Cleartronic Announces Issuance of Patent for Multi Ad Hoc Interoperable Communicating Networks

BOCA RATON, Fla., April 10, 2012 (GLOBE NEWSWIRE) -- Technology development company Cleartronic, Inc. (OTCBB:CLRI) announced today that it has been issued patent #8,135,001 by the U.S. Patent and Trademark Office for multi ad hoc interoperable communicating networks. "This patent locks in the company's key technologies which digitally integrate multi-band, multi-channel radio environments to a world of other audio communication devices. This patent is also a wonderful foundation to build further technologies on and allows us apply for additional patents that will protect our intellectual property," said Kent Swan, Chief Technology Officer of Cleartronic. (www.cleartronic.com)

"Our interoperable communication systems and products are being used by a variety of industries where mission critical communications are vital. Our systems and equipment have been deployed worldwide by energy sector industries including oil and electric utilities, government first responders, mining operations, university campuses, and international airports. These systems provide voice communication and alerting systems on a wide variety of otherwise incompatible devices including two-way radios, PC's and telephones, thus enabling instant contact between personnel when every second counts," said James Concannon, Director of Sales for VoiceInterop, Inc. (www.voiceinterop.com)

Michael Gutowski, Vice-President of Product Development for Cleartronic, added, "This patent is important in advancing Audiomate360 technology with third parties who wish to strategically partner with the Company." He further commented, "Until now our VoiceInterop subsidiary has been selling Audiomate360 hardware and software direct to customers and through a network of system integrators. This patent allows us to launch a licensing program with existing and future strategic partners."

About Cleartronic, Inc.

Cleartronic, Inc. (OTCBB:CLRI) is a technology holding company that creates and acquires operating subsidiaries to develop, manufacture and sell products, services and integrated systems serving a range of market applications, from business enterprises to consumer products and services.

Cleartronic's central mission is to leverage its underlying core technology and proven competencies into new, high-growth market applications, including the development of consumer products targeting large domestic and global markets. Opportunities being considered include energy consumption management, cloud communications, and machine-to-machine applications.
