Recognized internationally as a pioneer and leader in web and network security, Finjan's decades-long investment in innovation is captured in its patent portfolio, centered around software and hardware technologies capable of proactively detecting previously unknown and emerging threats on a real-time, behavior-based basis. Finjan has successfully licensed its patents and technology to several major software and technology companies around the world.

ABOUT FINJAN HOLDINGS

Through our subsidiary, Finjan, Inc., we own a portfolio of patents, related to software that proactively detects malicious code and thereby protects end users from identity and data theft, spyware, malware, phishing, trojans and other online threats. Finjan's mission is to invest in innovation and encourage the development of core intellectual property. Founded in 1997, Finjan developed and patented technology that is capable of detecting previously unknown and emerging threats on a real-time, behavior-based, basis, in contrast to signature-based methods of intercepting only known threats to computers, which were standard in the online security industry during the 1990s.
