Resonant to Report Second Quarter 2015 Financial Results and Host a Conference Call on Tuesday, August 11 at 2:00 p.m. Pacific

SANTA BARBARA, Calif.-- Resonant Inc. (NASDAQ: RESN), a late-stage development company creating innovative filter designs for radio frequency front-ends (RFFE) for the mobile device industry, today announced it will release financial results for the second quarter ended June 30, 2015, after market close on Tuesday, August 11, followed by an investor conference call at 2:00 p.m. PDT/5:00 p.m. EDT. Chief Executive Officer Terry Lingren and Chief Financial Officer John Philpott will host the call.

Investors interested in participating in the live call can dial 1-877-407-3982 from the U.S. and 1-201-493-6780 from international locations. A user-directed presentation will accompany the call and can be downloaded prior to the call at [2Q15 Resonant Presentation](#) and will be available for 60 days. A telephone replay will also be available approximately two hours after the call concludes and will run through August 18 by dialing 1-877-870-5176 from the U.S., or 1-858-384-5517 from international locations, and entering Replay Pin Number: 13615282.

About Resonant Inc.

Resonant, Inc. is a late-stage development company creating innovative filter designs for radio frequency front-ends (RFFE) for the mobile device industry. The RFFE is the circuitry in a mobile device responsible for analog signal processing and is located between the device's antenna and its digital baseband. Filters are a critical component of the RF front-end that select the desired radio frequency signals and rejects unwanted signals.

Using a patented, fundamentally new technology called Infinite Synthesized Networks™ (ISN), Resonant has developed a new method of designing RF filters that can displace conventional filters by providing significant cost and size reductions, fewer components and improved performance. ISN can improve Surface Acoustic Wave (SAW) filters to work in difficult, Bulk Acoustic Wave (BAW) bands with performance that is competitive with best in class products that exist on the market today. These capabilities will also allow Resonant to create filter designs that tune to multiple bands. Resonant plans to market these tunable designs which would replace several existing filters while significantly reducing the overall size and cost of the RFFE.
