Resonant Inc. to Host Investor Conference Call at 1:00 p.m. ET Today

SANTA BARBARA, Calif.-- Resonant Inc. (NASDAQ: RESN) (the "Company"), a late-stage development company creating innovative filter designs for radio frequency front-ends (RFFE) for the mobile device industry, will host a conference call today at 1:00 p.m. Eastern time (10:00 a.m. Pacific time).

Due to the limited notice for the announcement and conference call about the Company's first customer and filter design on April 2, 2015, management is extending an opportunity for investors who missed the prior call to participate. This call will not include any additional material information.

Conference Call Details

Date: Monday, April 6, 2015

Time: 1:00 p.m. Eastern time (10:00 a.m. Pacific time)

Hosts: Terry Lingren, Chairman and CEO and John Philpott, CFO

Investors interested in participating in the live call can dial 1-201-493-

Where: 6780

There also will be a simultaneous, live webcast available on the Investor Relations section of the Company's web site at www.resonant.com. The webcast will be available for replay for 60 days.

About Resonant® Inc.

Resonant is creating innovative filter designs for radio frequency, or RF, front-ends for the mobile device industry using a fundamentally new technology called Infinite Synthesized Networks®, or ISN®. The RF front-end is the circuitry in a mobile device responsible for analog signal processing and is located between the device's antenna and its digital baseband. Filters are a critical component of the RF front-end that select the desired radio frequency signals and rejects unwanted signals. For more information, visit www.resonant.com.
