SilverSun Technologies Launches Security-as-a-Service Business

SilverSun launches dual-shore Security Operations Center with leading Israeli Cyber Defense Partner

EAST HANOVER, NJ, May 23, 2018 (GLOBE NEWSWIRE) -- SilverSun Technologies, Inc. (NASDAQ: SSNT) announced today the creation of a dual-shore Security-as-a-Service operation, in partnership with CyberHat, a leading Israeli Security Operations Center (SOC). This new security service offering will enable partners and customers to leverage our leading security operations teams to meet their cybersecurity needs, particularly in compliance-driven and regulated industries.

Recently listed as an emerging leader in the IoT Cybersecurity/Security Operations Center (SOC) sector by Forbes, CyberHat is designed, built and operated by Israel's leading cybersecurity experts, including hackers and crackers, intelligence officers and security experts. The partnership with CyberHat will allow SilverSun to provide a Fortune 500-level security service to the mid-market, at prices that are digestible by companies in that sector. It will further enable SilverSun to pursue larger customers and service opportunities than its wholly-owned subsidiary, SWK Technologies, has historically served.

Mark Meller, CEO of SilverSun, stated, "In today's data-driven world, our customers and partners are repeatedly threatened by cybersecurity threats, data breaches, and network intrusion. Our subsidiary, SWK Technologies, has grown a network Managed Service Provider (MSP) practice, ranked 45th in the world by MSPMentor 501, that is responsible for managing the information technology infrastructure of our clients. SilverSun's new security offering goes well-beyond managed services to provide the highest-level security operations service available, ensuring a pro-active security posture and incident response team for our clients."

Nadav Arbel, CEO of CyberHat, stated, "We are thrilled to partner with SilverSun Technologies. They will extend the capabilities and market reach of our SOC (which is called "Cyrebro"), to the small and medium-sized business (SMB) marketplace in North America. SilverSun's status as a leading MSP is indicative of their ability to expand our SOC operations to prospects and partners that we might not otherwise have pursued. Their proven ability to lead in the SMB channel and marketplace will be of great advantage

to CyberHat as the service rolls-out in North America.”

The services offered by SilverSun and CyberHat will include security operations center (Cyrebro), incident response (IR), cybersecurity assessments, and hacking simulations.

About SilverSun Technologies

We are a business application, technology and consulting company providing strategies and solutions to meet our clients' information, technology, business management, and network and cybersecurity needs. Our services and technologies enable customers to manage, protect and monetize their enterprise assets whether on-premise or in the "Cloud". As a value added reseller of business application software, we offer solutions for accounting and business management, financial reporting, Enterprise Resource Planning ("ERP"), Warehouse Management Systems, Customer Relationship Management, and Business Intelligence. Additionally, we have our own development staff building software solutions for Electronic Data Interchange, time and billing, and various ERP enhancements. Our value-added services focus on consulting and professional services, specialized programming, training, and technical support. We have a dedicated network services practice that provides managed services, hosting, business continuity, cloud, e-mail and web services. Our customers are nationwide, with concentrations in the New York/New Jersey metropolitan area, Chicago, Arizona, Seattle, Greensboro, and Southern California.
