Resonant to Host Third Quarter 2018 Financial Results Conference Call on Tuesday, November 13th at 1:30 p.m. Pacific Standard Time

GOLETA, Calif., Oct. 30, 2018 (GLOBE NEWSWIRE) -- Resonant Inc. (NASDAQ:RESN), a leader in transforming the way radio frequency, or RF, front-ends are being designed and delivered for wireless devices, announced it will release financial results for the third quarter ended September 30, 2018, after market close on Tuesday, November 13, 2018.

Management will host an investor conference call at 1:30 p.m. PST (4:30 p.m. EST) on November 13, 2018, to discuss Resonant's third quarter 2018 financial results, provide a corporate update, and conclude with a Q&A from participants.

Management will be using a presentation that includes a video during the investor conference call and encourages participants to access the call via the webcast. Telephone participants may access the presentation and video by going to the [Events](#) section of the company's IR website.

Conference Call and Webcast

Date: Tuesday, November 13, 2018

Time: 1:30 p.m. Pacific standard time (4:30 p.m. Eastern standard time)

U.S. Dial-in: 1-877-423-9813

International Dial-in: 1-201-689-8573

Conference ID: 13684706

Webcast: [RESN Q3 2018 Webcast](#)

Please dial in at least 10 minutes before the start of the call to ensure timely participation.

A playback of the call will be available through December 13, 2018. To listen, call 1-844-512-2921 within the United States or 1-412-317-6671 when calling internationally. Please use the replay pin number 13684706. A webcast will also be available for 90 days on the IR section of the Resonant website or by clicking here: [RESN Q3 2018 Webcast](#).

About Resonant Inc.

Resonant (NASDAQ:RESN) is transforming the market for RF front-ends (RFFE) by disrupting the RFFE supply chain through the delivery of solutions that leverage our Infinite Synthesized Network (ISN) software tools platform, capitalize on the breadth of our IP portfolio, and are delivered through our services offerings. In a market that is critically constrained by limited designers, tools and capacity, Resonant addresses these critical problems by providing customers with ever increasing design efficiency, reduced time to market and lower unit costs. Customers leverage Resonant's disruptive capabilities to

design cutting edge filters and modules, while capitalizing on the added stability of a diverse supply chain through Resonant's fabless ecosystem-the first of its kind. Working with Resonant, customers enhance the connectivity of current mobile devices, while preparing for the demands of emerging 5G applications.

About Resonant's ISN® Technology

Resonant can create designs for difficult bands, modules and other complex RF Front End requirements that we believe have the potential to be manufactured for half the cost and developed in half the time of traditional approaches. ISN is a suite of proprietary mathematical methods, software design tools and network synthesis techniques that enable us to explore a much larger set of possible design solutions that regularly incorporate our proprietary technology. We then quickly deliver design simulations to our customers, which they manufacture or have manufactured by one of our foundry partners. These improved solutions still use Surface Acoustic Wave (SAW) or Temperature Compensated Surface Acoustic Wave (TC-SAW) manufacturing methods and perform as well as those using higher cost manufacturing methods such as Bulk Acoustic Wave (BAW). Resonant's method delivers excellent predictability, enabling achievement of the desired product performance in roughly half as many turns through the fab. In addition, because Resonant's models are fundamental, integration with its foundry and fab customers is seamless because its models speak the "fab language" of basic material properties and dimensions.
