connect and "talk" with shoppers who are close by, primed and ready to spend on holiday goodies. With a more interactive shopping experience for consumers and an effective new marketing channel for retailers, the combination is the perfect pairing to bring home the "gift" of revenues this season.

### Making Mobile Connections

With the advent of a "mobile culture" and mobilized shoppers, mobile interest and usage continues to captivate consumers, businesses and cultivate mobile commerce. Retailers are seeing the advantages of incorporating this channel into their daily marketing communication to customers, utilizing the immediacy of mobile messaging to send relevant promotions and special offers.

Two of the biggest and most competitive shopping days for retailers, on Black Friday and Cyber Monday about [50% of consumers](#) used their smartphones to shop, showroom and compare product prices while in stores. It is the perfect time for retailers to send shoppers immediately redeemable special offers that they can act on.

Needless to say, mobile marketing technology will create a more personalized shopping experience for consumers in the coming weeks, and it will also provide retailers with more earning potential than traditional advertising mediums - plus a new way for retailers to interact with customers and increase sales, just in time for the holidays.

### Recent News and Happenings Here at iSIGN

The retail industry is increasingly adopting mobile marketing technology, and here at iSIGN we have been expanding our mobile marketing solution to serve [more retailers in the United States](#), and we are proud to announce that we have just [installed 100 of our Smart Antennas](#) into a convenience store chain based in Ontario,
