# CCTI Granted Full US Patent for its Ground Breaking Pristine M Technology

**NEW YORK, NY / ACCESSWIRE / April 19, 2017** Clean Coal Technologies, Inc. (OTC PINK: CCTC) ("CCTI" or the "Company"), an emerging cleaner-energy company utilizing patented and proven technology to convert untreated coal into a cleaner burning and more efficient fuel, today announced that the company has been granted a full US patent for its Pristine M technology.

"We are very pleased to announce that we have received notice from the US Patent and Trademark Office that CCTI has been granted a full patent for its Pristine M technology," announced CCTI CEO, Robin Eves. "This is very important as we move forward to commercialization both here in the US and abroad. The timing of the patent office granting CCTI this patent is extremely beneficial as the Department Of Energy, the State of Wyoming and the Powder River Basin in general become more involved with the commercialization of our technology. This adds another important layer of protection from any and all competitors for our ground-breaking technology at a very crucial and meaningful time."

CCTI's suite of patents continue to be successfully executed by Nixon & Vanderhye, one of the preeminent patent law firms in the US.

## **About Clean Coal Technologies, Inc.**

Clean Coal Technologies, Inc., a cleaner-energy technology company with headquarters in New York City, NY, holds patented process technology and other intellectual property that converts raw coal into a cleaner burning fuel. The Company's trademarked end products, "Pristine<sup>TM</sup>" coals, are significantly more efficient, less polluting, more cost-effective, and provide more heat than untreated coal. The principal elements of the Company's pre-combustion technology are based on well-proven science and tried-and-tested industrial components. The Company's clean coal technology may reduce some 90% of chemical pollutants from coal, including Sulfur and Mercury, thereby resolving emissions issues affecting coal-fired power plants. ## **Forward Looking Statements**

This release may include forward-looking statements related to CCTI's plans, beliefs and goals, which involve certain risks and uncertainties that could cause actual results to differ materially from those in the forward-looking statements. Such statements include, but are not limited to, statements about CCTI's plans, objectives, expectations and intentions with respect to future operations, its products, its ability to secure financing for its operations, the impact on the industry and other statements identified by words such as "will," "potential,"

"could," "can," "believe," "intends," "continue," "plans," "expects," "anticipates," "estimates," "may," and other words of similar meaning or the use of future dates. Additional details about CCTI's business and its operations that could affect CCTI's actual results are described in CCTI's filings with the Securities and Exchange Commission, including the "Risk Factors" that are part of its most recent annual report on Form 10-K for the year ended December 31, 2016 and in each of its subsequently filed periodic reports. All forward-looking statements in this release speak only as of the date of this news release. CCTI undertakes no obligation to update or revise any forward-looking statement, whether as a result of new information, future events or otherwise.
