# Resonant to Present at the 17th Annual Needham Growth Conference on January 14

SANTA BARBARA, Calif.-- Resonant Inc. (NASDAQ: RESN), a late-stage development company that is creating innovative filter designs for radio frequency, or RF, front-ends for the mobile device industry, will present at the 17<sup>th</sup> Annual Needham Growth Conference at the New York Palace Hotel on January 14, 2015 at 4:50 p.m. Eastern time. The presentation will be webcast live and will be available for replay for 90 days by visiting: [Needham Conference Webcast RESN](#) or on the Resonant web site at: <http://ir.resonant.com/presentations>.

## About Resonant Inc.

Resonant is creating innovative filter designs for radio frequency, or RF, front-ends for the mobile device industry. The RF front-end is the circuitry in a mobile device responsible for analog signal processing and is located between the device's antenna and its digital baseband. The Company uses a fundamentally new technology called Infinite Synthesized Networks®, or ISN®, to configure and connect resonators, the building blocks of RF filters. Filters are a critical component of the RF front-end used to select desired radio frequency signals and reject unwanted signals. Resonant plans to use ISN to develop new classes of filter designs. For information, please visit [www.resonant.com](http://www.resonant.com).
