Czech Olympian Petr Svoboda Credits Igniton for Help in Setting Masters World Record, Marking Extraordinary Comeback After Severe Injury

BOULDER, Colo., March 20, 2026 /PRNewswire/ -- [Igniton™](#), a majority-owned subsidiary of [Gaia](#) (NASDAQ: GAIA), was credited today by former Olympian and European Indoor Champion **Petr Svoboda** after he set a new **Masters (M40) world-level performance in the 60-meter hurdles** (7.78 sec.). This represents a remarkable return to elite competition after a severe injury and more than a decade after his peak international career. His starting reaction time was one of the best in the race, beating those half his age.

The performance represents not only a world-class athletic achievement, but a powerful example of what is possible at the intersection of discipline, recovery, and modern performance science.

From Uncertainty to World Record

Following a significant injury, Svoboda faced a period of uncertainty about his future in sport. At one point, he questioned whether he might lose his leg and certainly had doubts

about being able to return to competitive racing. Instead, after a focused year of rehabilitation and performance rebuilding, he achieved the fastest performance ever recorded in his age category.

Rebuilding and Resilience

Svoboda's comeback was built on a comprehensive approach that included:

- Neuromuscular retraining
- Mobility and strength restoration
- Recovery optimization
- Consistent, disciplined training

As part of this process, he was supported by ***Igniton***™ and incorporated both ***IgniCognition***™ and ***IgniLongevity***™ into his daily routine. Reflecting on his journey, Svoboda shared:

"There was a moment after my injury when I honestly wasn't sure if I would ever walk again, much less race. To come back and perform at this level, and to set a world record in my category, is something I'm incredibly grateful for.

I want to thank *Igniton* for their support throughout this process. *IgniLongevity* and *IgniCognition* became a consistent part of my daily routine, and I felt they played a significant role in helping me stay on track during a very demanding year of training and recovery.

This achievement is the result of many factors, but having the right support system made all the difference."

Supporting Performance Through Modern Bioenergetics

IgniLongevity and *IgniCognition* are formulated with advanced compounds selected to support:

- Neural speed
- Cellular energy production
- Metabolic efficiency
- Stress resilience
- Overall performance readiness

The formulations include ingredients such as Nicotinamide Ribose, Resveratrol, PQQ, Citicoline, Alpha-GPC, NADH and other compounds studied as nootropics and for their role in supporting energy metabolism, recovery and healthy aging.

The ingredients in *Igniton* products are enhanced using a proprietary quantum-charging

process that features high-vacuum chambers, cold plasma and laser-photonic systems; designed to enhance ingredient effectiveness for improved molecular integrity and optimized functional performance. University trials published in peer-reviewed journals support superior performance for *Igniton* formulations.

A Milestone in Cognitive and Physical Performance

The 60-meter hurdles is one of the most neurologically demanding events in athletics, requiring:

- Rapid reaction time
- Precise coordination
- High-speed motor control
- Split-second decision-making

Svoboda's performance demonstrates that these capabilities can be maintained at an elite level well beyond traditional expectations.

Redefining the Limits of Age and Performance

"Petr's achievement reflects a broader shift in how we think about longevity and human performance," said *Igniton* CMO, Ashley Grace. "It highlights what is possible when training, recovery, and advanced performance strategies are aligned."

As interest in metabolic longevity and human optimization continues to grow, performances like Svoboda's are redefining expectations for what athletes can achieve across decades.

Igniton products are available for purchase on [Igniton's](#) website and [Gaia Marketplace](#).

About Gaia

[Gaia](#) is a member-supported global video streaming service and community that produces and curates conscious media through four primary channels—Seeking Truth, Transformation, Alternative Healing and Yoga—in four languages (English, Spanish, French and German) to its members in 185 countries. Gaia's library includes over 10,000 titles, over 85% of which is exclusive to Gaia, and approximately 75% of viewership is generated by content produced or owned by Gaia. Gaia is available on Apple TV, iOS, Android, Amazon Fire, Roku, Chromecast, and sold through Amazon Prime Video and Comcast Xfinity. For more information about Gaia, visit www.gaia.com.

About Igniton

Igniton is a Colorado-based quantum wellness technology company focused on enhancing human performance through advanced formulation science. Its products, including *IgniLongevity* and *IgniCognition*, are designed to support memory, focus, mental speed, stress resilience, recovery and overall vitality.

Igniton integrates principles from neuroscience, bioenergetics, and advanced molecular enhancement technologies to develop next-generation performance solutions.
