About Resonant Inc.

Resonant is a development-stage company creating innovative filter designs for radio frequency, or RF, front-ends for the mobile device industry. Resonant uses a fundamentally new technology called Infinite Synthesized Networks™, or ISN™, to configure and connect acoustic resonators, the building blocks of RF filters. Filters are a critical component of the RF front-end used to select desired signals and reject unwanted signals. ISN is a systematic process that employs a comprehensive suite of patented and proprietary circuit design methods and tools to create filters. Resonant is using ISN to develop new classes of filter designs. For information, please visit www.resonant.com.
