Synergy Pharmaceuticals to Present at the 8th Annual BioPartnering North America (BPN) Conference in Vancouver, BC, Canada

BioPartnering North America 2010

NEW YORK--Synergy Pharmaceuticals, Inc. (OTC BB: SGYP), a developer of new drugs to treat gastrointestinal disorders and diseases, announced today that Dr. Gary S. Jacob, the Company's President & Chief Executive Officer, will present at the 8th Annual BioPartnering North America (BPN) Conference which is being held on January 24th - 26th, 2010 at the Westin Bayshore Resort in Vancouver, BC. The Company is scheduled to present on Monday, January 25th at 1:30 PM PST in the Coquitlam Room (Stream 2).

About Synergy Pharmaceuticals, Inc.

Synergy is a biopharmaceutical company focused on the development of new drugs to treat gastrointestinal disorders and diseases. Synergy's proprietary drug SP-304 began clinical development in June 2008 for gastro-intestinal disorders. SP-304 recently finished a Phase I clinical trial in volunteers and the Company plans to initiate a Phase IIa clinical trial of SP-304 in chronic constipation patients in the first quarter of 2010. SP-304 is a synthetic analog of the human gastrointestinal hormone uroguanylin, and acts by activating the guanylate cyclase C (GC-C) receptor on epithelial cells of the GI tract. Forward-Looking Statements

Certain statements made in this press release are forward-looking. Such statements are indicated by words such as "expect," "should," "anticipate" and similar words indicating uncertainty in facts and figures. Although Synergy believes that the expectations reflected in such forward-looking statements are reasonable, it can give no assurance that such expectations reflected in such forward-looking statements will prove to be correct. As discussed in the Synergy Pharmaceuticals Annual Report on Form 10-K for the year ended December 31, 2008, and other periodic reports, as filed with the Securities and Exchange Commission, actual results could differ materially from those projected in the forward-looking statements as a result of the following factors, among others: uncertainties associated with product development, the risk that products that appeared promising in early clinical trials do not demonstrate efficacy in larger-scale clinical trials, the risk that Synergy will not obtain approval to market its products, the risks associated with dependence upon key personnel and the need for additional financing.
