

## COMPANY OVERVIEW

Clean Coal Technologies, Inc. (OTC:CCTC) is a late-stage start-up company that has introduced proprietary patented and patent pending technologies to convert raw coal into a cleaner, more efficient fuel source. Use of the company's innovative process makes possible the upgrade of low-rank coals, including lignite, into premium fuels that are high in calorific content and low in pollutants.

Clean Coal Technologies' trademarked products, Pristine™ and Pristine-M™, are significantly more efficient, less polluting and more cost-effective than untreated coal. The company's products offer solutions for coal users involved in power generation, steel, and coal-to-gas or coal-to-liquids projects.
