Optex Systems gross profit increased by \$0.4 million and the Applied Optics Center gross profit increased by \$0.6 million. The increase is primarily due to higher revenue combined with higher fixed cost absorption at both the Applied Optics Center and Optex Richardson segments related to increased production volume.

The \$0.8 million increase in operating income is primarily due to higher revenue and gross profit, partially offset by increased general and administrative expenses.

Adjusted EBITDA has limitations and should not be considered in isolation or a substitute for

performance measures calculated under GAAP. This non-GAAP measure excludes certain cash expenses that we are obligated to make. In addition, other companies in our industry may calculate Adjusted EBITDA differently than we do or may not calculate it at all, which limits the usefulness of Adjusted EBITDA as a comparative measure.

These financial highlights do not include all information and disclosures required in the consolidated financial statements and footnotes and should be read in conjunction with our Quarterly Report on Form 10-Q for the three months ended December 31, 2023 filed with the SEC on February 12, 2024.
