Clean Coal Technologies, Inc. Provides Update on Filings

NEW YORK, NY -- (Marketwired) -- 09/01/15 -- Clean Coal Technologies, Inc. (OTC PINK: CCTC) ("CCTI" or the "Company"), an emerging cleaner-energy company utilizing patented technology to convert raw coal into a cleaner burning and more efficient fuel, today announced that they are working with their auditors to have the company fully current within the next fifteen business days.

Management apologises for the late filings which are not due to any material issues and purely due to a miscalculation of what was needed from the company side in light of the re-valuation of the plant, the buyback of the notes and the move to commercialisation. Management fully appreciates the critical necessity in being current on our filings especially at this watershed and exciting time in our company and has already taken the necessary steps to assure this does not re-occur by hiring external accountants to take over the full responsibilities for all our filings going forward. "The company has prided itself on our excellent record in our filings and assures our investors and shareholders that it will not happen again," said Robin Eves, CEO and President of CCTI.

About Clean Coal Technologies, Inc.

Clean Coal Technologies, Inc., a cleaner-energy technology company with headquarters in New York City, NY, holds patented process technology and other intellectual property that converts raw coal into a cleaner burning fuel. The Company's trademarked end products, "Pristine^(TM)" coals, are significantly more efficient, less polluting, more cost-effective, and provide more heat than untreated coal. The principal elements of the Company's pre-combustion technology are based on well-proven science and tried-and-tested industrial components. The Company's clean coal technology may reduce some 90% of chemical pollutants from coal, including Sulfur and Mercury, thereby resolving emissions issues affecting coal-fired power plants.
