FinjanMobile Announces Launch of its Gen3 Mobile Secure Browser, VitalSecurity

Available in both the Apple and Google Play Stores

EAST PALO ALTO, CA -- (Marketwired) -- 10/25/16 -- [Finjan Holdings](#), Inc. (NASDAQ: FNJN), a cybersecurity company, today announced that its subsidiary, Finjan Mobile, Inc., released its Gen3 VitalSecurity™ Browser, available in the [Google Play Store](#) (for Android devices) or the [Apple Store](#) (for Apple devices), which offers consumers the best in category security and privacy features for securing mobile devices from malicious internet content. The completely redesigned Gen3 browser is based on user and market feedback and embodies Finjan's core patented technologies.

"Mobile security and privacy are key drivers in today's marketplace. Our solutions are needed to protect consumer data and interactions over the internet, which are virtually non-existent," said Finjan's President and CEO, Phil Hartstein. "FinjanMobile™ will continue to innovate through its mobile security product offerings and is currently evaluating a number of partnerships to bring industry leading technologies to market."

FinjanMobile's VitalSecurity Browser offers complete browser functionality and displays detailed analysis of virus and malware threats aggregated from over 60 top virus companies. Importantly, the Gen3 Browser offers full transparency of the browsing experience while guarding a user's privacy by not collecting any personal data. It features biometric and passcode security enabled through mobile device hardware to further protect the user's experience.

"VitalSecurity is a fully functional browser that offers protection for both mobile and tablet devices. Users can safely browse the internet and be warned that sites might contain malicious or suspicious content," commented Scot Robinson, Director of FinjanMobile. "Not only will the user be warned about malicious sites, they can see further details on the scan and from where the unknown content was found. Fingerprint identifier and passcode features further protect both the user and their devices. Our current offering is much improved both from a functional and visual standpoint but there are many more features to come."

The Gen3 VitalSecurity Browser can be downloaded onto your smartphone or tablet from the [Google Play Store](#) (for Android devices), or the [Apple Store](#) (for Apple devices). You use Finjan's app as a more private and secure substitute to other browsers such as Safari, Chrome or Firefox.
