Energy Source Continues Penetration of Medical Industry, Retrofitting Signature Healthcare's Brockton Hospital

Company Completes \$1.6M in Recent LED Retrofit Projects Throughout Northeast Healthcare & Medical Facilities

PROVIDENCE, RI -- (Marketwired) -- 07/19/16 -- Energy Source, a division of Revolution Lighting Technologies, today announced that it has recently completed its latest LED retrofit project for Signature Healthcare's Brockton Hospital in Massachusetts. Over the recent past, the company was awarded LED retrofit projects among northeast medical and healthcare facilities totaling \$1.6M.

The project with Signature Healthcare's Brockton Hospital addressed interior and exterior medical and administrative office lighting. As part of the retrofit program [Energy Source](#) provided comprehensive turnkey services to install high efficiency LED lighting, including Revolution Lighting's [LED tubes](#). The turnkey services assisted with all phases of project development including scope development, material selection, incentive procurement, bidding and project management. As a result of the project's success, additional LED retrofit opportunities are being considered within other campus medical facilities.

This project marks the latest healthcare related project completed by Energy Source and its parent company, Revolution Lighting. Other recently completed projects by Energy Source include Rhode Island Hospital, Miriam Hospital, Newport Hospital, Bradley Hospital, Nashoba Valley Medical St. Vincent's Hospital. This success is expected to continue as the broad adoption of LED lighting among health care facilities grows. LED lighting, which is more than 50% more efficient and lasts three times longer than fluorescent lighting, is being widely recognized among facilities managers as a key opportunity to reduce long term operational and maintenance costs.

"We wanted to introduce the latest LED lighting solutions throughout our facilities that not only improve energy use, but improve the quality of light for our employees and patients," said John P. Duraes, Director of Facilities & Engineering, Signature Healthcare Brockton Hospital. "Revolution Lighting's division, Energy Source, acted as an invested partner to deliver the most authoritative knowledge, the best solutions in the market place, the best technical expertise and seamless project experience to ensure the most visible, positive impact for our project."

"We are proud to work with Signature Healthcare and Brockton Hospital, providing comprehensive turnkey services and our market leading LED solutions to exceed their project goals," said Ron Sliney, Vice President, Energy Source. "The continued selection of Revolution Lighting by health care facilities throughout the U.S. validates the confidence in

our company as a leader to transform lighting into a source of superior energy savings, quality light and well-being."

Health care in the United States, including approximately 5,700 hospital facilities, [spends over \\$6.5 billion annually in energy to meet patient needs](#). With an average of 15% of total energy costs dedicated to lighting, hospitals could save more than \$487M annually by incorporating LED technology, providing a significant opportunity for Revolution Lighting.

As a leading provider of LED solutions and services, Revolution Lighting partners with each customer and its approved installation contractor to ensure each project maximizes its goals.
