Igniton Expands Quantum Wellness Platform with Launch of **IgniREM Sleep™** and **IgniPeptide Eye Serum™**

New products support sleep quality, recovery, and skin vitality through advanced quantum-enhanced formulations

BOULDER, Colo., June 9, 2026 /PRNewswire/ -- *Igniton*, a leader in emerging quantum wellness technologies, today announced the launch of two new products: ***IgniREM Sleep™***, a sleep-support formula designed to increase REM sleep which is important for mental recovery, and ***IgniPeptide Eye Serum™***, a topical eye serum formulated to support skin vitality and visible rejuvenation.

Advancing the Next Generation of Wellness

The introduction of *IgniREM Sleep* and *IgniPeptide Eye Serum* marks a step in *Igniton's* broader mission to develop a comprehensive quantum wellness technology platform—one that goes beyond traditional supplementation to support the body's natural systems at a foundational level.

"*Igniton* is not just building products—we are building a new category," said Ashley Grace, Chief Marketing Officer at *Igniton*. "By combining advanced formulation science with our proprietary enhancement processes, we aim to support how the body functions, adapts, and recovers over time."

Product Highlights

IgniREM Sleep

A targeted nighttime formula designed to support:

- Increased REM sleep for mental recovery
- Sleep quality and duration
- Restorative recovery processes
- Relaxation and stress balance

By supporting the body's natural sleep cycle, *IgniREM Sleep* helps optimize one of the most critical pillars of cognitive health, longevity, and overall well-being.

IgniPeptide Eye Serum

A premium topical formulation designed to support:

- Skin hydration and elasticity
- Reduction in the appearance of fine lines
- Less puffiness and dark circles around the eyes
- A refreshed, revitalized appearance

A New Frontier in Human Performance

Igniton's technology is rooted in advanced research exploring how biological systems are influenced at an energetic level through proprietary quantum-enhancement processes using subatomic quasi-particles known as ignitons. Results have demonstrated meaningful differences between enhanced and non-enhanced formulations in areas such as cognitive performance and stress response.

About *Igniton*

Igniton is a Colorado-based quantum wellness technology company focused on enhancing human performance through advanced formulation science. Its products, including *IgniLongevity™*, *IgniCognition™* and now *IgniREM Sleep™* and *IgniPeptide Eye Serum™* are part of a comprehensive platform designed to support the body's natural systems. *Igniton* integrates principles from neuroscience, bioenergetics, and advanced molecular enhancement technologies to develop next-generation performance solutions. *Igniton* is $\frac{2}{3}$ owned by Gaia, Inc. (NASDAQ: GAIA), the streaming media service for consciousness programming.
