Petroteq Announces Update on Oil Production and Oil Quality Baseline

Also: Instructions for Upcoming Corporate Shareholder Call

SHERMAN OAKS, Calif., Dec. 09, 2019 (GLOBE NEWSWIRE) -- Petroteq Energy Inc. (“**Petroteq**” or the “**Company**”) (TSXV:PQE; OTC:PQEFF; FSE:PQCF), an oil sands mining and production company having a proprietary technology that extracts hydrocarbons without the use of water, is pleased to announce an update on oil production and the facilities oil quality baseline.

Since November 25, 2019, when the automation was completed, Petroteq is pleased to report that:

- The facility has produced an average 80 barrels of sales oil in 12-hour process shifts - a total of 10 days of the 14 day period;
- The facility has produced an average of **150 barrels of sales oil** in 12-hour process shifts over the last two days;
- The Company is in the process of training additional team members with the intent of increasing production shifts;
- The facility has produced sales oil with API gravity of 15 to 17 API degrees (higher API of up to 20 degrees has been recorded for shipping of the product during current cold weather conditions);
- The facility has produced sales oil with BS&W (Basic Sediment and Water) or “sediment levels” averaging three tenths of one percent; and
- The produced sales oil is of a low sulfur percentage (less than a half a percent 0.5%).

Additionally, the Company is pleased to announce that it will host its inaugural Investor Call, with a management question and answer session, on Tuesday, December 17, 2019 at 11 a.m. Central Time. Hosting the call will be David Sealock, Chief Executive Officer of Petroteq.

The call can be accessed live by dialing (877) 407-3982, or for international callers, (201) 493-6780. A replay will be available shortly after the call and can be accessed by dialing (844) 512-2921, or for international callers (412) 317-6671. The passcode for the replay is 13697142. The replay will be available until December 24, 2019.

About Petroteq Energy Inc.

Petroteq is a fully integrated oil and gas company focused on the development and implementation of a new proprietary technology for oil extraction. The Company has an environmentally safe and sustainable technology for the extraction of heavy and bitumen from oil sands, oil shale deposits and shallow oil deposits. Petroteq is engaged in the development and implementation of its patented environmentally friendly heavy oil processing and extraction technologies. Our proprietary process produces zero greenhouse

gas, zero waste and requires no high temperatures. Petroteq is currently focused on developing its oil sands resources and expanding production capacity at its Asphalt Ridge heavy oil extraction and processing facility located near Vernal, Utah.

Forward-Looking Statements

Certain statements contained in this press release contain forward-looking statements within the meaning of the U.S. and Canadian securities laws. Words such as “may,” “would,” “could,” “should,” “potential,” “will,” “seek,” “intend,” “plan,” “anticipate,” “believe,” “estimate,” “expect” and similar expressions as they relate to the Company, are intended to identify forward-looking information. Readers are cautioned that there is no certainty that it will be commercially viable to produce any portion of the resources. All statements other than statements of historical fact may be forward-looking information. Such statements reflect the Company’s current views and intentions with respect to future events, based on information available to the Company, and are subject to certain risks, uncertainties and assumptions, including, without limitation: the Company’s technology producing as expected without additional or unforeseen technical problems; oil prices remaining at or above current prices; and the Company’s ability to continue financing existing expenses, including capital expenses. Material factors or assumptions were applied in providing forward-looking information. While forward-looking statements are based on data, assumptions and analyses that the Company believes are reasonable under the circumstances, whether actual results, performance or developments will meet the Company’s expectations and predictions depends on a number of risks and uncertainties that could cause the actual results, performance and financial condition of the Company to differ materially from its expectations. Certain of the “risk factors” that could cause actual results to differ materially from the Company’s forward-looking statements in this press release include, without limitation: uncertainties inherent in the estimation of resources, including whether any reserves will ever be attributed to the Company’s properties; since the Company’s extraction technology is proprietary, is not widely used in the industry, and has not been used in consistent commercial production, the Company’s bitumen resources are classified as a contingent resource because they are not currently considered to be commercially recoverable; full scale commercial production may engender public opposition; the Company cannot be certain that its bitumen resources will be economically producible and thus cannot be classified as proved or probable reserves in accordance with applicable securities laws; changes in laws or regulations; the ability to implement business strategies or to pursue business opportunities, whether for economic or other reasons; status of the world oil markets, oil prices and price volatility; oil pricing; state of capital markets and the ability of the Company to raise capital; litigation; the commercial and economic viability of the Company’s oil sands hydrocarbon extraction technology, and other proprietary technologies developed or licensed by the Company or its subsidiaries, which currently are of an experimental nature and have not been used at full capacity for an extended period of time; reliance on suppliers, contractors, consultants and key personnel; the ability of the Company to maintain its mineral lease holdings; potential failure of the Company’s business plans or model; the nature of oil and gas production and oil sands mining, extraction and production; uncertainties in exploration and drilling for oil, gas and other hydrocarbon-bearing substances; unanticipated costs and expenses, availability of financing and other capital; potential damage to or destruction of property, loss of life and environmental damage; risks

associated with compliance with environmental protection laws and regulations; uninsurable or uninsured risks; potential conflicts of interest of officers and directors; and other general economic, market and business conditions and factors, including the risk factors discussed or referred to in the Company's disclosure documents, filed with the securities regulatory authorities in certain provinces of Canada and available at www.sedar.com.

Should any factor affect the Company in an unexpected manner, or should assumptions underlying the forward-looking information prove incorrect, the actual results or events may differ materially from the results or events predicted. Any such forward-looking information is expressly qualified in its entirety by this cautionary statement. Moreover, the Company does not assume responsibility for the accuracy or completeness of such forward-looking information. The forward-looking information included in this press release is made as of the date of this press release, and the Company undertakes no obligation to publicly update or revise any forward-looking information, other than as required by applicable law.

Neither TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.
