What is livedeal.com?

livedeal.com is a unique, real-time "deal engine" that connects merchants with consumers. The Company believes that it has developed a first-of-its-kind web/mobile platform providing restaurants with full control and flexibility to instantly publish customized offers whenever they wish to attract customers. The website includes a number of user and restaurant-friendly features, including:

- an intuitive interface enabling restaurants to create limited-time offers and publish them immediately or on a preset schedule that is fully customizable;

- state-of-the-art scheduling technology giving restaurants the freedom to choose the days, times and duration of the offers, enabling them to create offers that entice consumers to visit their establishment during their slower periods;
- advanced publishing options allowing restaurants to manage traffic by limiting the number of available vouchers to consumers;
- superior geo-location technology allowing multi-location restaurants to segment offers by location, thereby attracting customers to slower locations while eliminating potential over-crowding at busier sites;
- innovative proprietary restaurant indexing methodology; and
- a user-friendly mobile and desktop web interface allowing consumers to easily browse, download and instantly redeem "live" offers found on livedeal.com based on their location.

Restaurants can sign up to use the LiveDeal platform at the Company's website (www.livedeal.com).
