Revolution Lighting Technologies Awarded \$4 Million as Part of Recent Public Education LED Retrofit Projects

Company Continues to Provide High Efficiency LED Lighting Solutions to Reduce Operating Costs, and Improve Light Quality and Safety Throughout Public Schools Nationally

STAMFORD, CT -- (Marketwired) -- 02/08/17 -- Revolution Lighting Technologies, Inc. (NASDAQ: RVLT) ("Revolution Lighting"), a global provider of advanced LED lighting solutions, today announced that it has recently secured LED lighting contracts totaling approximately \$4 million, including school districts within New Jersey, Connecticut and Rhode Island.

Revolution Lighting's operating divisions, Energy Source and Tri-State LED provided "turnkey" services that began with a comprehensive assessment to establish the most energy efficient program, installing [Revolution Lighting's high performance LED tubes and Eco thin panel fixtures](#). These LED solutions deliver superior efficiency to reduce lighting energy use by more than 60%, while increasing light output for enhanced safety and higher quality learning environments for students. Additionally, its LED lighting lasts three times longer than conventional fluorescent lighting, combined with Revolution Lighting's market-leading 10-year warranty, to provide significant long-term operational and maintenance cost savings.

Revolution Lighting offers a broad line of high quality LED solutions, including tubes, Eco thin panels, troffer fixtures, high bays, area flood lighting and wall pack fixtures to address the various lighting requirements throughout primary and secondary education facilities. This includes hallways, classrooms, administrative areas, support spaces, and cafeterias, in addition to exterior applications such as parking, pedestrian walkways, and security and emergency lighting.

"These recent program wins, coupled with previous 2016 LED retrofit project awards among primary and higher education institutions, including [Lehman College](#) and [Des Moines University](#), exceed \$20 million, demonstrating our leadership in this important market," said Robert V. LaPenta, CEO and Chairman of Revolution Lighting. "We anticipate several additional awards near term in the Connecticut, Boston and New Jersey school systems as the school boards recognize the health, learning and financial benefits of LED lighting."

[According to the Department of Energy](#), lighting is the second largest source of energy use in K-12 schools, behind only space heating and cooling. As cited throughout a U.S. Environmental Protection Agency report, school buildings are often able to achieve upwards of greater than 40% energy cost savings through lighting installations and retrofits. With

approximately [98,000 public schools](#) and 4,600 colleges and universities nationwide, energy efficient lighting solutions represent a tremendous market opportunity for Revolution Lighting.
