# **U.S. General Services Administration Awards Federal Supply Schedule to MYnd Analytics to Provide Healthcare IT Services to the Federal Government**

MISSION VIEJO, Calif., Feb. 04, 2019 (GLOBE NEWSWIRE) -- **MYnd Analytics, Inc. (NASDAQ: MYND)**, a predictive analytics company aimed at improving the delivery of mental health through the combination of telemedicine and data analytics, today announced that the U.S. General Services Administration has awarded a five-year Federal Supply Schedule (FSS) contract as a government supplier, effective January 31, 2019 with the opportunity to renew it for 15 more years. Under the contract, MYnd intends to offer Healthcare Information Technology services to federal government departments and agencies related to our Psychiatric EEG Evaluation Registry, including the Department of Defense and the United States Department of Veterans Affairs (VA) facilities nationwide. The Veterans Health Administration is America's largest integrated health care system with more than 1,400 sites of care, serving almost nine million veterans each year.

The Departments of Veterans Affairs, Defense, and Health and Human Services, in coordination with other federal agencies, are authorized under Presidential Executive Order to take steps to ensure that veterans, service members, and their families receive the mental health services and support they need. These steps included strengthening suicide prevention, enhancing access to mental health treatment and promoting development of more effective treatment methodologies.

Patrick Herguth, CEO of MYnd, stated, "This is another example of the importance artificial/augmented intelligence can play in healthcare and the traction we are gaining with our predictive analytics decision support technology, helping physicians leverage technology for precision personalized care for behavioral health conditions. This contract adds MYnd's data analysis services to the range of treatment support tools for clinicians in the federal health care system. We have worked hard to be in a position to provide tools and services to clinicians caring for veterans and other federal employees and look forward to becoming part of the behavioral health solution."

## **About MYnd Analytics**

MYnd Analytics, Inc. ([www.myndanalytics.com](http://www.myndanalytics.com)) is a predictive analytics company that has developed a decision support tool to help physicians reduce trial and error treatment in mental health and provide more personalized care to patients. The Company's Psychiatric EEG Evaluation Registry, or PEER Online, is a registry and reporting platform that allows

medical professionals to exchange treatment outcome data for patients referenced to objective neurophysiology data obtained through a standard electroencephalogram (EEG). Based on the Company's original physician-developed database, there are now more than 40,000 outcomes for over 11,000 unique patients in the PEER registry. The goal of PEER Online is to provide objective, personalized data to assist physicians in the selection of appropriate medications. MYnd also operates its wholly owned subsidiary Arcadian Telepsychiatry Services, LLC which manages a suite of services including telepsychiatry, teletherapy, digital patient screening, curbside consultation, on-demand services, and scheduled encounters for all age groups. Arcadian utilizes patient engagement and re-engagement strategies so that care is effectively completed, helping to comfortably move inpatient care to outpatient, assisting patients in readjusting to their life routine, as well as reducing wait times for mental health treatment. Arcadian's customer base includes major health plans, health systems, and community-based organizations.
