*** Non-GAAP – Financial Measures**

This press release includes both financial measures in accordance with Generally Accepted Accounting Principles, or GAAP, as well as non-GAAP financial measures. Generally, a non-GAAP financial measure is a numerical measure of a company's performance, financial position or cash flows that either excludes or includes amounts that are not normally included or excluded in the most directly comparable measure calculated and presented in accordance with GAAP. Non-GAAP financial measures should be viewed as supplemental to, and should not be considered as alternatives to net income, operating income, and cash flow from operating activities, liquidity or any other financial measures. They may not be indicative of the historical operating results of Aspen Group nor are they intended to be predictive of potential future results. Investors should not consider non-GAAP financial measures in

isolation or as substitutes for performance measures calculated in accordance with GAAP.

Our management uses and relies on Adjusted EBITDA and Adjusted Gross Profit, each of which are non-GAAP financial measures. We believe that both management and shareholders benefit from referring to the following non-GAAP financial measures in planning, forecasting and analyzing future periods. Our management uses these non-GAAP financial measures in evaluating its financial and operational decision making and as a means to evaluate period-to-period comparison. Our management recognizes that the non-GAAP financial measures have inherent limitations because of the excluded items described below.

Aspen Group defines Adjusted EBITDA as earnings (or loss) from continuing operations before the items in the table below. Aspen Group excludes these expenses because they are non-cash or non-recurring in nature.

Aspen Group defines Adjusted Gross Profit as revenues less cost of revenues (instructional costs and services and marketing and promotional costs), but excluding the amortization of courseware and software. Adjusted Gross Profit excludes non-cash items and permits our management to focus on core operating results.

We have included a reconciliation of our non-GAAP financial measures to the most comparable financial measures calculated in accordance with GAAP. We believe that providing the non-GAAP financial measures, together with the reconciliation to GAAP, helps investors make comparisons between Aspen Group and other companies. In making any comparisons to other companies, investors need to be aware that companies use different non-GAAP measures to evaluate their financial performance. Investors should pay close attention to the specific definition being used and to the reconciliation between such measure and the corresponding GAAP measure provided by each company under applicable SEC rules.
