Resonant to Host Second Quarter 2019 Financial Results Conference Call on Tuesday, August 6th at 1:30 p.m. Pacific Daylight Time

GOLETA, CA / ACCESSWIRE / July 23, 2019 /Resonant Inc. (NASDAQ: RESN), a leader in transforming the way radio frequency, or RF, front-ends are being designed and delivered for mobile handset and wireless devices, announced it will release financial results for the second quarter ended June 30, 2019, after market close on Tuesday, August 6, 2019.

Management will host an investor conference call at 1:30 p.m. PDT (4:30 p.m. EDT) on August 6, 2019, to discuss Resonant's second quarter 2019 financial results, provide a corporate update, and conclude with a Q&A from participants. To participate, please use the following information:

Conference Call and Webcast

Date: Tuesday, August 6, 2019

Time: 1:30 p.m. Pacific daylight time (4:30 p.m. Eastern daylight time)

U.S. Dial-in: 1-855-327-6837

International Dial-in: 1-631-891-4304

Conference ID: 10007289

Webcast: [RESN Q2 2019 Webcast](#)

Please dial in at least 10 minutes before the start of the call to ensure timely participation.

A playback of the call will be available through September 6, 2019. To listen, call 1-844-512-2921 within the United States or 1-412-317-6671 when calling internationally. Please use the replay pin number 10007289. A webcast will also be available for 90 days on the IR section of the Resonant website or by clicking here: [RESN Q2 2019 Webcast](#)

About Resonant Inc.

Resonant (NASDAQ: RESN) is transforming the market for RF front-ends (RFFE) by disrupting the RFFE supply chain through the delivery of solutions that leverage our Infinite Synthesized Network (ISN) software tools platform, capitalize on the breadth of our IP portfolio, and are delivered through our services offerings. In a market that is critically

constrained by limited designers, tools and capacity, Resonant addresses these critical problems by providing customers with ever increasing design efficiency, reduced time to market and lower unit costs. Customers leverage Resonant's disruptive capabilities to design cutting edge filters and modules, while capitalizing on the added stability of a diverse supply chain through Resonant's fabless ecosystem-the first of its kind. Working with Resonant, customers enhance the connectivity of current mobile devices, while preparing for the demands of emerging 5G applications.

Resonant uses its website (<https://www.resonant.com>) and LinkedIn page (<https://www.linkedin.com/company/resonant-inc-/>) as channels of distribution of information about its products, its planned financial and other announcements, its attendance at upcoming investor and industry conferences, and other matters. Such information may be deemed material information, and Resonant may use these channels to comply with its disclosure obligations under Regulation FD. Therefore, investors should monitor the company's website and its social media accounts in addition to following the company's press releases, SEC filings, public conference calls, and webcasts.

About Resonant's ISN[®] Technology

Resonant can create designs for difficult bands, modules and other complex RF Front End requirements that we believe have the potential to be manufactured for half the cost and developed in half the time of traditional approaches. ISN is a suite of proprietary mathematical methods, software design tools and network synthesis techniques that enable us to explore a much larger set of possible design solutions that regularly incorporate our proprietary technology. We then quickly deliver design simulations to our customers, which they manufacture or have manufactured by one of our foundry partners. These improved solutions still use Surface Acoustic Wave (SAW) or Temperature Compensated Surface Acoustic Wave (TC-SAW) manufacturing methods and perform as well as those using higher cost manufacturing methods such as Bulk Acoustic Wave (BAW). Resonant's method delivers excellent predictability, enabling achievement of the desired product performance in roughly half as many turns through the fab. In addition, because Resonant's models are fundamental, integration with its foundry and fab customers is seamless because its models speak the "fab language" of basic material properties and dimensions.
