Finjan Mobile Achieves More Than a Million Downloads with its InvinciBull VPN

Enhanced, “Always-on” VPN Spearheads Rapid Adoption

EAST PALO ALTO, Calif., Jan. 24, 2019 (GLOBE NEWSWIRE) --[Finjan Holdings](#), Inc. (NASDAQ: FNJN), a pioneer in cybersecurity, today announced that its subsidiary, [Finjan Mobile, Inc.](#) and its enhanced VPN, InvinciBull, has grown its customer base since its September launch. InvinciBull is a set-it-once Virtual Private Network uniquely designed to stream content and data securely and anonymously wherever you are on the planet.

“We have taken the worry out of using a personal VPN with our ‘always protected’ feature that ensures consumers don’t have to remember to turn InvinciBull on to stay safe when using public networks,” said June Bower, Head of Marketing for InvinciBull. “We attribute the growth to the ease of using InvinciBull, designed to ensure business travelers can stay safe and connect to the content they need, whether on the road or at home.”

Shortly after launching in September, InvinciBull was recognized by Ntrepid as being one of the leading VPN providers, and was entrusted with their estimated 4,000 users, as they migrated from their consumer VPN offering, Anonymizer, to InvinciBull.

Additionally, InvinciBull recently received high marks in [a review by BestVPN](#). The reviewer noted, “Undoubtedly, security is the thing number one a trustworthy VPN should provide customers. InvinciBull encrypts your data using military-grade [AES 256-bit encryption](#). Moreover, it has patented technology in the form of a *built-in browser*. The browser informs users if the web page is dangerous and if the website they visit is tracking their information.”

“Having been created by a pioneer in cybersecurity, Finjan Holdings takes personal data seriously and assures that the InvinciBull app does not use or sell customer data,” said Gregory Falco, Ph.D., a cyber security researcher at MIT’s Computer Science and Artificial Intelligence Lab (CSAIL) and founder of NeuroMesh. “One of the biggest barriers to adopting privacy measures on the internet is convenience. InvinciBull removes that barrier. Every time you access a network that’s not your own, InvinciBull’s ‘always protected’ feature automatically activates.”

InvinciBull’s mission to protect devices from malicious content on the internet is aligned with Finjan Holding over 20-year history as a cybersecurity innovator. The company believes that individuals deserve access to innovative tools and technology that protect their online activity and secure their privacy.

The InvinciBull App is available for download on [InvinciBull.io](#) and is available on the iOS and Android platforms in the [iTunes](#) and [Google Play](#) stores. The Basic VPN Plan is free, which allows users to connect to the nearest location and use of up to 1GB of VPN data per

month.

About Finjan Holdings, Inc.

Established 20 years ago, Finjan Holdings, Inc. is a globally recognized pioneer in cybersecurity. Finjan Inc.'s inventions are embedded within a strong portfolio of patents focusing on software and hardware technologies capable of proactively detecting previously unknown and emerging threats on a real-time, behavior-based basis.
