# Clean Coal Technologies (CCTC) Australian Patent Accepted Today

**NEW YORK, NY / ACCESSWIRE / October 9, 2018** /Clean Coal Technologies, Inc., (OTCQB: CCTC) ("CCTI" or the "Company"), the leading clean-energy company utilizing patented and proven technology to convert run of mine coal into a cleaner burning and more efficient stabilized fuel, today announced the Australian Patent Office has accepted their Pristine SA patent.

"The Pristine SA Australia patent was applied for in May 2013 and CCTI is very pleased to announce today that the Patent Office has accepted our application," said Sean Mahoney, CCTI Press Officer. "The patents for our Pristine and Pristine M technology were granted in 2016 and this completes the patent protection for all three of our technologies.

"Now that we have complete IP protection in Australia across the spectrum of our technologies we are excited to move forward with the partnerships we have secured with several Australian Universities and capitalize on the support we have received from Austrade. The primary focus of our partnerships with the Australian Universities is to explore the valuable by-products that can be retrieved from Australian coal using our technology," concluded Mahoney.

## About Clean Coal Technologies, Inc.

Clean Coal Technologies, Inc., a cleaner-energy technology company with headquarters in New York City, NY, holds patented process technology and other intellectual property that converts raw coal into a cleaner burning fuel. The Company's trademarked end products, "Pristine" coals, are significantly more efficient, less polluting, more cost-effective, and provide more heat than untreated coal. The principal elements of the Company's pre-combustion technology are based on well-proven science and tried-and-tested industrial components. The Company's clean coal technology may reduce some 90% of chemical pollutants from coal, including Sulfur and Mercury, thereby resolving emissions issues affecting coal-fired power plants.
