## Finjan and Juniper Network Heading to Mini-Trial December 10, 2018

*Trial Limited to Four Issues on Juniper's Infringement of Finjan's '494 Patent*

EAST PALO ALTO, Calif., Sept. 13, 2018 (GLOBE NEWSWIRE) -- [Finjan Holdings](#), Inc. (NASDAQ: FNJN), today announced that its subsidiary, Finjan, Inc. ("Finjan"), a pioneer in cybersecurity technologies, will try to a jury one of its claims of infringement against Juniper Network, Inc. ("Juniper"). The matter is before the Honorable William Alsup (Case No. 3:17-cv-05659-WHA) in the Northern District Court of California, San Francisco.

The Court ordered a jury trial limited to four issues raised in Finjan's Motion: (1) whether the Accused Products meet the database limitation of Claim 10; (2) Juniper's Section 101 invalidity defense; (3) Juniper's Section 287 defense on damages; and (4) the extent of Finjan's damages resulting from Juniper's infringement. The jury trial is scheduled for December 10, 2018 (Docket No. 193).

On June 7, 2018, Finjan filed a Motion for Summary Judgment of Infringement of Claim 10 of U.S. Patent No., 8,677,494 (the "'494 Patent") ("Finjan's Motion") by Juniper's SRX Gateway network appliances and Sky ATP cloud-based scanning systems (the "Accused Products"). At issue was whether the Accused Products embodied all the claim limitations of Claim 10 of the '494 Patent, namely, a receiver, a scanner, a list of suspicious computer operations, a database manager, and a database. Juniper opposed Finjan's Motion on three grounds: (1) non-infringement; (2) invalidity based on unpatentable subject matter and indefiniteness; and (3) Finjan's failure to mark (*i.e.*, notice of infringement).

On August 31, 2018, the Court entered its order on Finjan's Motion titled, "Order Granting in Part Early Motion for Summary Judgment on '494 Patent" (Docket No. 189), as follows:

On the issue of infringement, the Court found that there was no dispute of material facts that the Accused Products met the list of suspicious computer operations, scanner, and database manager limitations. The Court, however, determined that factual disputes exist on whether the Accused Products comprised a database. The parties did not dispute the existence of a receiver. On the issue of invalidity, the Court rejected Juniper's "indefiniteness" contention, and reserved for trial on whether Claim 10 of the '494 Patent comprises patent eligible subject matter. Lastly, on the issue of notice and damages under Section 287 (Marking) requirements, the Court deferred the issue for a jury to decide.

Finjan also has pending infringement lawsuits against Palo Alto Networks, ESET and its affiliates, Cisco Systems, Inc., Sonicwall, Inc., Bitdefender and its affiliates, Zscaler, Inc. and Checkpoint and its affiliates, relating to, collectively, more than 20 patents in the Finjan portfolio. The court dockets for the foregoing cases are publicly available on the Public Access to Court Electronic Records (PACER) website, [www.pacer.gov](http://www.pacer.gov), which is operated by

the Administrative Office of the U.S. Courts.

## **ABOUT FINJAN**

Established more than 20 years ago, Finjan is a globally recognized pioneer in cybersecurity. Finjan's inventions are embedded within a strong portfolio of patents focusing on software and hardware technologies capable of proactively detecting previously unknown and emerging threats on a real-time, behavior-based basis. Finjan continues to grow through investments in innovation, strategic acquisitions, and partnerships promoting economic advancement and job creation.
