# InfuSystem Integrates With Epic EMR System at University of California - San Diego Moores Cancer Center

MADISON HEIGHTS, Mich., July 21, 2015 /PRNewswire/ -- InfuSystem Holdings, Inc. (NYSE MKT: INFU), a leading national provider of infusion pumps and related services for the healthcare industry in the United States and Canada, announced today the rollout of InfuSystem EXPRESS, the Company's patent-pending EMR connectivity solution, at the University of California - San Diego Moores Cancer Center.

"Powered by our InfuBus™ connectivity engine, InfuSystem EXPRESS delivers on our promise of Infusion Made Easy," said Eric K. Steen, chief executive officer of InfuSystem. "EXPRESS securely integrates with UC-San Diego Health System's Epic electronic medical software system to automatically deliver data, improving efficiency, reducing transcription errors, and eliminating insurance paperwork associated with oncology patients going home on our infusion pumps. We believe medical facilities, like those of the UC-San Diego Health System, will find our portfolio of connectivity offerings to be a valuable resource. EXPRESS utilizes a smart data listener and extractor for identifying and integrating the right patient and pump information needed for insurance claims while remaining secure and HIPAA-compliant."

InfuSystem EXPRESS immediately improves a practice's workflow by automating the daily processes associated with treatment logs and pump assignments, as well as tracking and standardizing data flow at practices with multiple locations. In addition to facilities using Epic, InfuSystem EXPRESS integrates with Varian, Altos and other popular electronic medical record (EMR) management systems at sites nationwide.
