Cleartronic, Inc.'s Subsidiary ReadyOp Communications, Inc. Deploys ReadyOp™ with the Georgia Department of Public Health

BOCA RATON, Fla., Feb. 13, 2019 (GLOBE NEWSWIRE) -- ReadyOp Communications, Inc., a wholly-owned subsidiary of Cleartronic, Inc. (CLRI: OTCPINK) announces the use of ReadyOp by the [State of Georgia Department of Public Health](#). The Department now uses [ReadyOp](#) for planning, communications and incident response statewide, and to coordinate with local health departments, hospitals, and others. They also use ReadyOp for daily operations, training, and communication and coordination with other health departments and State agencies.

"We began working with the Department last summer and the relationship continues to grow. They introduced several new and innovative ways of using ReadyOp for information management and distribution, inspections and reporting to match the way they want to operate," said Marc Moore, CEO of ReadyOp Communications. "We also continue to work with the state public health departments in other states; as we extend ReadyOp's use across multi-state regions."

ReadyOp provides a single, secure location for organizations to consolidate incident and emergency plans, rosters, tasks, roles, groups and more. Each agency through its secure website, plans personnel and roles, emergency operations, callout teams and other groups that may be needed. ReadyOp enables users to communicate and interact quickly and efficiently with each other using voice, text, emails and two-way radios regardless of their location.

ReadyOp is used by many local, state and federal agencies, hospitals, schools and universities and corporations for daily operations, incident and emergency response planning, regional fusion and coordination, continuity of operations (COOP) planning, and for event planning and operations. ReadyOp is the only program that provides planning, operations, and communications, including two-way radio communications, in a single platform.

[ReadyOp's radio interoperability](#) provides clients with true two-way communications within and between radio talk groups regardless of location, radio type, and frequency. Regardless of their location and through an encrypted internet connection, authorized users can extend radio communications to radios, laptops, and smartphones worldwide.
