

Arotech Training and Simulation Division Announces \$4.2M in Awards on Its Boom Operator Simulator System Program

ANN ARBOR, Mich., Sept. 22, 2016 (GLOBE NEWSWIRE) -- Arotech Corporation (Nasdaq:ARTX) announced that FAAC Incorporated, part of its Training and Simulation Division, received \$4.2 million in awards on its current U.S. Air National Guard KC-135 Boom Operator Simulation System (BOSS) contract from U.S. Army PEOSTRI. The awards, in the form of exercised options and an engineering change proposal, continue FAAC's contractor operator/maintenance support (COMS) and Training System Support Center (TSSC) activities into FY17. COMS provides for on-site personnel and depot maintenance support for each of the 17 BOSS units delivered under this contract. TSSC provides engineering and sustainment services/materials to the fielded systems to include bi-annual USAF simulator certification and targeted hardware modifications to enhance the BOSS systems.

"These awards represent continued commitment from the Air National Guard to the operational readiness of the fielded BOSS units," said Christopher Caruana, Arotech's Training & Simulation Division Executive Vice President. "With this sustained support, the Guard's Air Refueling Wings can rely on the BOSS to train refueling boom operators and will continue to realize the benefits and costs savings associated with this recently delivered training capability."

About Arotech's Training and Simulation Division

Arotech's Training and Simulation Division (ATSD) provides world-class simulation based solutions. ATSD develops, manufactures, and markets advanced high-tech multimedia and interactive digital solutions for engineering, use-of-force, and operator training simulations for military, law enforcement, security, municipal and private industry personnel. The division's fully interactive operator training systems feature state-of-the-art vehicle simulator technology enabling training in situation awareness, risk analysis and decision-making, emergency reaction and avoidance procedures, conscientious equipment operation, and crew coordination. The division's use-of-force training products and services allow organizations to train their personnel in safe, productive, and realistic environments. The division supplies pilot decision-making support software for the F-15, F-16, F-18, F-22, and F-35 aircraft, simulation models for the ACMI/TACTS air combat training ranges, and Air-Refueling Boom Arm simulators. The division also provides consulting and developmental support for engineering and research simulation solutions.

Arotech's Training and Simulation Division consists of FAAC Incorporated (www.faac.com), MILO Range Training Systems (www.milorange.com), and Realtime Technologies (www.simcreator.com).

About Arotech Corporation

Arotech Corporation is a leading provider of quality defense and security products for the military, law enforcement and homeland security markets, including multimedia interactive simulators/trainers and advanced zinc-air and lithium batteries and chargers. Arotech operates two major business divisions: Training and Simulation, and Power Systems.

Arotech is incorporated in Delaware, with corporate offices in Ann Arbor, Michigan, and research, development and production subsidiaries in Michigan, South Carolina, and Israel. For more information on Arotech, please visit Arotech's website at www.arotech.com.

Except for the historical information herein, the matters discussed in this news release include forward-looking statements, as defined in the Private Securities Litigation Reform Act of 1995. Forward-looking statements reflect management's current knowledge, assumptions, judgment and expectations regarding future performance or events. Although management believes that the expectations reflected in such statements are reasonable, readers are cautioned not to place undue reliance on these forward-looking statements, as they are subject to various risks and uncertainties that may cause actual results to vary materially. These risks and uncertainties include, but are not limited to, risks relating to: product and technology development; the uncertainty of the market for Arotech's products; changing economic conditions; delay, cancellation or non-renewal, in whole or in part, of contracts or of purchase orders (including as a result of budgetary cuts resulting from automatic sequestration under the Budget Control Act of 2011); and other risk factors detailed in Arotech's most recent Annual Report on Form 10-K for the fiscal year ended December 31, 2015 and other filings with the Securities and Exchange Commission. Arotech assumes no obligation to update the information in this release.
