Clean Coal Technologies Inc. (CCTC) Announces the Granting of Permits for Their Test Facility in Wyoming

NEW YORK, NY / ACCESSWIRE / May 22, 2018 /Clean Coal Technologies, Inc., (OTCQB: CCTC) ("CCTI" or the "Company"), the leading clean-energy company utilizing patented and proven technology to convert run of mine coal into a cleaner burning and more efficient fuel, today announced that they have been granted the necessary permits from Wyoming DEQ to commence assembly of their test facility at Fort Union in Wyoming and proceed with testing of international coal.

"We are pleased to confirm that Wyoming DEQ has granted us the necessary permits to commence assembly of our test facility at our Fort Union location in Wyoming. We have also been granted the necessary permits to commence testing of both International coal and domestic coal which will correspond to scheduled visits from both Government and corporate officials from the US and abroad," said Sean Mahoney, CCTI Press Officer. In addition to the testing of coal from Indonesia, India, Russia and the US we will be working closely with the University of Wyoming in advancing their efforts in coal by-products using our patented technology."

About Clean Coal Technologies, Inc.

Clean Coal Technologies, Inc., a cleaner-energy technology company with headquarters in New York City, NY, holds patented process technology and other intellectual property that converts raw coal into a cleaner burning fuel. The Company's trademarked end products, "Pristine[™]" coals, are significantly more efficient, less polluting, more cost-effective, and provide more heat than untreated coal. The principal elements of the Company's pre-combustion technology are based on well-proven science and tried-and-tested industrial components. The Company's clean coal technology may reduce some 90% of chemical pollutants from coal, including Sulfur and Mercury, thereby resolving emissions issues affecting coal-fired power plants.
