Resonant Inc. To Present November 19 at the Southwest IDEAS Investor Conference

Presentation and Webcast at 2:30 p.m. CT

SANTA BARBARA, Calif.-- Resonant Inc. (NASDAQ: RESN), a late-stage development company creating innovative filter designs for radio frequency, or RF, front-ends for the mobile device industry, today announced that Mr. Terry Lingren, Chairman and CEO and John Philpott, CFO, will present at the Southwest IDEAS Conference on Wednesday, November 19, 2014. The conference is being held at the Marriott – Quorum Hotel in Addison, Texas.

The Company's presentation is scheduled to begin at 2:30 p.m. CT. A live and archived webcast of the presentation can be accessed at <http://www.wsw.com/webcast/threepa15/resn> or at the Company's website: <http://resonant.com>.

About IDEAS Investor Conferences

The mission of the IDEAS Conferences is to provide independent regional venues for quality companies to present their investment merits to an influential audience of investment professionals. IDEAS Investor Conferences are "**Sponsored BY the Buyside FOR the Buyside**" and benefit the regional investment communities. Conference sponsors collectively have more than \$200 Billion in assets under management. The IDEAS Investor Conferences are held annually in Boston, Chicago and Dallas and are produced by Three Part Advisors, LLC. Additional information about the events can be located at www.IDEASconferences.com.

About Resonant Inc.

Resonant is creating innovative filter designs for radio frequency, or RF, front-ends for the mobile device industry. The RF front-end is the circuitry in a mobile device responsible for analog signal processing and is located between the device's antenna and its digital baseband. The Company uses a fundamentally new technology called Infinite Synthesized Networks®, or ISN®, to configure and connect resonators, the building blocks of RF filters. Filters are a critical component of the RF front-end used to select desired radio frequency signals and reject unwanted signals. Resonant plans to use ISN to develop new classes of filter designs. For information, please visit www.resonant.com.

Safe Harbor for Forward-Looking Statements

This presentation may contain forward-looking statements. Forward-looking statements include the following subjects, among others: the status of filter designs under development, the prospects for licensing filter designs upon completion of development, plans for other

filter designs not currently in development, potential customers for our designs, the timing and amount of future royalty streams, the expected duration of our capital resources, our hiring plans, our cash flow forecast, the impact of our designs on the mobile device market, and our business strategy. Forward-looking statements are inherently subject to risks and uncertainties which could cause actual results to differ materially from those in the forward-looking statements, including, without limitation, the following: our limited operating history (particularly as a new public company); management of R&D efforts; the acceptance of our filter designs by potential customers; the ability of our customers (or their manufacturers) to fabricate our designs in commercial quantities; the risk that the intense competition and rapid technological change in our industry renders our designs less useful or obsolete; our ability to find, recruit and retain the highly skilled personnel required for our design process in sufficient numbers to support our growth; our ability to manage growth; and general market, economic and business conditions. Additional factors that could cause actual results to differ materially from those anticipated by our forward-looking statements are under the captions “Risk Factors” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in our most recent Quarterly Report (Form 10-Q), filed with the Securities and Exchange Commission. Forward-looking statements are made as of the date of this release, and we expressly disclaim any obligation or undertaking to update forward-looking statements.
