Resonant to Present at Stephens 2015 Spring Investment Conference June 3

SANTA BARBARA, Calif.-- Resonant Inc. (NASDAQ: RESN), a late-stage development company creating innovative filter designs for radio frequency front-ends (RFFEs) for the mobile device industry, has been invited to present at the Stephens 2015 Spring Investment Conference, on Wednesday, June 3, at 11:00 a.m. Eastern at The New York Palace Hotel.

For more information on the conference or to schedule a one-on-one meeting with management, please contact a Stephens representative.

About Resonant Inc.

Resonant is creating innovative filter designs for radio frequency, or RF, front-ends for the mobile device industry using a fundamentally new technology called Infinite Synthesized Networks®, or ISN®. The RF front-end is the circuitry in a mobile device responsible for analog signal processing and is located between the device's antenna and its digital baseband. Filters are a critical component of the RF front-end that select the desired radio frequency signals and reject unwanted signals. For more information, visit www.resonant.com.
