Resonant to Present at the 27th Annual ROTH Conference on March 10

Management will also attend Mobile World Congress 2015 in Barcelona, March 2-5

SANTA BARBARA, Calif.-- Resonant Inc. (NASDAQ: RESN), a late-stage development company that is creating innovative filter designs for radio frequency, or RF, front-ends for the mobile device industry, will present at the 27th Annual ROTH Capital Partners Conference at The Ritz-Carlton, Laguna Niguel, California, on Tuesday, March 10, 2015, at 3:30 pm PST.

The presentation will be webcast live and available for replay at <http://wsw.com/webcast/roth29/resn> and on the IR section of Resonant's website at: [Resonant IR Presentations](#).

Resonant senior executives also will be attending Mobile World Congress 2015, which will be held at the Fira Gran Via in Barcelona, Spain, from March 2-5. For more information about the event, please visit www.mobileworldcongress.com.

About Resonant Inc.

Resonant is creating innovative filter designs for radio frequency, or RF, front-ends for the mobile device industry using a fundamentally new technology called Infinite Synthesized Networks™, or ISN™. The RF front-end is the circuitry in a mobile device responsible for analog signal processing and is located between the device's antenna and its digital baseband. Filters are a critical component of the RF front-end that select the desired radio frequency signals and rejects unwanted signals. For more information, visit www.resonant.com.
