STWA, Inc. Launches New Corporate Website

SANTA BARBARA, CA--(Marketwire - Apr 26, 2011) - [STWA, Inc.](http://www.stwa.com) (OTCBB: ZERO) ("STWA" or the "Company"), an innovative company creating technology focused on energy efficiency of large-scale energy production and improved fuel economy for diesel fleets, today announced the launch of its new corporate website under the domain name <http://www.stwa.com>.

"STWA's newly designed website features a more detailed overview of our company and its achievements and our energy efficiency technology for crude oil viscosity reduction and greater fuel efficiency," stated Mr. Cecil Bond Kyte, Chairman and CEO of STWA, Inc. "Our new website provides a better platform for our customers, investors and industry partners to efficiently access information on STWA and our value proposition to the market. Effective communication is important to us, and this newly designed, well-organized site is a significant step in this process."

The enhanced website was redesigned to increase user-friendly functionality and to offer additional information for customers, investors, and others interested in STWA and energy efficiency technology for the oil industry and diesel fleets. The redesigned website offers better navigation and a richer section dedicated to investor relations, which is in keeping with the Company's growing profile in the investment community.

About STWA, Inc.

STWA, Inc. (OTCBB: ZERO) is an innovative company creating technology focused on energy efficiency of large-scale energy production and improved fuel economy for diesel fleets. The Company's Patented and Patent Pending technologies, including [AOT™](#) (Applied Oil Technology), under development with Temple University, and [ELEKTRA™](#) (for Improved Diesel Engine Efficiency), provide efficient and cost-effective means of improving the efficacy of crude oil transport and diesel engine efficiency to assist in meeting global increasing energy demands and emission quality standards. Applications include: (AOT™) Crude oil extraction & delivery systems, including oil platforms, oil fields and pipeline transmission systems. (ELEKTRA™) Diesel trucks, trains, marine vessels, military fleets and jet turbines.
