INVESTOR PRESENTATION
NOVEMBER 2018

FORWARD LOOKING STATEMENT

This presentation includes "forward-looking statements" for purposes of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Exchange Act. All statements, other than statements of historical facts, included in this presentation that address activities, events or developments that Gulfport expects or anticipates will or may occur in the future, future capital expenditures (including the amount and nature thereof), business strategy and measures to implement strategy, competitive strength, goals, expansion and growth of Gulfport's business and operations, plans, market conditions, references to future success, reference to intentions as to future matters and other such matters are forward-looking statements. These statements are based on certain assumptions and analyses made by Gulfport in light of its experience and its perception of historical trends, current conditions and expected future developments as well as other factors it believes are appropriate in the circumstances. However, whether actual results and developments will conform with Gulfport's expectations and predictions is subject to a number of risks and uncertainties, general economic, market, credit or business conditions that might affect the timing and amount of the repurchase program; the opportunities (or lack thereof) that may be presented to and pursued by Gulfport; Gulfport’s ability to identify, complete and integrate acquisitions of properties and businesses; competitive actions by other oil and gas companies; changes in laws or regulations; and other factors, many of which are beyond the control of Gulfport. Information concerning these and other factors can be found in the Company's filings with the Securities and Exchange Commission, including its Forms 10-K, 10-Q and 8-K. Consequently, all of the forward-looking statements made in this presentation are qualified by these cautionary statements and there can be no assurances that the actual results or developments anticipated by Gulfport will be realized, or even if realized, that they will have the expected consequences to or effects on Gulfport, its business or operations. Gulfport has no intention, and disclaims any obligation, to update or revise any forward-looking statements, whether as a result of new information, future results or otherwise.

Gulfport's estimated proved reserves as of December 31, 2017 were prepared by Netherland, Sewell & Associates, Inc. ("NSAI") with respect to Gulfport's assets in the Utica Shale of Eastern Ohio, Gulfport's SCOOP Woodford assets in Oklahoma and Gulfport's WCBB and Hackberry fields and by Gulfport's personnel with respect to its Niobrara field, overriding royalty and non-operated interests (less than 1% of its proved reserves at December 31, 2017), and comply with definitions promulgated by the SEC. NSAI is an independent petroleum engineering firm. In this presentation, we may use the terms "EUR," or other descriptions of volumes of hydrocarbons to describe volumes of resources potentially recoverable through additional drilling or recovery techniques that the SEC's guidelines prohibit it from including in filings with the SEC. "EUR" does not reflect volumes that are demonstrated as being commercially or technically recoverable. Even if commercially or technically recoverable, a significant recovery factor would be applied to these volumes to determine estimates of volumes of proved reserves. Accordingly, these estimates are by their nature more speculative than estimates of proved reserves and accordingly are subject to substantially greater risk of being actually realized by the Company. The methodology for "EUR" may also be different than the methodology and guidelines used by the Society of Petroleum Engineers and is different from the SEC's guidelines for estimating probable and possible reserves.

EBITDA is a non-GAAP financial measure equal to net income, the most directly comparable GAAP financial measure, plus interest expense, income tax (benefit) expense, accretion expense and depreciation, depletion and amortization. Adjusted EBITDA is a non-GAAP financial measure equal to EBITDA less non-cash derivative loss (gain), acquisition expense and (income) loss from equity method investments. Cash flow from operating activities before changes in operating assets and liabilities is a non-GAAP financial measure equal to cash provided by operating activity before changes in operating assets and liabilities. Adjusted net income is a non-GAAP financial measure equal to pre-tax net income less non-cash derivative loss (gain), acquisition expense and (income) loss from equity method investments. The Company has presented EBITDA and adjusted EBITDA because it uses these measures as an integral part of its internal reporting to evaluate its performance and the performance of its senior management. These measures are considered important indicators of the operational strength of the Company's business and eliminate the uneven effect of considerable amounts of non-cash depletion, depreciation of tangible assets and amortization of certain intangible assets. A limitation of these measures, however, is that they do not reflect the periodic costs of certain capitalized tangible and intangible assets used in generating revenues in the Company's business. Management evaluates the costs of such tangible and intangible assets and the impact of related impairments through other financial measures, such as capital expenditures, investment spending and return on capital. Therefore, the Company believes that these measures provide useful information to its investors regarding its performance and overall results of operations. EBITDA, adjusted EBITDA, adjusted net income and cash flow from operating activities before changes in operating assets and liabilities are not intended to be performance measures that should be regarded as an alternative to, or more meaningful than, either net income as an indicator of operating performance or to cash flows from operating activities as a measure of liquidity. In addition, EBITDA, adjusted EBITDA, adjusted net income and cash flow from operating activities before changes in operating assets and liabilities are not intended to represent funds available for dividends, reinvestment or other discretionary uses, and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP. The EBITDA, adjusted EBITDA, adjusted net income and cash flow from operating activities before changes in operating assets and liabilities presented in this press release may not be comparable to similarly titled measures presented by other companies, and may not be identical to corresponding measures used in the Company's various agreements.

GULFPORT COMPANY OVERVIEW

PRIMARY AREAS OF OPERATION

Utica Shale
Acreage: ~215,000 Net Acres
YE 2017 Proved Reserves: 3.9 Net Tcfe
3Q2018 Net Production: 1,141.0 MMcfepd

SCOOP
Acreage: ~92,500 Net Reservoir Acres
YE 2017 Proved Reserves: 1.5 Net Tcfe
3Q2018 Net Production: 274.6 MMcfepd

KEY STATISTICS

Market Capitalization[1]	**$1.6 Billion**
Enterprise Value[2]	**$3.6 Billion**
Pro Forma Liquidity[3]	**~$748 Million**
2017 Average Daily Production	**1,089.2 MMcfepd**
1Q17	849.6 MMcfepd
2Q17	1,038.4 MMcfepd
3Q17	1,199.6 MMcfepd
4Q17	1,263.3 MMcfepd
2018E Average Daily Production	**1,360 – 1,370 MMcfepd**
1Q18	1,288.6 MMcfepd
2Q18	1,330.3 MMcfepd
3Q18	1,427.5 MMcfepd
Net Core Acreage	
Utica Shale	~215,000 acres
SCOOP[4]	~92,500 acres
Identified Gross Locations	
Utica Shale[5]	~1,200 gross locations
SCOOP	~1,950 gross locations

1. Market capitalization calculated as of the close of the market on 10/31/18 at a price of $9.11 per diluted share using shares outstanding from the Company's 3Q2018 financial statements.
2. Enterprise value calculated as of the close of the market on 10/31/18 at a price of $9.11 per diluted share using shares outstanding, short-term debt, long-term debt, and cash and cash equivalents from the Company's 3Q2018 financial statements.
3. Liquidity calculated as of 9/30/18 using borrowing base availability, letters of credit outstanding, cash and cash equivalents from the Company's 3Q2018 financial statements.
4. SCOOP acreage includes ~50,200 Woodford and ~42,300 Springer net reservoir acres.
5. Assumes net undeveloped locations grossed up from 75% working interest.

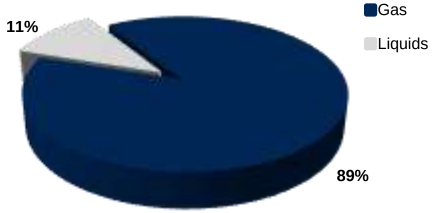
THIRD QUARTER 2018 HIGHLIGHTS

DAILY NET PRODUCTION

Increased 19% Y-o-Y

Produced ~1,427.5 MMcfe per day during 3Q2018

PRODUCTION MIX



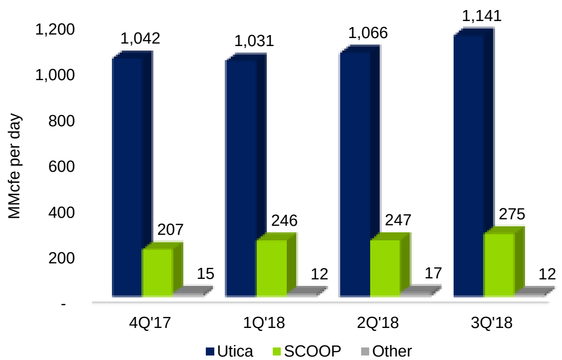
Production mix consisted of 89% gas and 11% liquids during 3Q2018

ADJUSTED EBITDA

Increased 22% Y-o-Y

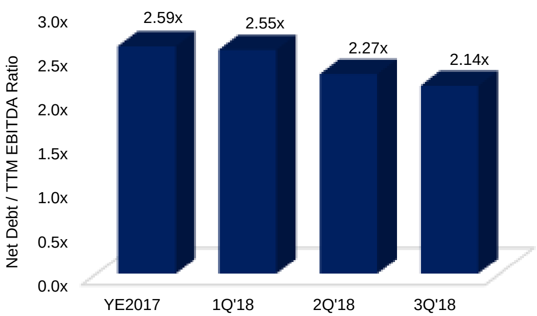
Totaled Approximately $238.8 million[(1)] during 3Q2018

DAILY NET PRODUCTION BY ASSET



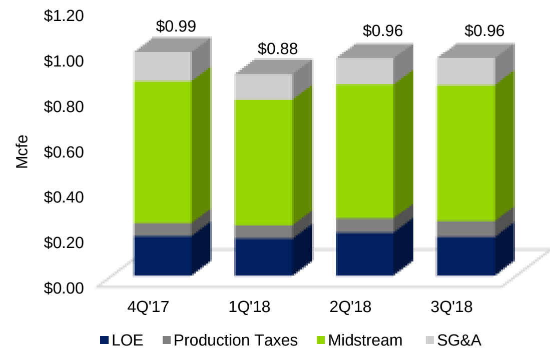
Production consisted of ~80% Utica, ~19% SCOOP and ~1% Other during 3Q2018

LEVERAGE METRICS



As of September 30, 2018, net-debt-to-TTM EBITDA improved to 2.14x

PER UNIT OPERATING EXPENSE



Per unit operating expense totaled $0.96 per Mcfe during 3Q2018

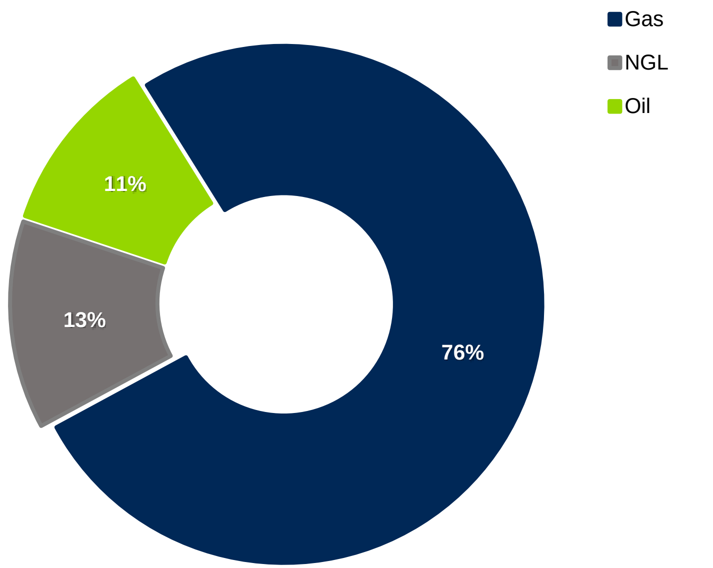
1. Adjusted EBITDA excludes the impact of the Company's non-cash derivative loss, litigation settlement, insurance proceeds and income from equity method investments during the third quarter of 2018.

STRONG PRICE REALIZATIONS EXPANDING MARGINS

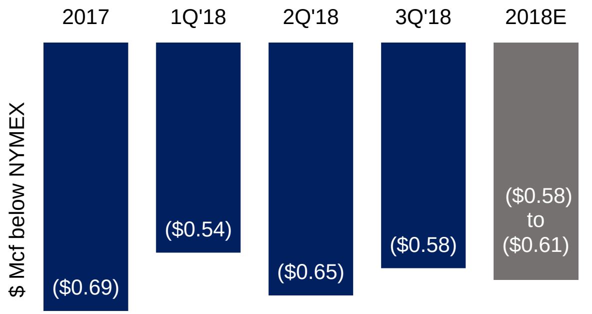
KEY HIGHLIGHTS

- For the nine-months September 30, 2018, Gulfport's strong realized prices and hedge position resulted in adjusted oil and gas revenues of $1.05 billion(1)
  - Composed of ~76% natural gas, ~13% natural gas liquids and ~11% oil
- Given the strength in pricing year-to-date, Gulfport updated its full-year 2018 natural gas and oil differential guidance:
  - Forecast to average in the range of $0.58 to $0.61 per Mcf below NYMEX settlement prices for natural gas in 2018
  - Expect to realize approximately $1.75 to $2.00 off WTI for oil during 2018
- Reiterate expectation for NGLs to realize 45% to 50% of WTI during 2018

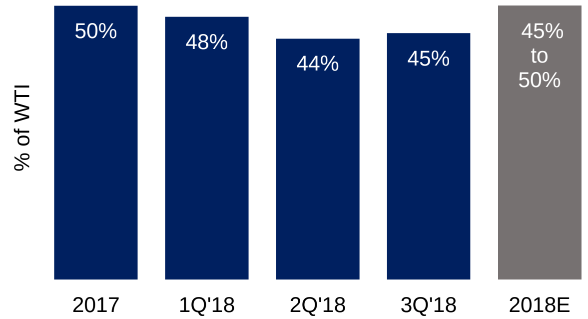
YEAR-TO-DATE 2018 OIL AND GAS REVENUES



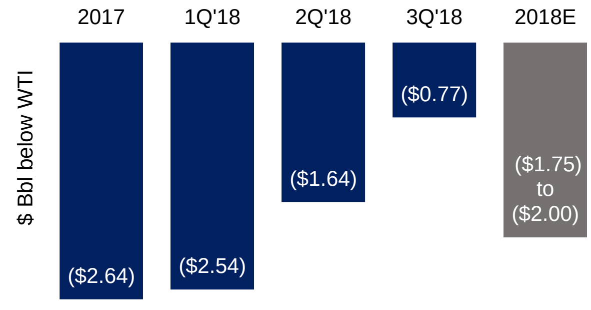
NATURAL GAS DIFFERENTIAL



NGL REALIZATIONS



OIL PRICE DIFFERENTIAL



1. Adjusted oil and natural gas revenues excludes the impact of the Company's non-cash derivative impact during 2018.

UPDATE ON 2018 STRATEGY AND OPERATIONAL PLANS

2018 INITIATIVES	THIRD QUARTER 2018 UPDATE
PRACTICE STRICT CAPITAL DISCIPLINE AND FUND 2018 CAPITAL PROGRAM WITHIN CASH FLOW	— 2018 D&C capital expenditures of $685 million and non-D&C capital expenditures of $130 million — Generated significant adjusted EBITDA during the nine-months ended September 30, totaling approximately $700.3 million — Reiterated full-year 2018 total capital program will be funded within cash flow
DELIVER STRONG ANNUAL PRODUCTION GROWTH WITHIN CASH FLOW	— 3Q2018 production averaged 1.43 Bcfepd, an increase of ~7% over second quarter 2018 and ~19% year-over-year — Driven by strong resource performance year-to-date, increased full-year 2018 production guidance to 1.36 to 1.37 Bcfepd, an increase of approximately 25% to 26% over full-year 2017
MAINTAIN A STRONG BALANCE SHEET AND FINANCIAL POSITION	— As of September 30, 2018, net-debt-to-TTM-EBITDA ratio decreased to 2.14 times and based on projected cash flows from the remainder of the year, at current strip prices forecasted leverage ratio at year-end 2018 will be at or below 2 times — Large hedge position providing certainty of cash flows
REALIZE VALUE WITH AVAILABLE LIQUIDITY	— Authorized to acquire up to $200 million of outstanding common stock during 2018 and approximately $90 million remains under the current authorization — Reduced amount outstanding on Gulfport’s revolving credit facility to $60 million and held $125 million in cash on the balance sheet — Will continue to consider all options, including additional share repurchases and debt reduction, remaining disciplined and demonstrating the Company’s commitment to shareholders with every dollar invested

UPDATED GULFPORT 2018 GUIDANCE

2018E CAPITAL BUDGET

	Year Ending 12/31/2018	
Forecasted Production		
Average Daily Gas Equivalent – MMcfepd	1,360	1,370
% Gas	~89%	
% NGLs	~7%	
% Oil	~4%	
Forecasted Realizations (before the effects of hedges)[1]		
Natural Gas (Differential to NYMEX) - $ per Mcf	($0.58)	($0.61)
NGL (% of WTI)	45%	50%
Oil (Differential to NYMEX WTI) - $ per Bbl	($1.75)	($2.00)
Projected Operating Costs		
Lease Operating Expense - $/Mcfe	$0.17	$0.19
Production Taxes - $/Mcfe	$0.06	$0.08
Midstream Gathering and Processing - $/Mcfe	$0.57	$0.63
General and Administrative[2] - $/Mcfe	$0.12	$0.14
Depreciation, Depletion, and Amortization - $/Mcfe	$0.95	$1.05
Budgeted D&C Capital Expenditures – in Millions:	$685	
Budgeted Non-D&C Capital Expenditures – in Millions:	$130	
Total Budgeted Capital Expenditures – in Millions:	$815	

2018E FORECASTED ACTIVITY

	Year Ending 12/31/2018
Net Wells Drilled	
Utica – Operated	20
Utica – Non – Operated	7
Total	27
SCOOP – Operated	13
SCOOP – Non - Operated	3
Total	16
Net Wells Turned-to-Sales	
Utica – Operated	35
Utica – Non - Operated	10

SCOOP – Operated	12
SCOOP – Non - Operated	4
Total	16

1. Based upon current forward pricing and basis marks.
2. Includes non-cash stock compensation.

Note: Guidance for the year ending 12/31/18 is based on multiple assumptions and certain analyses made by the Company in light of its experience and perception of historical trends and current conditions and may change due to future developments. Actual results may not conform to the Company's expectations and predictions. Please refer to page 2 for more detail of forward looking statements.

GULFPORT 2018 CAPITAL EXPENDITURES GUIDANCE

KEY HIGHLIGHTS

- Gulfport forecasts total capital expenditures, including both D&C and non-D&C capital, to be approximately $815 million during 2018
- Capital spend is forecasted to decrease significantly during the fourth quarter of 2018
- Gulfport's planned activity during the fourth quarter of 2018 emphasizes the commitment to capital discipline and the 2018 capital budget
  - Currently not running any operated drilling rigs in the Utica Shale
  - Currently have two operated drilling rigs active in the SCOOP
  - Completion activity has concluded in both the Utica Shale and SCOOP and Gulfport plans to turn-to-sales seven net operated wells during the fourth quarter of 2018

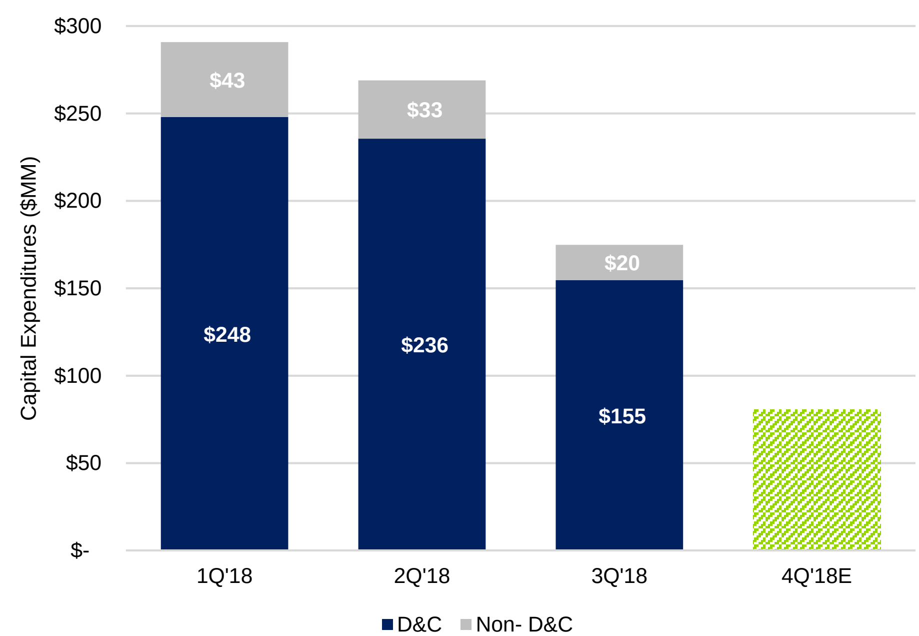
2018E WELL COUNT

Total Well Counts (Net)	1Q'18	2Q'18	3Q'18	4Q'18E
Drilled	18.2	13.3	9.0	2.1
Turn-to-sales	12.8	16.4	21.4	11.0

Operated Well Count (Net)	1Q'18	2Q'18	3Q'18	4Q'18E
Drilled	13.8	10.5	6.3	2.0
Turn-to-sales	9.3	14.5	16.8	7.0

Non-Operated (Net)	1Q'18	2Q'18	3Q'18	4Q'18E
Drilled	4.4	2.8	2.7	0.1
Turn-to-sales	3.5	1.9	4.6	4.0

2018E CAPITAL SPEND



2018 ACTIVITY ECONOMIC FOCUS

- Plan to focus Utica Shale activity in the dry gas windows and SCOOP activity in the wet gas window of the play
- Allocation of capital split between two top-tier basins with dry gas and liquids inventory

SCOOP SINGLE WELL ECONOMICS(1,2)

	Woodford Dry Gas	Woodford Wet Gas	Woodford Condensate	Springer Gas Condensate	Springer Oil
Gross Undeveloped Locations	444	642	350	238	300
Net Undeveloped Locations	84	230	30	82	64

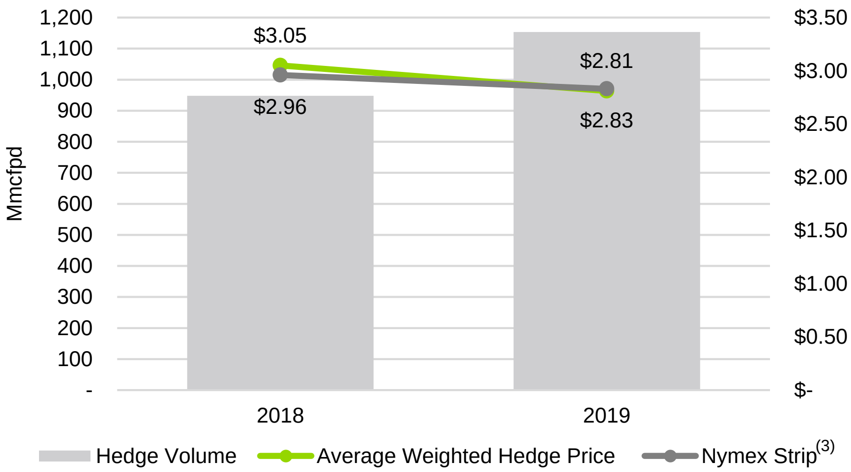
UTICA SINGLE WELL ECONOMICS(1,2)

	Condensate West	Condensate East	Wet Gas	Dry Gas West	Dry Gas Central	Dry Gas East
Gross Undeveloped Locations(3)	129	73	114	181	441	259
Net Undeveloped Locations	97	54	86	135	331	194

1. Assumes ethane rejection.
2. Well economics are adjusted for transport fees and regional price differentials.
3. Assumes net undeveloped locations grossed up from 75% working interest.

STRONG LIQUIDITY, CAPITALIZATION AND HEDGE POSITION

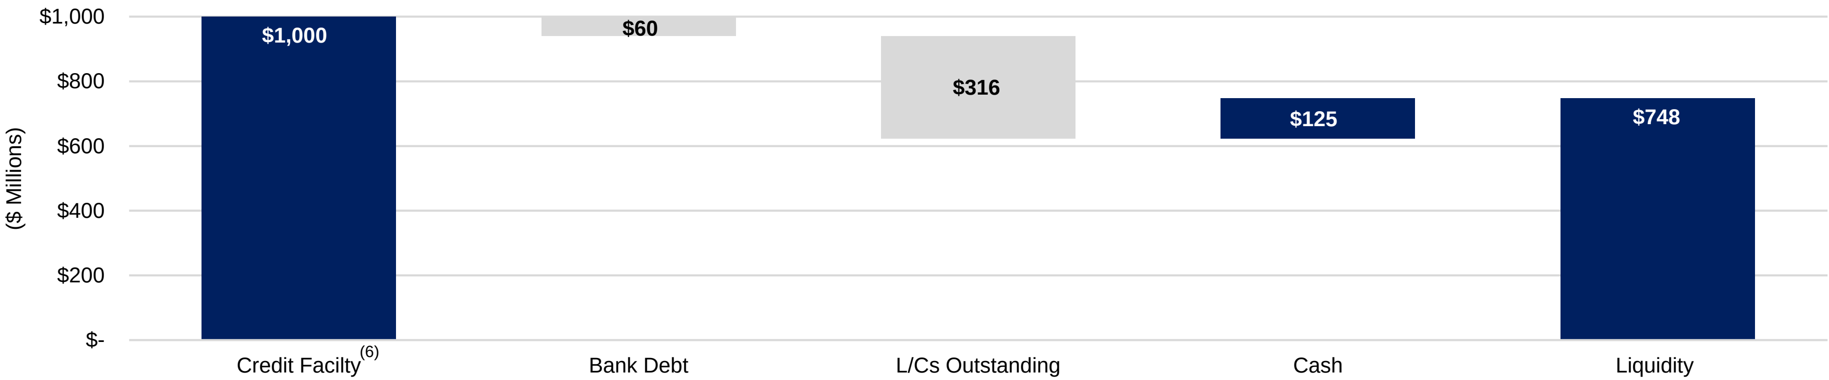
GAS HEDGES(1)



KEY HIGHLIGHTS

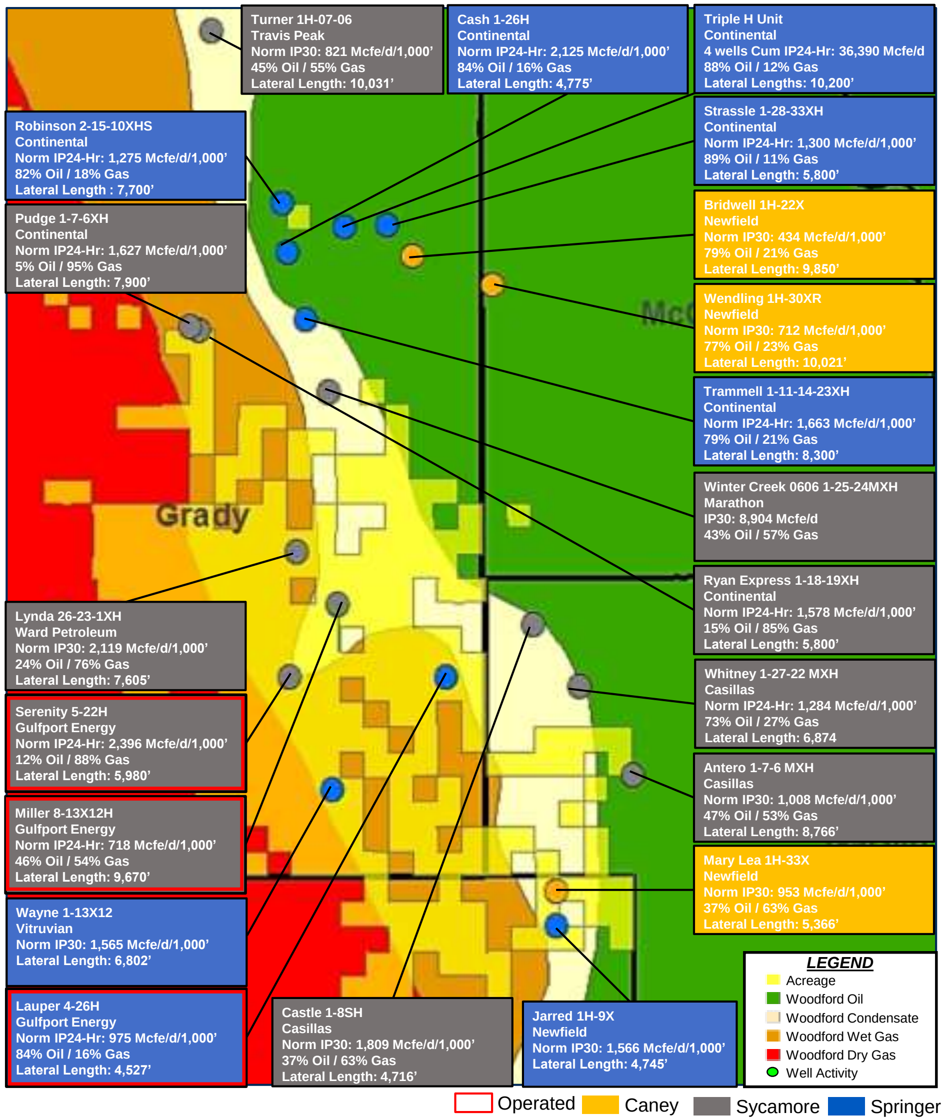
- In 2018, Gulfport is committed to a disciplined capital program within cash flow for the calendar year
  - At strip pricing(2), Gulfport forecasts full-year 2018 total capital program to be funded within cash flow while growing production approximately 25% to 26% in 2018 over 2017
- Gulfport's hedge portfolio underpins its capital program, providing a high degree of certainty surrounding the Company's cash flow profile
  - ~80%(5) of expected natural gas production hedged in 2018, totaling 948 BBtu per day at $3.05 per MMBtu
  - Large base load of natural gas production hedged in 2019, totaling 1,154 BBtu per day at $2.81 per MMBtu
- As of September 30, 2018, Gulfport's net-debt-to-TTM-EBITDA ratio decreased to 2.14x
  - Gulfport holds a ~22% interest in Mammoth Energy Services, totaling ~9.8 million shares valued at ~$250 million(7)

LIQUIDITY POSITION(4)



1. Hedge volume and weighted average price excludes swaptions. Detailed overview in appendix of the presentation.
2. Price forecast as of 11/1/18.
3. Price forecast as of 10/31/18.
4. Liquidity calculated as of 9/30/18 using borrowing base availability, letters of credit outstanding, cash and cash equivalents from the Company's 3Q2018 financial statements.
5. Based on the midpoint of 2018 guidance.
6. The Company's borrowing base totals $1.4 billion with elected commitments of $1.0 billion.
7. Gulfport holds ~9.8 million shares of Mammoth Energy Services and calculated as of the close of the market on 10/31/18 at a price of $24.96 per share.

SCOOP – UPSIDE POTENTIAL IN EMERGING ZONES



OVERVIEW

— The Sycamore formation is age equivalent to the Meramec and Osage being developed in the STACK and is located between the organic-rich Woodford and Caney Shales
  – ~250 feet thick across the acreage position, presenting a significant future development target
  – Encouraged by the recent activity near Gulfport's acreage position
  – Gulfport holds in excess of ~40,000 net reservoir acres prospective in the Sycamore

— The Caney Formation is Maramecian in age and is the stratigraphic equivalent of the Barnett Shale that has been developed in the Fort Worth Basin
  – Organic rich black shale with a high source rock potential
  – ~100 feet thick across the acreage position and directly overlies the Sycamore Formation
  – Highly productive wells in the southern Ardmore basin

— The Springer formation is an organic rich shale interval that has thus far been predominately oil productive
  – Strata contains several laterally extensive siliceous black shales that possess highly connected organic pores
  – Recent results have shown strong production and suggest high repeatability
  – Gulfport holds ~42,300 net reservoir acres in the Springer

— During 2017, Gulfport tested both the Springer and lower Sycamore zones on its acreage

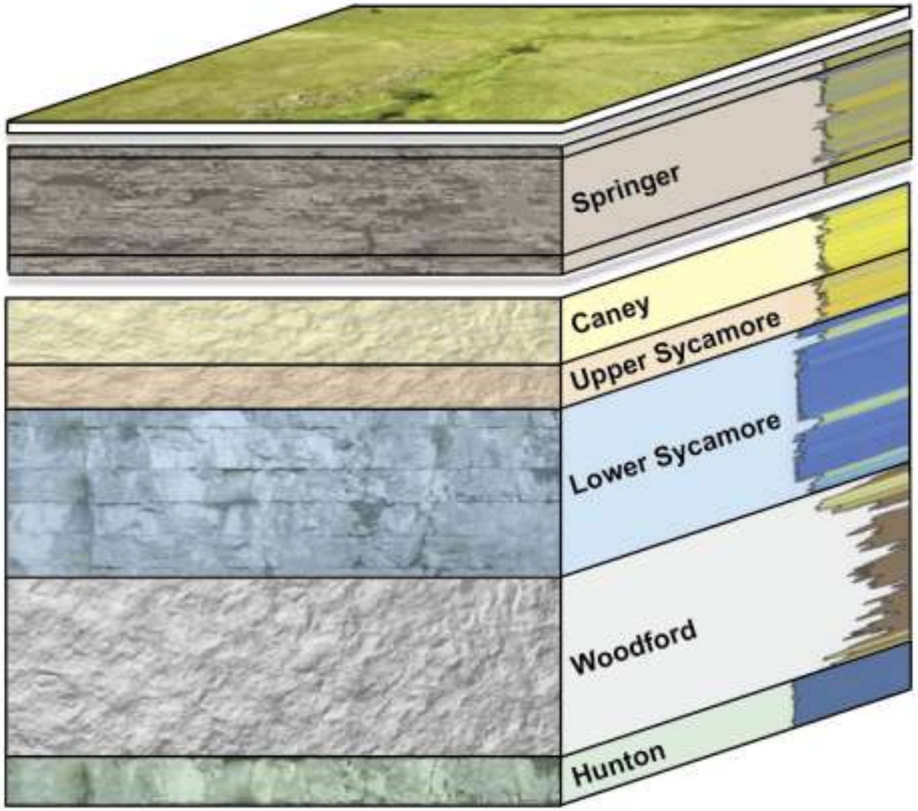
— During the third quarter of 2018, Gulfport turned to sales a Sycamore well, targeting the upper portion of the Sycamore formation
  – The well had a strong liquids cut, confirming Gulfport's expectation of the upper Sycamore's potential for being a more liquids rich resource

Source: Company provided data and publicly available information. All well results presented on this slide are based upon two-stream production data.

SCOOP – FULL SECTION DEVELOPMENT

OVERVIEW

- During 2018, Gulfport shifted its program in the SCOOP to largely focus on full section development, both in the drilling and completion phases of the operations
  - In the drilling phase of the operations, full section development yields beneficial results, taking learnings from the appraisal well and applying it to the remainder of the well set in the section, driving performance increases and decreasing drill days well over well
  - In the completion and production phase of the operations, wells completed within the full section regime benefit from increased well bore connectivity and fracture complexity
- During 2017, Gulfport codeveloped a well targeting the lower Sycamore formation in conjunction with a Woodford wet gas well
  - Results-to-date indicate strong well performance
  - Normalizing to the Woodford wet gas type curve, during the initial 300 days online, the lower Sycamore well has cumulatively produced approximately 80% above the type curve and the Woodford wet gas well has cumulatively produced well over 100% above the type curve
- Gulfport plans to include the Sycamore in its development plan in a more meaningful way during 2019, transitioning from exploration to repeatable, low-risk development in the zone
  - Currently plan to codevelop a unit as part of the 2019 program, developing the Woodford, lower Sycamore and upper Sycamore simultaneously



KEY INVESTMENT AND FINANCIAL HIGHLIGHTS

HIGH QUALITY ASSETS

- Core acreage positions in two of the most prolific, high-quality natural gas plays in North America
  - Basin diversification provides optionality to allocate capital across two premier assets
  - Significant inventory in two lost cost basins with low well breakeven economics and IRRs in excess of 50%(1)
- Significant exposure to the core of the Utica Shale with approximately 215,000 net acres under lease
  - Development expected to provide further catalyst for reserves and production growth
- Low-risk, highly contiguous SCOOP acreage with approximately 92,500(2) net reservoir acres in the core of the play
  - Stacked-pay zones provide significant upside
  - Liquids exposure in attractive market complements production base, enhances cash margins and provides drilling optionality from dry gas to liquids rich wet gas

FINANCIAL PHILOSOPHY & HEDGE POSITION

- Committed to maintaining a strong balance sheet and financial discipline in 2018 and beyond
  - Liquidity of ~$748 million(3)
  - As of September 30, 2018, Gulfport's net-debt-to-TTM-EBITDA ratio decreased to 2.14x
  - Reduced amount outstanding on Gulfport's revolving credit facility to $60 million and held $125 million in cash on the balance sheet
  - Gulfport holds a ~22% interest in Mammoth Energy Services, totaling ~9.8 million shares valued at ~$250 million(4)
- Gulfport hedges a portion of its expected production to lock in prices and returns, providing certainty of cash flows to execute on its capital plans
  - Gulfport has ~80%(5) of 2018E natural gas production hedged, totaling 948 BBtu per day at $3.05 per MMBtu and a large portion of its 2019E natural gas production hedged, totaling 1,154 BBtu per day at $2.81 per MMBtu
  - Company has historically targeted hedging 50% to 70% of expected twelve-month run rate total production

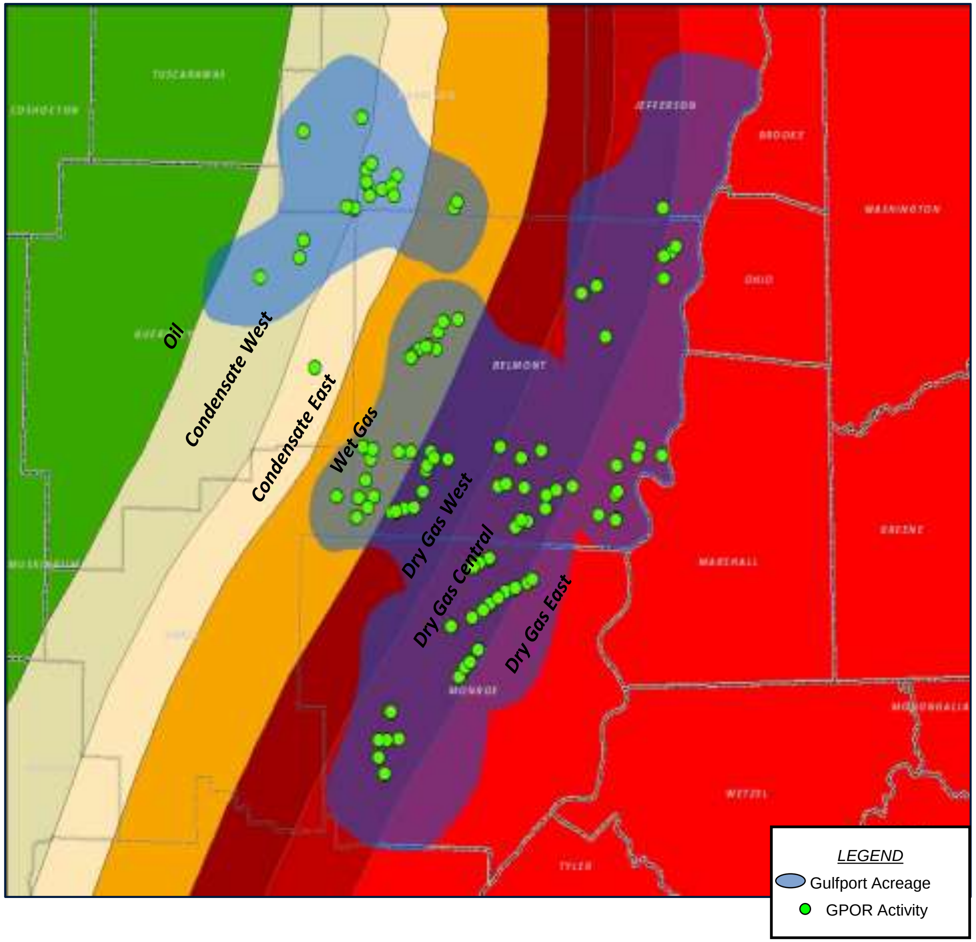
FOCUSED ON MAXIMIZING SHAREHOLDER VALUE

- In 2018, Gulfport is dedicated to strict capital discipline and is in the position to be able to generate strong production growth within cash flow for its shareholders
  - Based on current strip pricing(6), Gulfport forecasts its full-year 2018 total capital program to be funded entirely within cash flow while growing production approximately 25% to 26% over 2017
- Gulfport has repurchased $110(7) million of its outstanding common stock in the open market, totaling approximately 10.5 million shares
  - Gulfport is authorized to acquire up to $200 million of its outstanding common stock during 2018 and approximately $90 million remains under the current authorization

1. Well economics assume a flat price case of $3.00 / MMBtu gas, $60.00 / Bbl oil, and are adjusted for transport fees and regional price differentials.
2. SCOOP acreage includes ~50,200 Woodford and ~42,300 Springer net reservoir acres.
3. Liquidity calculated as of 9/30/18 using borrowing base availability, letters of credit outstanding, cash and cash equivalents from the Company's 3Q2018 financial statements.
4. Gulfport holds ~9.8 million shares of Mammoth Energy Services and calculated as of the close of the market on 10/31/18 at a price of $24.96 per share.
5. Based on the midpoint of 2018 guidance.
6. Price forecast as of 11/1/18.
7. As of November 1, 2018.

UTICA ASSET OVERVIEW

UTICA SHALE OVERVIEW



ASSET OVERVIEW

- Net proved reserves of 3.9 Tcfe[(1)]
- ~215,000 net acres
  - Oil - ~1%
  - Condensate - ~10%
  - Wet Gas - ~13%
  - Dry Gas - ~76%

2018 ACTIVITIES UPDATE[(2)]

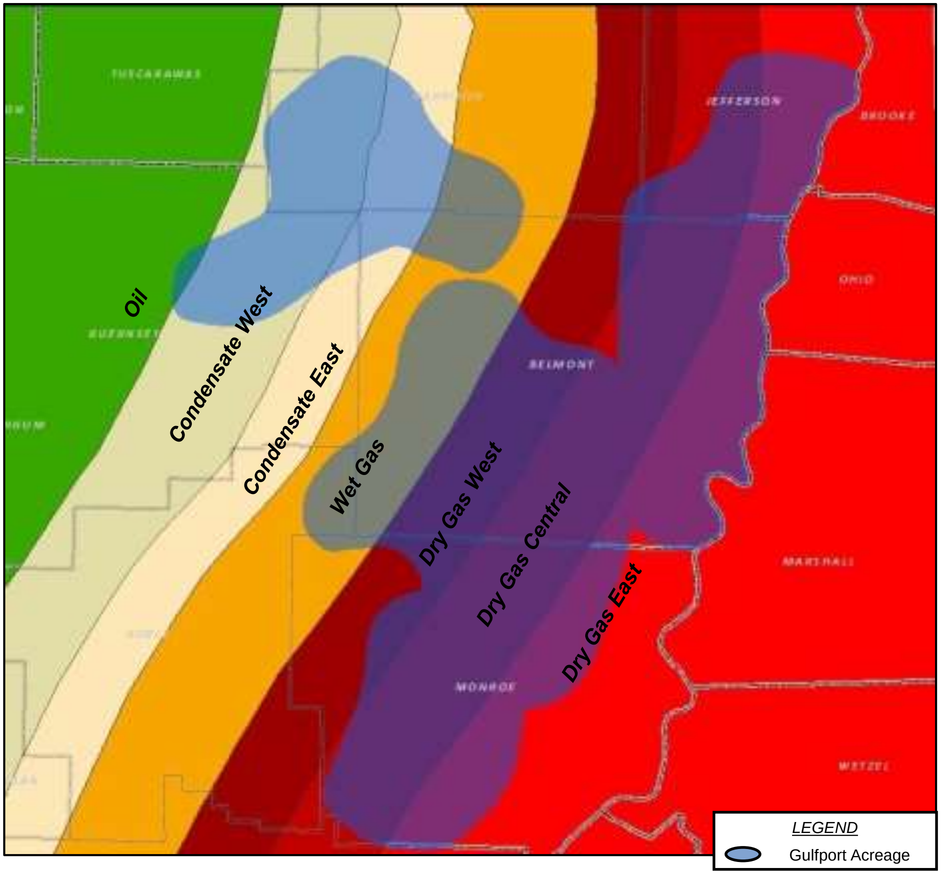
- Average net production of 1,141.0 MMcfepd
- ~80% of Gulfport's total net production

2018 PLANNED ACTIVITIES[(3)]

- Operated Activity
  - Drill 20 net wells
  - Turn-to-sales 35 net wells
- Non-Operated Activity
  - Drill 7 net wells
  - Turn-to-sales 10 net wells

Note: Please refer to page 2 for detail on forward looking statements.
1. As of 12/31/17.
2. During the three months ended 9/30/18.
3. As of 11/1/18.

UTICA SHALE – TYPE CURVE ASSUMPTIONS



Type Curve Assumptions[1]	Condensate West	Condensate East	Wet Gas	Dry Gas West	Dry Gas Central	Dry Gas East

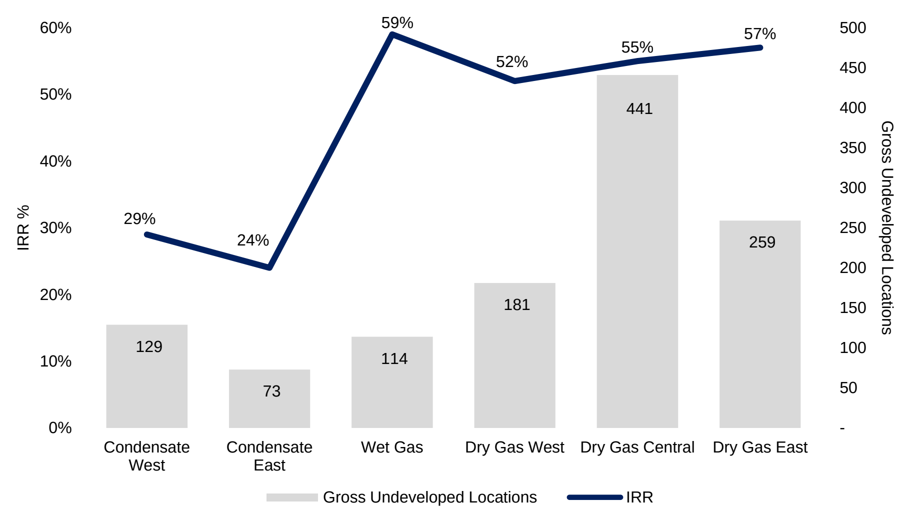
UTICA SINGLE WELL ECONOMICS[1, 2]



Note: See appendix slide 27 for detailed assumptions used to generate single well IRRs.
1. Assumes ethane rejection.
2. Well economics assume a flat price case of $3.00 / MMBtu gas, $60.00 / Bbl oil, and are adjusted for transport fees and regional price differentials.
3. Assumes net undeveloped locations grossed up from 75% working interest.

UTICA SHALE – OVERVIEW OF FIRM PORTFOLIO

KEY HIGHLIGHTS

- Gulfport was a first-mover in securing early access to premium Midwest markets and transport at low costs out of the basin
- Expanded the firm portfolio as production grew with focus on delivery point diversity and associated costs
- As anticipated, the numerous capacity projects put into service to date has led to a structural improvement in local differentials, advantaging Gulfport as our incremental growth volumes price into a basis tightening, local market

UTICA SHALE – OVERVIEW OF BASIN TAKEAWAY

KEY HIGHLIGHTS

- The Marcellus and Utica have seen a significant amount of takeaway come online over the past several years
  - Since 2015, there has been over 17 Bcfpd of takeaway capacity put into service
- In addition, approximately 10 Bcfpd of takeaway projects from this region are anticipated to be put in service between now and year end 2020

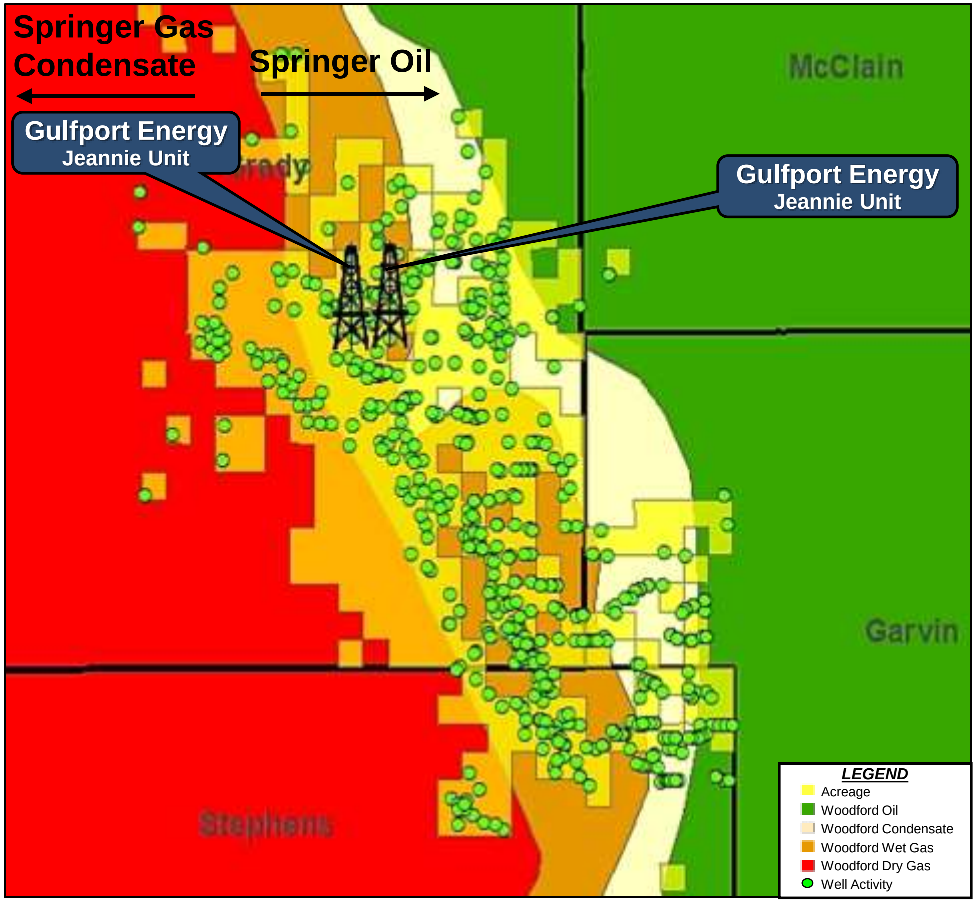
1. Morgan Stanley Commodities Research, "Northeast Pipeline Export Capacity," October 2018. Utilizes Company data, Bentek Energy, and Morgan Stanley Commodities Research. See appendix slide 33 for detail.
2. Pipeline project in service date questionable.

SCOOP ASSET OVERVIEW

SCOOP OVERVIEW



ASSET OVERVIEW

- Net proved reserves of 1.5 Tcfe[1]
- ~92,500 net reservoir acres
  - Includes ~50,200 net Woodford acres and ~42,300 net Springer acres
- Estimate in excess of 40,000 net acres prospective for Sycamore

2018 ACTIVITIES UPDATE[2]

- Average net production of 274.6 MMcfepd
  - ~66% natural gas, 24% natural gas liquids and 10% oil
- ~19% of Gulfport's total net production

2018 PLANNED ACTIVITIES[3]

- Currently running 2 gross operated rigs
- Operated Activity
  - Drill 13 net wells
  - Turn-to-sales 12 net wells
- Non-Operated Activity
  - Drill 3 net wells
  - Turn-to-sales 4 net wells

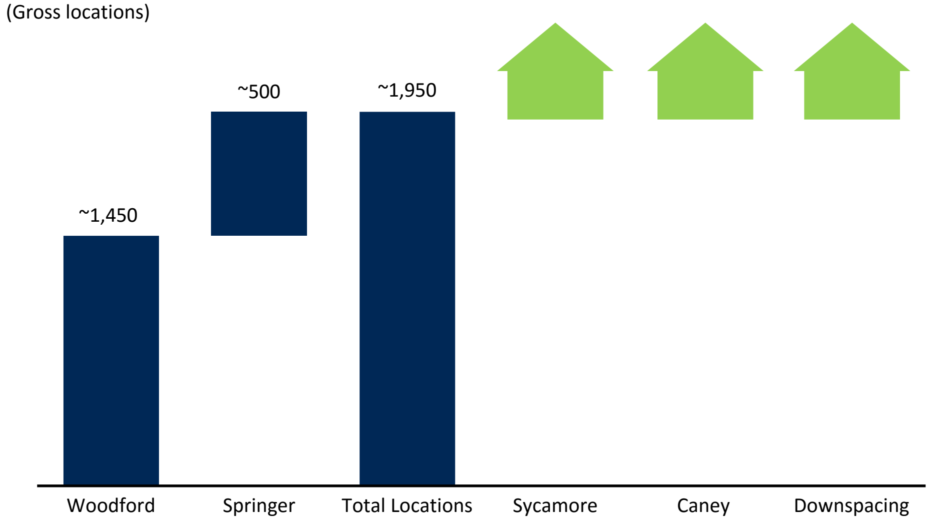
Note: Please refer to page 2 for detail on forward looking statements.
1. As of 12/31/17.
2. During the three months ended 9/30/18.
3. As of 11/1/18.

SCOOP – LARGE STACKED MULTI-PAY INVENTORY

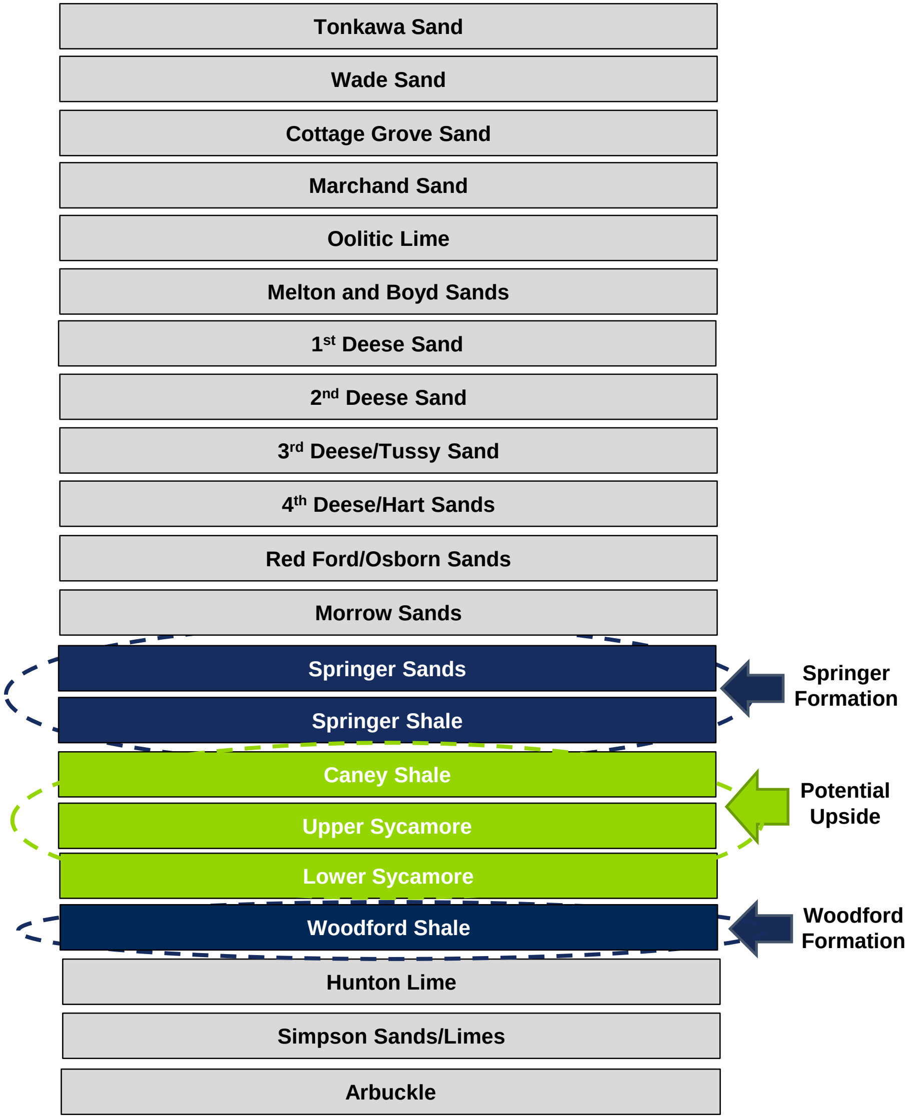
OVERVIEW

- 50,200 net surface acres located in the heart of the SCOOP condensate and over-pressured gas windows with exposure to stacked pay zones
  - ~1,450 gross identified locations in the Woodford formation
  - ~500 gross identified locations in the Springer formation
  - Additional upside from Sycamore, Caney and downspacing
- Decades of identified drillable locations with significant upside potential
- Highly delineated play with high well and seismic control
  - Approximately 3,000 producing wells
  - Well understood reservoir dynamics and geological characteristics

SIGNIFICANT INVENTORY



Formation Overview



SCOOP – TYPE CURVE ASSUMPTIONS

	Woodford			Springer

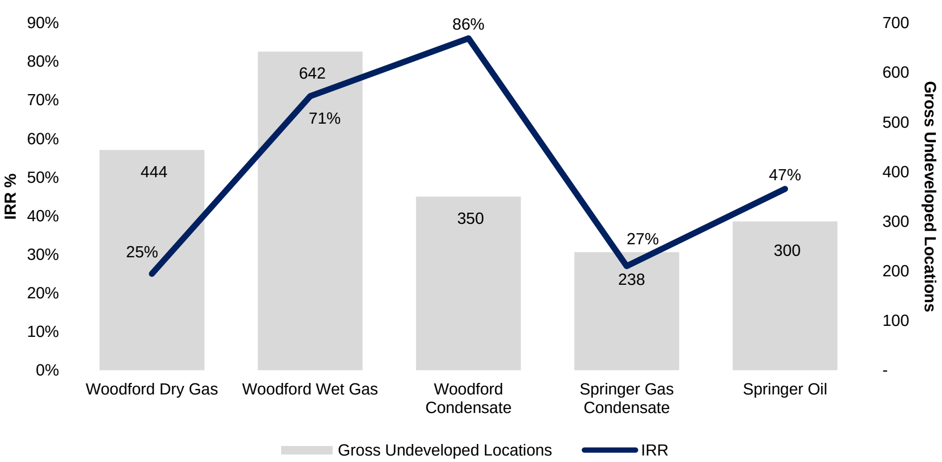
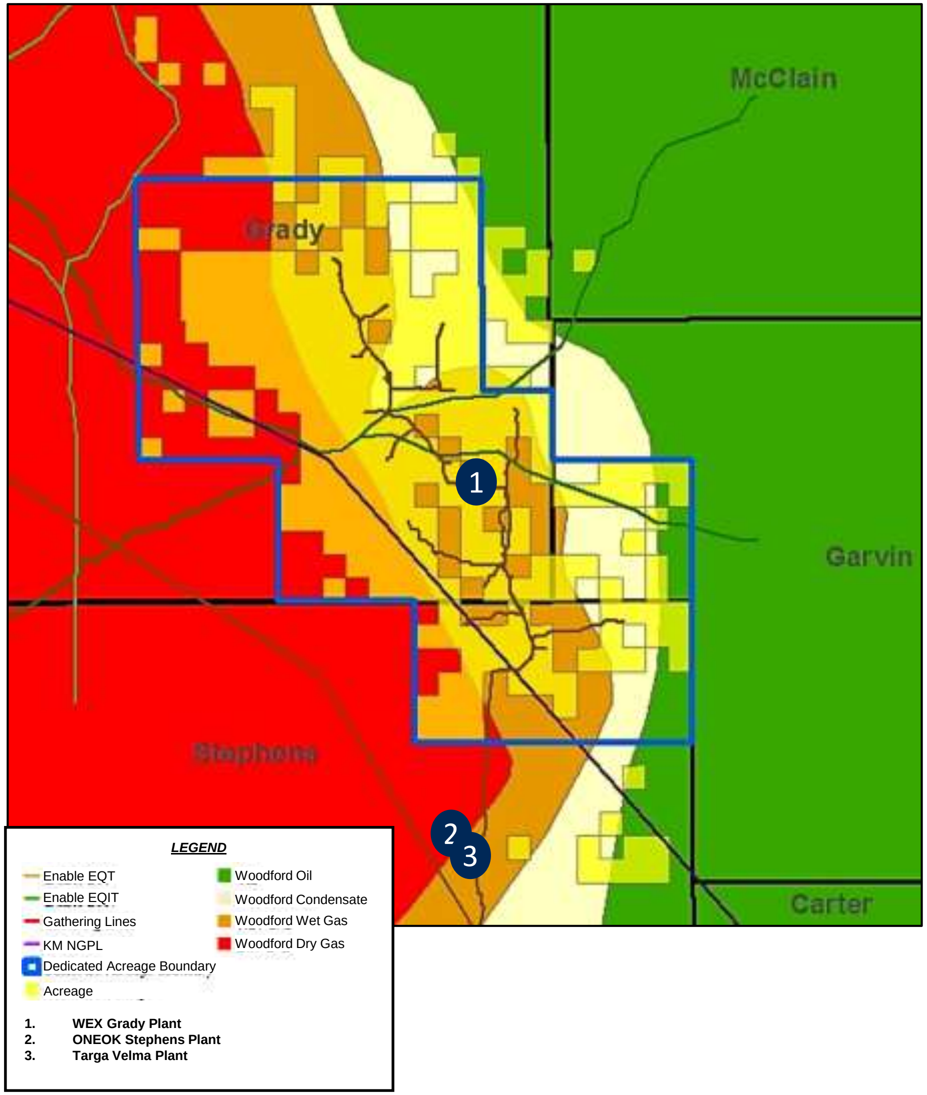
Total Identified Net Locations	84	230	30	82	64

SCOOP SINGLE WELL ECONOMICS[1, 2]



Note: See appendix slide 35 for detailed assumptions used to generate single well IRRs.
1. Assumes contractual ethane recovery.
2. Well economics assume a flat price case of $3.00 / MMBtu gas, $60.00 / Bbl oil, and are adjusted for transport fees and regional price differentials.



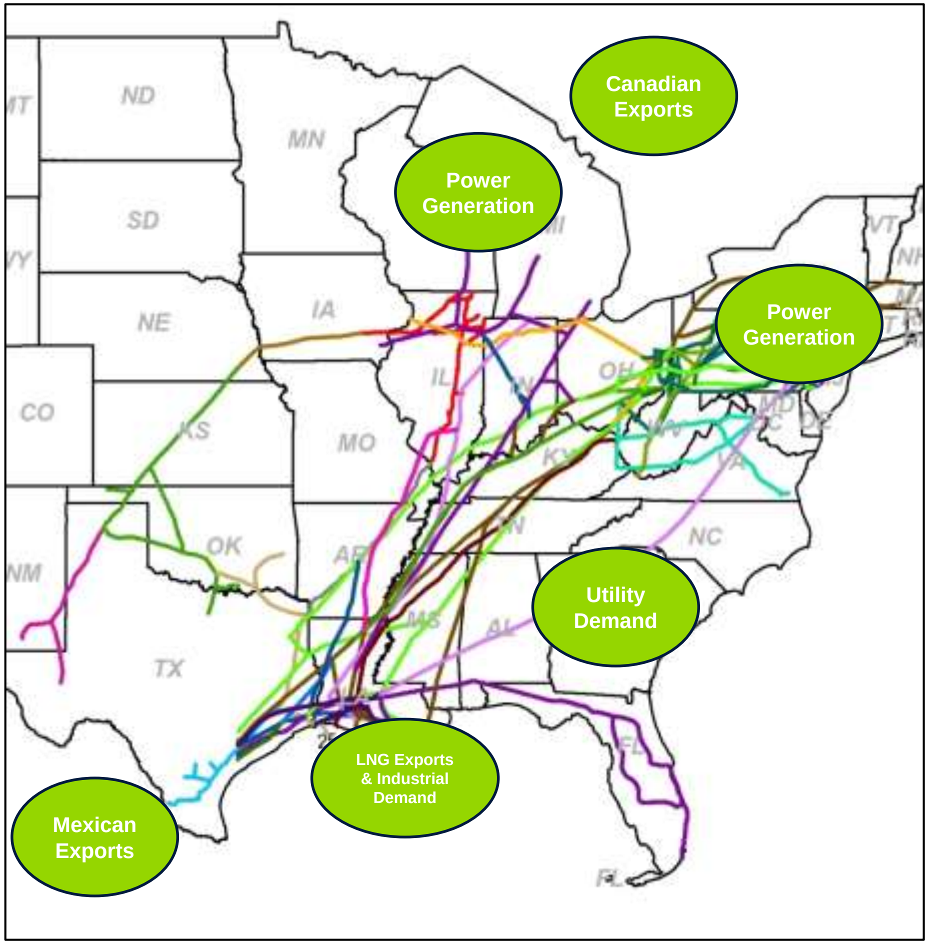
KEY HIGHLIGHTS

- Acreage dedication arrangement for all horizontal development to Woodford Express ("WEX") for gathering and processing
  - Competitive gathering and processing contracts with fixed fees, fuels and recoveries
- Gathering overview:
  - Recently laid 16" and 20" trunk lines throughout the dedication area
  - Operating pressure no greater than 600# at the pad
- Processing overview:
  - Primary connection to WEX Grady Plant
    - Recently expanded to 410 MMcfpd processing capacity
    - Additional connections to Enable, ONEOK and Targa processing plants
- Takeaway overview:
  - Residue Gas: Enable, EOIT, EGT and NGPL (will also include Midship in mid-2019)
  - NGLs: DCP and ONEOK

SCOOP – MARKETING OVERVIEW

KEY HIGHLIGHTS

- Building a diversified gas takeaway portfolio
  - Gulfport holds firm transportation into connecting pipes with multiple deliveries including Bennington, Perryville and points further into the Gulf
  - Firm sales and pricing flexibility offer a combination of pricing locations
  - Takeaway complements our existing Gulf Coast firm transport out of the Utica
  - Gulfport is a foundation shipper on Cheniere's Midship Pipeline with a commitment of 300,000 MMBtupd
- Low cost supply basin centrally located and advantaged by proximity to growing demand centers in the Gulf Coast regions
  - LNG
  - Mexican Exports
  - Industrial Demand
  - Increasing power generation and utility loads
- Asset base located closer to physical hubs which typically set benchmark pricing
  - Henry Hub for natural gas
  - Mont Belvieu for NGLs
  - Cushing for crude
- Favorable transport costs via pipe, rail or truck to these premium markets
- Provides diversity risk by increasing liquids exposure, which provides uplift to realized pricing and enhances corporate margins

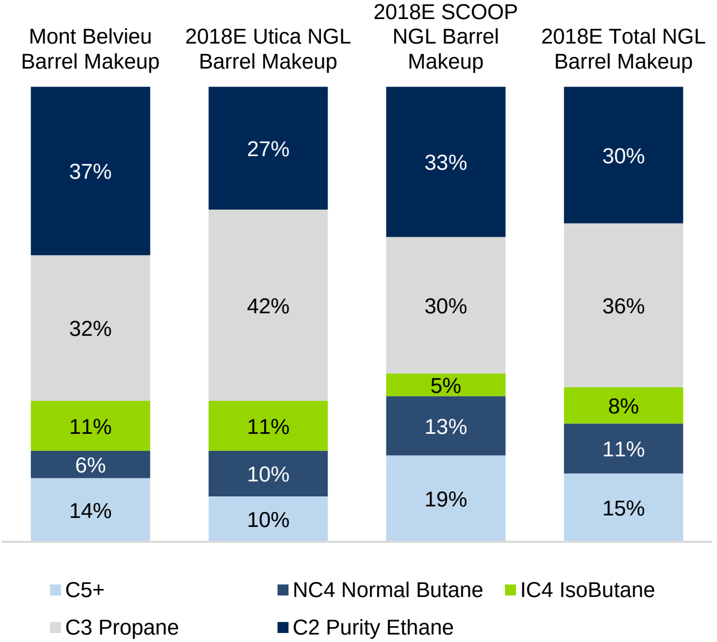


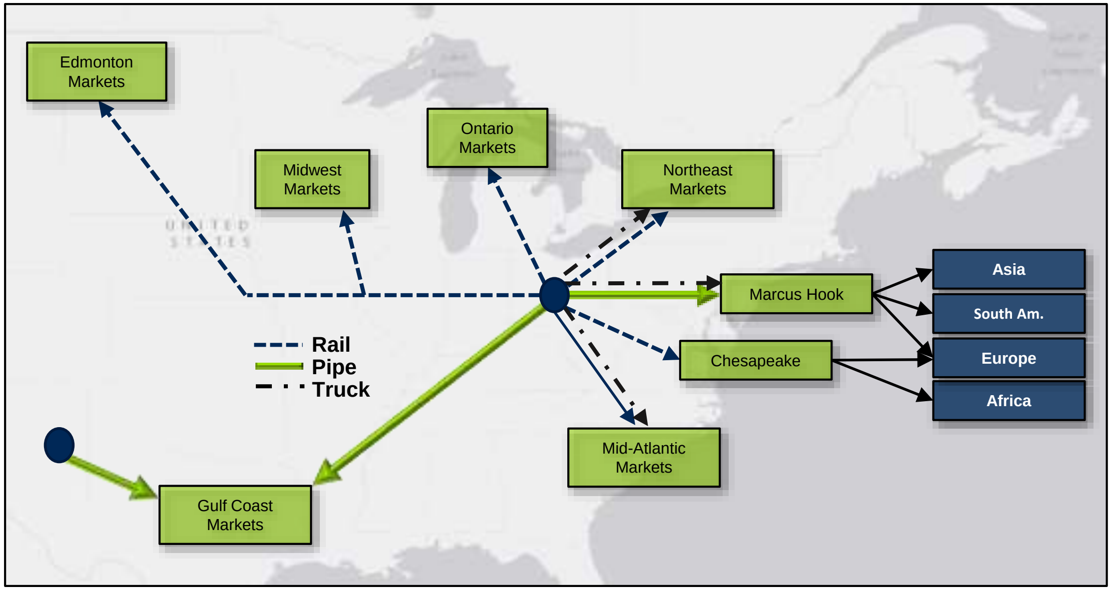
NGL MARKETING OVERVIEW

KEY HIGHLIGHTS

- Gulfport forecasts realizing approximately 45% to 50% of WTI for NGLS during 2018
- SCOOP barrel provides a strong baseload with pipeline access to Mont Belvieu, while Utica purity products provide clarity into market dynamics
- Increased access to pipe provides additional reliability to Gulfport's NGL distribution network

NGL BARREL COMPOSITION





KEY INFRASTRUCTURE PROGRESS IN NE

- Pipelines in service or being constructed to move product to market include:
  - Mariner West – ~50 Mbpd ethane takeaway to Canada put into service 2013
  - Mariner East 1 – ~75 Mbpd ethane/propane takeaway to Marcus Hook put into service 2014
  - ATEX – ~145 Mbpd ethane takeaway to Mont Belvieu put into service 2014
  - Utopia – ~50 Mbpd ethane takeaway to Ontario put into service January 2018
  - Mariner East 2 – ~275 Mbpd propane/butane takeaway to Marcus Hook and initial capacity estimated to be in service by 4Q18
- In addition, demand infrastructure in-basin continues to progress as plants come to service:
  - Shell Chemical's ~1.6 Mtpa polyethylene cracker to be in service 2020/2021
  - PTT Global ~1.5 Mtpa ethylene cracker with FID in 2018

SINGLE WELL ECONOMICS[1]

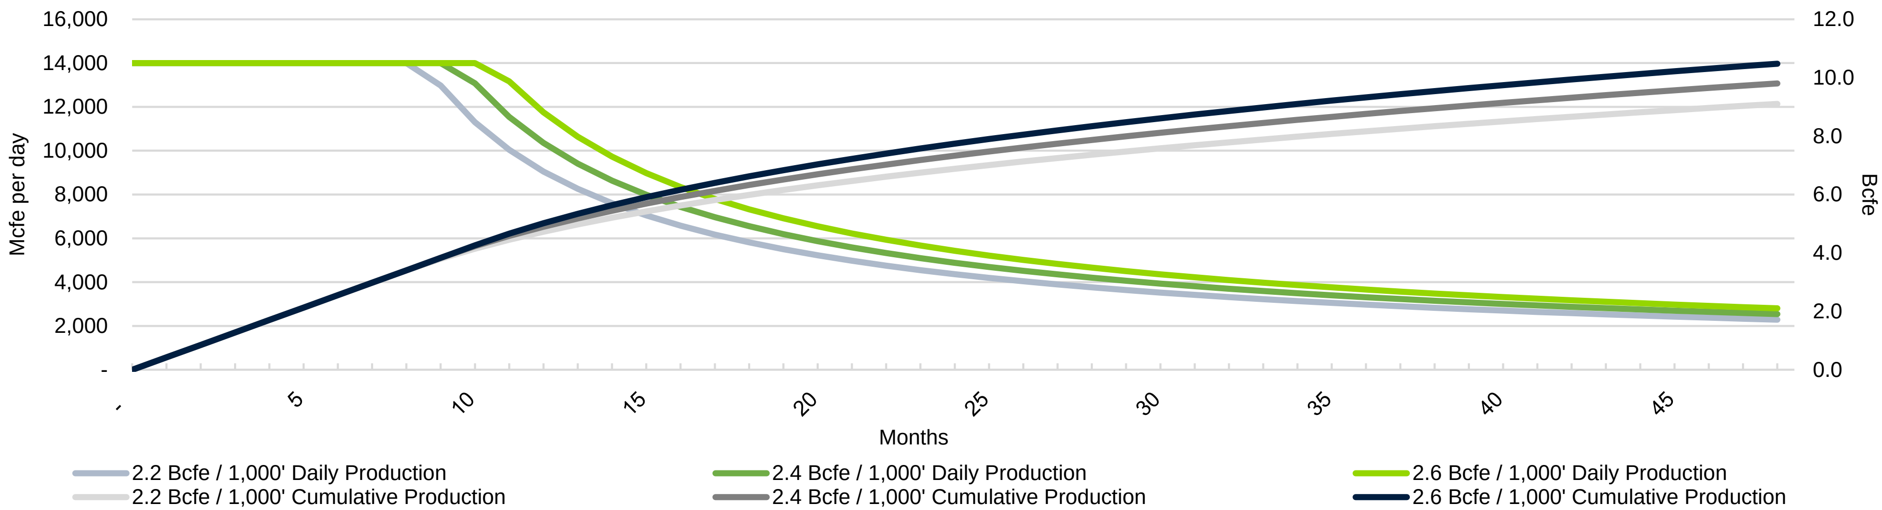
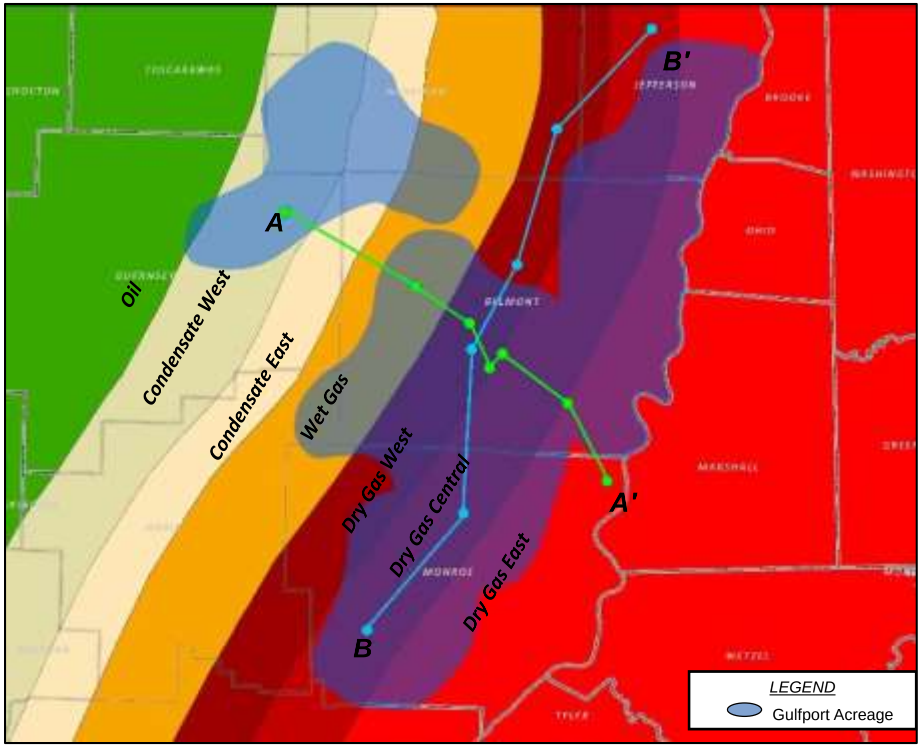
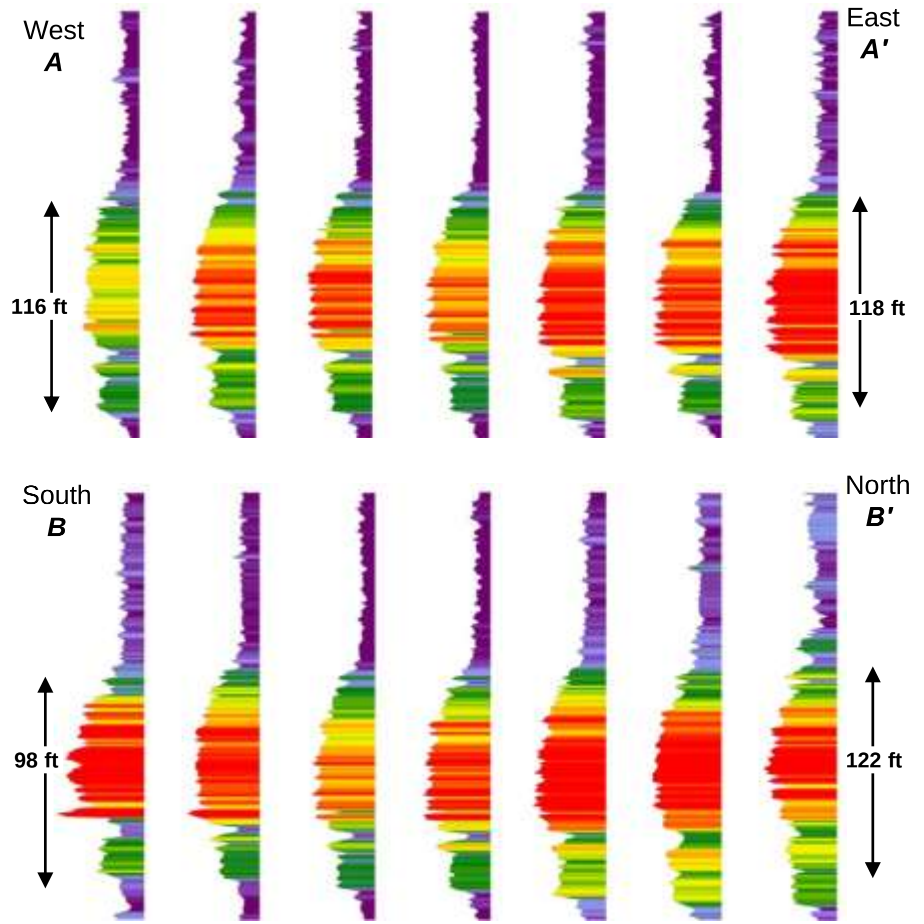
DRY GAS TYPE CURVES[1]



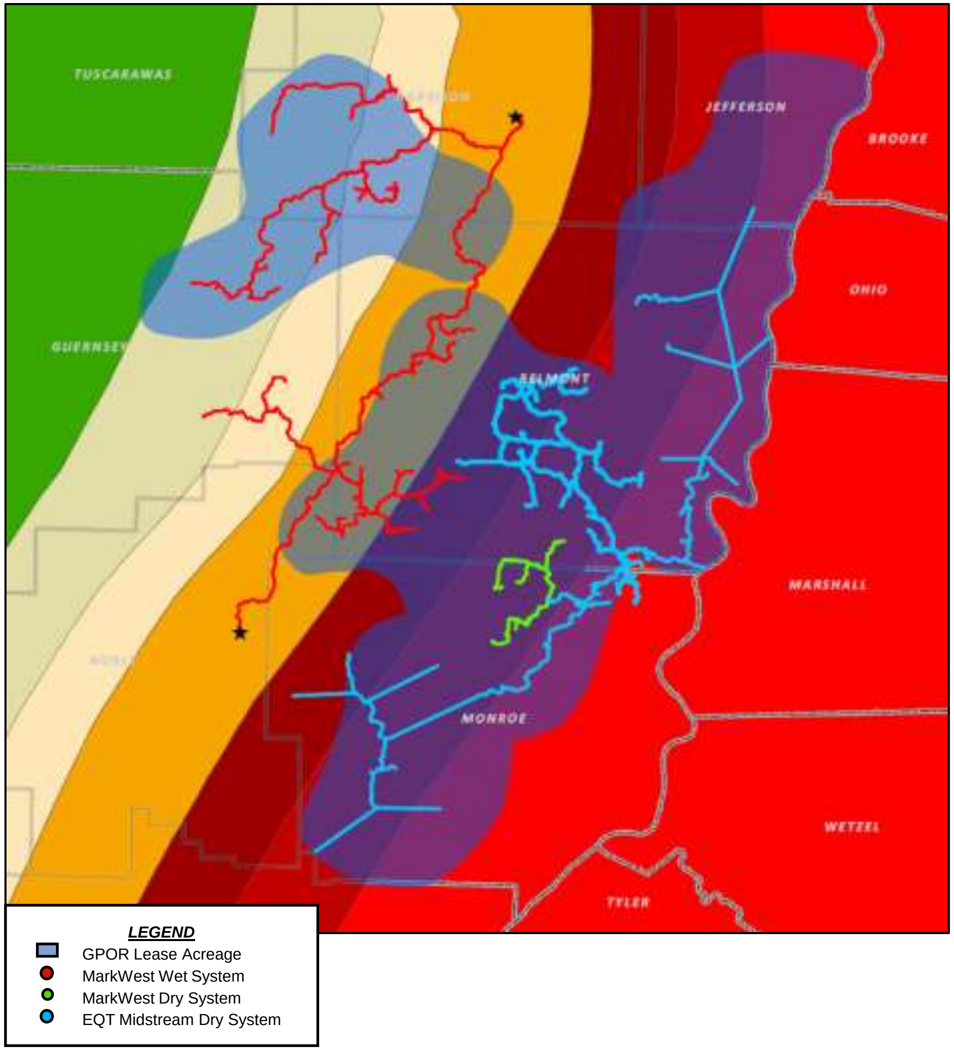
Note: See appendix slide 27 for detailed assumptions used to generate single well IRRs.
1. Assumes ethane rejection.
2. Assumes net undeveloped locations grossed up from 75% working interest.





KEY HIGHLIGHTS

- Consistency of the reservoir enables us to stay within the target zone, the Point Pleasant
  - Highly uniformed stratigraphy and limited reservoir variation
  - Structural simplicity, low dip and minimal faults
  - Petrophysical properties extremely uniform across the play
- Stratigraphy and structural simplicity allow for highly repeatable results



KEY HIGHLIGHTS

— Acreage dedication arrangements to MPLX Energy and EQT Midstream for gathering, processing and fractionation services
  – Competitive contracts with fixed fees and actual fuels and recoveries
  – Anchored position to allow flexible build out and phased in services

— Gathering overview:
  – Made up of 12” to 30” trunk lines throughout the dedication areas
  – Connectivity for dry gas production into multiple transmission pipelines

— Processing overview:
  – MPLX has 1.325 Bcfpd of nameplate processing capacity
  – Two separate facilities – Cadiz and Seneca

— Fractionation overview:
  – MPLX has 40,000 Bpd of C2 at Cadiz with room to expand
  – MPLX has 180,000 Bpd of C3+ at Hopedale expanding by 60,000 Bpd in 4Q18
  – Connectivity to Houston Complex
  – Rail terminal and product pipeline connectivity

— Takeaway overview:
  – Residue Gas: DEO, REX, TETCO, Rover and TCO

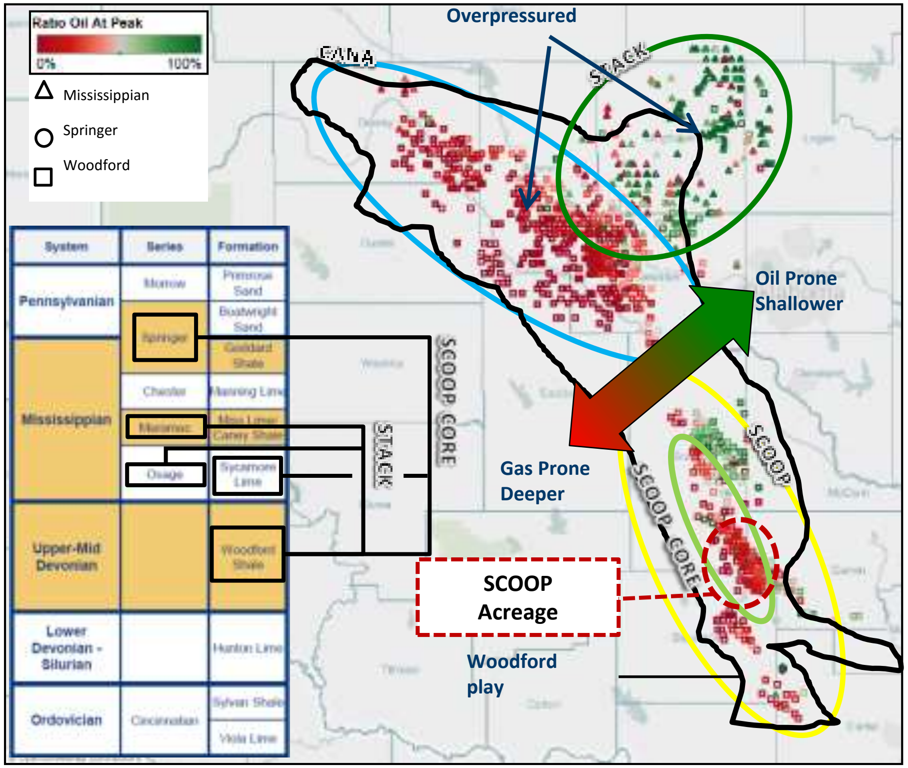
SCOOP – GEOLOGIC OVERVIEW

OVERVIEW



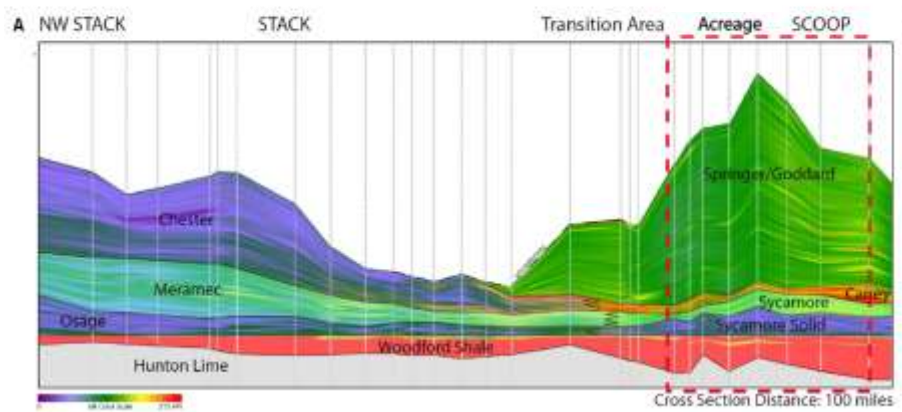
REGIONAL STRATIGRAPHY

— Woodford was deposited on an erosional surface and varies in thickness, increasing to the south into the SCOOP

— Sycamore section in the basinal time-equivalent to the Meramec and Osage units in the STACK

— Springer group thins to the north and east and is removed by an erosional surface

— Depositional fairway of high quality reservoir is over 2,000 ft. thick and covers the Woodford, Springer and Sycamore plays – with superior porosity and permeability and over-pressured hydrocarbons yield top flow rates



SCOOP ACREAGE CONTAINS THE THICKEST WOODFORD SECTION OF THE SCOOP/STACK PLAY ENHANCED BY A SUBSTANTIAL RESOURCE IN THE SPRINGER

Source: IHS performance evaluator, investor presentations.

SCOOP – RECENT GULFPORT WELL RESULTS

OVERVIEW

- Gulfport has provided initial production rates on a number of Woodford wells in the play and continues to be pleased with the well performance seen to date
  - Gulfport's Woodford wells continue to outperform on average relative to their offsets and type curves
- During 2018, Gulfport is largely focused on the liquids-rich, wet gas area of the play

APPENDIX

HISTORY OF GULFPORT

— Gulfport Energy Corporation (“GPOR”) is an independent E&P company based in Oklahoma City, OK

1997 – 1998

PHASE 1: FORMATION / ASSET FOCUS

- Gulfport Energy was formed in July 1997
- Initial assets were those of WRT Energy and a 50% working interest in the West Cote Blanche Bay (“WCBB”) field contributed by DLB Oil and Gas
- Gulfport divested a number of assets during this period leaving a cleaner balance sheet and focused asset base

1998 – 2005

PHASE 2: LOW RISK DEVELOPMENT

- Focused on production and cash flow growth from low risk development activities principally in WCBB
- Reprocessed 3D seismic in WCBB field
- Created a track record of successful drilling

2005 – 2007

PHASE 3: RESOURCE DIVERSIFICATION

- Continued successful drilling and growth at the WCBB field
- Conducted a 3-D seismic shoot and drilled first exploratory wells in Hackberry field
- Amassed solid acreage position in Canadian Oil Sands and launched core hole drilling program
- Acquired interest in Phu Horm natural gas field in Thailand

2007 – 2012

PHASE 4: RESOURCE PLAY ADDITION

- Acquired initial acreage position in Permian Basin and expanded through acquisitions
- Acquired larger interest in second natural gas field in Thailand
- Secured sizable position in the core of the Utica Shale achieving early entrant advantages
- Began vertical integration efforts in the Utica Shale to secure access to quality services

2012 – TODAY

PHASE 5: RESOURCE DEVELOPMENT AND EXPANSION

- Initiated drilling program to begin developing Utica Shale resource and currently actively developing acreage
- Contributed Permian Basin interests in Diamondback Energy, Inc. IPO
- Contributed certain services investments into Mammoth Energy Services, Inc. IPO
- Acquired assets in the core of the SCOOP play and currently actively developing acreage

SOUTHERN LOUISIANA

ASSET OVERVIEW

- Net proved reserves of 2.4 MMBoe[1]
- 10,816 net acres
- Gulfport operated

2018 ACTIVITIES UPDATE[2]

- Average net production of 1,828 Boepd during 3Q2018
- ~1% of Gulfport's total net production
- ~99% oil weighted production mix
  - Priced as high quality LLS crude and sold at a premium to WTI

Note: Please refer to page 2 for detail on forward looking statements.
1. As of 12/31/17.
2. During the three-month period ended 9/30/18.

MAMMOTH ENERGY SERVICES

MAMMOTH ENERGY OVERVIEW

- Mammoth Energy is a North American provider of diverse oil field services for the onshore unconventional oil and gas sector
- On October 19, 2016, Mammoth Energy completed its initial public offering and it is now listed on the NASDAQ under ticker symbol “TUSK”
  - Gulfport contributed its 30.5% equity interest at the time of the IPO
- On March 20, 2017, Mammoth Energy announced the acquisition of Taylor Frac, Stingray Energy Services and Stingray Cementing, all entities in which Gulfport holds an equity interest
  - Gulfport received ~2.1 million shares of TUSK shares at the time of the closing
- Gulfport holds ~9.8 million[1] shares, equating to ~22% of TUSK’s total shares outstanding
- Mammoth operates under four service divisions:
  - Completion and production services
  - Natural sand proppant services
  - Contract land and directional drilling services
  - Other energy services
- Gulfport’s ownership in Mammoth Energy equates to ~$250 million[2] in value

Note: Gulfport Energy Corporation holds ~9.8 million shares of Mammoth Energy Services, Inc. (NASDAQ: TUSK). Please refer to page 2 for detail on forward looking statements.

1. As of 11/1/18.
2. Calculated as of the close of the market on 10/31/18 at a price of $24.96 per share.
