## Resonant to Participate in Ascendant's Quarterly Management Discussion Series

SANTA BARBARA, Calif.-- Resonant Inc. (NASDAQ: RESN), a late-stage development company creating innovative filter designs for radio frequency front-ends (RFFEs) for the mobile device industry, today announced that CEO Terry Lingren and CFO John Philpott will participate in Ascendant's Quarterly Management Discussion Series teleconference on Wednesday, July 15, at 10:00 a.m. PDT / 1:00 p.m. EDT.

The Ascendant Quarterly Management Discussion Series consists of publicly open conversations between Ascendant's research analysts and select company management teams. Calls cover many topics including the macro environment, competitive dynamics and near term catalysts as well as the longer term fundamental outlook.

Interested parties can access the call by dialing 1-719-457-6209 and entering passcode 216781. Resonant will provide a replay of the call shortly after it concludes at [www.resonant.com](http://www.resonant.com). The replay will be available for 7 days.

### About Resonant Inc.

Resonant is creating innovative filter designs for radio frequency, or RF, front-ends for the mobile device industry using a fundamentally new technology called Infinite Synthesized Networks™, or ISN™. The RF front-end is the circuitry in a mobile device responsible for analog signal processing and is located between the device's antenna and its digital baseband. Filters are a critical component of the RF front-end that select the desired radio frequency signals and rejects unwanted signals. For more information, visit [www.resonant.com](http://www.resonant.com).
