InvinciBull Joins Leading VPNS as Part of The Center for Democracy & Technology's Signals of Trust

The Safety and Privacy of InvinciBull's Customers is our Top Concern

EAST PALO ALTO, Calif., April 25, 2019 (GLOBE NEWSWIRE) -- [Finjan Holdings, Inc.](#) (NASDAQ: FNJN), a pioneer in cybersecurity, today announced that its subsidiary, [Finjan Mobile, Inc.](#) and its enhanced VPN, InvinciBull, joined a select group of leading VPN providers to demonstrate how it protects its users' privacy through [Signals of Trust](#) as codified by the Center for Democracy & Technology (CDT).

"We are honored to be included in the CDT's Signals of Trust," commented June Bower, Head of Marketing for InvinciBull. "We take user privacy seriously and do not collect or save user data. Additionally, our affiliation with Finjan provides us with military grade security and our "always protected" feature means users don't need to remember to turn their VPN on."

Late last year, the CDT launched an initiative aimed at helping consumers better understand VPNs and assess their trustworthiness. The privacy advocacy group developed a series of questions and recommendations for VPN providers that, when addressed completely, serve as a guideline to assess whether the VPN can be trusted with a user's personal browsing information and web traffic. The framework was developed in consultation with leading VPN providers, which proactively answered the CDT's questions to provide greater transparency about their data protection practices. InvinciBull addressed all of the CDT questions and recommendations in its "Signals of Trust."

Additionally, Finjan's cyber security expert, Greg Falco, PhD, was featured in the March 2019 Issue of [Hospitality Technology](#) on why hotels should offer cyber security protection (VPNs) as a loyalty perk. where he stated that by 2020 there will be an estimated 483 billion domestic business trips in the US which raises concern about corporate cyber security. According to a [recent survey of CIOs](#), 81% said their company had experienced a Wi-Fi related security break in the last year. Specifically, looking at hotels and unsecure Wi-Fi networks, he recommends that Hotel loyalty programs should engage directly with VPN offerings so that a VPN is automatically deployed once the user is logged into the network. "Free Wi-Fi has become a standard for loyalty program members- now it's time to take the next step and offer them secure Wi-Fi," concludes Greg Falco, PhD.

InvinciBull's mission to protect devices from malicious content on the internet is aligned with Finjan Holding over 20-year history as a cybersecurity innovator. The company believes that individuals deserve access to innovative tools and technology that protect their online activity and secure their privacy.

The InvinciBull App is available for download on [InvinciBull.io](#) and is available on the iOS and Android platforms in the [iTunes](#) and [Google Play](#) stores. The Basic VPN Plan is free, which allows users to connect to the nearest location and use of up to 1GB of VPN data per month.

About Finjan Holdings, Inc.

Established 20 years ago, Finjan Holdings, Inc. is a globally recognized leader in cybersecurity. Finjan Inc.'s inventions are embedded within a strong portfolio of patents focusing on software and hardware technologies capable of proactively detecting previously unknown and emerging threats on a real-time, behavior-based basis.
