MYOS Corporation Announces Corporate Name Change to MYOS RENS Technology Inc.

CEDAR KNOLLS, NJ -- (Marketwired) -- 03/22/16 -- [MYOS Corporation](#) ("MYOS" or the "Company") (NASDAQ: MYOS), an emerging [biotherapeutics](#) and [bionutrition](#) company focused on the discovery, development and commercialization of products that improve human muscle health and performance, announced today that it is changing its corporate name to MYOS RENS Technology Inc. The name change reflects the important alignment between MYOS, a leader in bionutrition and biotherapeutic products designed to improve the health and performance of muscle tissue, and affiliates of RENS Technology Inc., including RENS Agriculture Science & Technology Inc., a leader in food freezing technology in China and an innovator in the science of preserving the integrity of food-derived proteins. The Company's common stock will continue to be listed on the Nasdaq Capital Market under the symbol "MYOS."

Dr. Robert Hariri, Chairman of the Board of Directors, commented, "The new name -- MYOS RENS Technology Inc. -- emphasizes our objective to globalize the powerful products developed by MYOS. As a company rooted in science and technology, we are committed to delivering breakthrough products globally that aim to improve the health and performance of muscle tissue."

About MYOS Corporation

MYOS is an emerging biotherapeutics and bionutrition company focused on the discovery, development and commercialization of products that improve muscle health and function essential to the management of sarcopenia, cachexia and degenerative muscle diseases. MYOS is the owner of Fortetropin®, the first clinically proven natural myostatin reducing agent. Myostatin is a natural regulatory protein, which inhibits muscle growth and recovery. Medical literature suggests that lowering myostatin levels has many potential health benefits including increased muscle mass, healthy weight management, improved energy levels, stimulation of muscle healing as well as treating sarcopenia, a condition of age-related loss of muscle mass. About RENS Agriculture

RENS Agriculture was founded by Mr. Ren Ren and has substantial investments in the food and agricultural sectors in China. RENS Agriculture's proprietary "fresh freezing and preservation technology" is a leading food freezing technology that not only extends the refrigerator life of foods but also preserves their flavor and texture. As food safety is a major concern in China, which also brings additional market opportunities, RENS Agriculture has focused on investing in a number of "safe foods industrial parks" in China. These parks have food freezing facilities that use RENS Agriculture's technology to freeze the foods produced by the farms inside and around the park and directly deliver these frozen foods to supermarkets and consumers. RENS Agriculture's goal is to deliver safe quality foods to

millions of consumers in China. RENS Agriculture has invested in a bamboo roots processing facility in Hangzhou, fish farms in Zhoushan, tea oil plants in Jiangxi, and frozen foods processing centers in Beijing and Nanjing. RENS Agriculture also cooperated with Chilean fishing industry to import salmon and is negotiating with Australian farmers to import beef and lamb into China.

Forward-Looking Statements

Any statements in this release that are not historical facts are forward-looking statements. Actual results may differ materially from those projected or implied in any forward-looking statements. Such statements involve risks and uncertainties, including but not limited to those relating to the successful continued research of Fortetropin® and its effects on myostatin levels, inflammatory cytokine levels and cholesterol levels, the successful launch and customer demand for our Rē Muscle Health™ and other products, the closing of the second and third tranches of the recent financing with RENS (the "Financing"), the continued growth of repeat purchases, market acceptance of our existing and future products, the ability to create new products through research and development, growth in our revenue, including the successful expansion through the distribution efforts with RENS, the successful entry into new markets including the age management market, the ability to collect our accounts receivable from our distributors, our ability to raise capital to fund continuing operations, including closing the second and third tranches of the Financing and through the exercise of the warrants issued in the Financing, the ability to attract additional investors and increase shareholder value, the ability to generate the forecasted revenue stream and cash flow from sales of Fortetropin® and Rē Muscle Health™, the ability to achieve a sustainable profitable business, the effect of economic conditions, the ability to protect our intellectual property rights, the ability to maintain and expand our manufacturing capabilities including finding suitable manufacturing partners in China and reduce the costs of our products, the ability to comply with NASDAQ's continuing listing standards, the ability to acquire suitable acquisition targets, competition from other providers and products, risks in product development, and other factors discussed from time to time in our Securities and Exchange Commission filings. We undertake no obligation to update or revise any forward-looking statement for events or circumstances after the date on which such statement is made except as required by law.
