# FOOTHILLS EXPLORATION, INC. CLOSES ACQUISITION OF OIL AND GAS LEASES TOTALING OVER 16,000 ACRES IN WYOMING'S WIND RIVER BASIN

LOS ANGELES, March 29, 2019 (GLOBE NEWSWIRE) -- Foothills Exploration, Inc. (OTC.QB: FTXP) (the "Company," or "Foothills"), an independent oil and gas exploration company engaged in the acquisition and development of oil and natural gas properties in the Rockies today announced that it closed on the acquisition of undeveloped oil and gas leases from an affiliate of American Shale Energy, LLC, as previously announced in the Company's press release dated March 25, 2019. The acreage is located in Fremont County, Wyoming, in the Wind River Basin.

This acreage acquisition provides Foothills with substantial upside in the form of attractive exploration and development projects targeting multiple formations across 16,387 acres of predominantly continuous oil and gas leases.

In 2018, a U.S. Geological Survey ("USGS") petroleum assessment determined that there were an estimated 528 million barrels of oil, 2 trillion cubic feet of gas and 40 million barrels of natural gas liquids of undiscovered resources of the Niobrara Interval of the Cody Shale of the Wind River Basin Province, Wyoming.

The Company plans to retain a third-party engineering firm to perform a comprehensive geological and geophysical analysis of the acreage to quantify possible and contingent reserves for this developmental acreage.

"We believe this transaction aligns with our corporate strategy of building an inventory of assets that can potentially produce out-sized investment returns and provides us the opportunity to build long-term shareholder value," said Kevin Sylla, the Company's Executive Chairman.

Foothills' acreage is located in a large undrilled area and is along the eastern flank of a deeper sub basin in the Wind River Basin proper, where a deep structural deposit called the Beaver Creek field has produced approximately 71.7 million barrels of oil and 906,473,338 MCF of gas. The Big Sand Draw field, updip to the south, has produced some 60.8 million barrels of oil and 214,923,203 MCF of gas from multi-pay horizons generally in the Frontier, Muddy, Lakota, Morrison, Phosphoria, Tensleep and Madison formations.

## About the Company

Foothills Exploration, Inc. is a growth stage oil and gas exploration and production (E&P) company with a focus in the acquisition and development of undervalued and underdeveloped properties in the Rockies. The Company's principal assets are located across well-established plays in the U.S. Rocky Mountain region. ## Forward-Looking Statements

This release includes "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Forward-looking statements give our current expectations, opinions, belief or forecasts of future events and performance. A statement identified by the use of forward-looking words including "will," "may," "expects," "projects," "anticipates," "plans," "believes," "estimate," "should," "could" and certain of the other foregoing statements may be deemed forward-looking statements. These statements are subject to risks and uncertainties and are based on the beliefs and assumptions of management, and information currently available to management. Although Foothills believes that the expectations reflected in such forward-looking statements are reasonable, these statements involve risks and uncertainties that may cause actual future activities and results to be materially different from those suggested or described in this news release. In particular, statements, express or implied, concerning our future operating results and returns or our ability to acquire or develop proven or probable reserves, our ability to replace or increase reserves, increase production, or generate income or cash flows are forward-looking statements. All forward-

looking statements should be evaluated with the understanding of their inherent uncertainty. Factors that could cause the Company's actual results to differ materially from those expressed or implied by forward-looking statements include, but are not limited to: risks inherent in natural gas and oil drilling and production activities, including risks of fire, explosion, blowouts, pipe failure, casing collapse, unusual or unexpected formation pressures, environmental hazards, and other operating and production risks, which may temporarily or permanently reduce production or cause initial production or test results not to be indicative of future well performance or delay the timing of sales or completion of drilling operations; delays in receipt of drilling permits; risks with respect to natural gas and oil prices, a material decline which could cause Foothills to delay or suspend planned drilling operations or reduce production levels; risks relating to the availability, timing and cost of capital to fund drilling operations that can be adversely affected by adverse drilling results, production declines and declines in natural gas and oil prices; risks relating to unexpected adverse developments in the status of properties; risks relating to the absence or delay in receipt of government approvals or third party consents; the Company's ability to identify, finance and integrate recent or future acquisitions; the volatility of the Company's stock price; and other risks described in Foothills' Annual Report on Form 10-K and other filings with the SEC, available at the SEC's website at [www.sec.gov](http://www.sec.gov). Investors are cautioned that any forward-looking statements are not guarantees of future performance and actual results or developments may differ materially from those projected. The forward-looking statements in this press release are made as of the date hereof. The Company takes no obligation to update or correct its own forward-looking statements, except as required by law, or those prepared by third parties that are not paid for by the Company.
