Finjan Mobile Announces Update to its Popular Mobile Security Offering

Releases VitalSecurity(TM) Gen 3.7 Secure Mobile Browser

EAST PALO ALTO, CA -- (Marketwired) -- 06/15/17 -- [Finjan Holdings](#), Inc. (NASDAQ: FNJN), a cybersecurity company, today announced that its subsidiary Finjan Mobile, Inc., released its VitalSecurity™ Gen 3.7 Secure Mobile Browser ("VitalSecurity 3.7"), initially available in the Google Play Store. VitalSecurity 3.7 includes several upgraded features based on recent feedback the most notable of which is tracker blocking. Users can now block advertisements, analytic trackers and social sharing widgets including ad blocking. This not only enhances user privacy and security but allows for the webpage to load faster. This new version is free to download.

"As we gear up for the launch of our VitalSecurity Gen 4.0 Mobile Secure Browser with an embedded VPN connection in September, we continue to upgrade features to our Gen 3.0 product to ensure we are offering a premier mobile security product to protect user privacy and data," said Phil Hartstein, Finjan Holdings' President and CEO. "The VitalSecurity browser has proven useful to consumers with over 160,000 downloads. Our recent launch of VitalSecurity 3.7 shows our commitment to continue to incorporate Finjan's enterprise-grade technology into products that increase internet security for our customers using mobile devices. FinjanMobile will continue to listen to our customer's feedback, innovate in response to that feedback and new challenges, and look for both organic and inorganic paths towards future growth."

VitalSecurity 3.7 offers complete browser functionality and displays detailed analyses of virus and malware threats aggregated from over 60 top virus companies. Importantly, VitalSecurity offers full transparency of the browsing experience while guarding a user's privacy without collecting any personal data. It features biometric and passcode security enabled through mobile device hardware to further protect the user's experience. A recently added feature is a complete tracker transparency, which alerts users and allows them to turn off all advertising, social, content, and analytic scripts that are embedded in websites they visit.

ABOUT FINJAN

Established nearly 20 years ago, Finjan is a globally recognized leader in cybersecurity. Finjan's inventions are embedded within a strong portfolio of patents focusing on software and hardware technologies capable of proactively detecting previously unknown and emerging threats on a real-time, behavior-based basis. Finjan continues to grow through investments in innovation, strategic acquisitions, and partnerships promoting economic advancement and job creation.
