# **Clean Coal Technologies Hosts Investor Conference Call on Wednesday, March 27, 2013**

## **Investor Call to Provide Shareholders with Updates on Recent Developments and Information on the Company's Strategic Initiatives**

NEW YORK-- Clean Coal Technologies, Inc. (the "Company") (OTCQB: CCTC), an emerging cleaner-energy company utilizing patented technology to convert raw coal into a cleaner burning and more efficient fuel, today announced it will be hosting an investor conference call on Wednesday, March 27, 2013 at 11:00am Eastern.

"Clean Coal is pleased to be hosting our latest conference call," stated Robin Eves, Director, President and CEO of Clean Coal Technologies. "Since our last update with shareholders, Ventrillion's \$15 million investment has allowed us to move past our Good Coal joint venture and sign a new EPC agreement directly with SAIC. During the call, we look forward to providing investors with the latest status updates on the development of our 2-ton per hour pilot plant, in addition to various other strategic initiatives in 2013."

The teleconference can be accessed by dialing 877-407-8033 when calling within the United States or 201-689-8033 when calling internationally. Please dial in 10 minutes prior to the beginning of the call. There will be a playback available until April 10, 2013. To listen to the playback dial 877-660-6853 when calling within the United States or 201-612-7415 when calling internationally and use replay ID number: 410217.

The conference call will be simultaneously webcast and available at:

<http://www.investorcalendar.com/IC/CEPage.asp?ID=170642>

Investors may submit questions in advance of the conference call by sending emails to: [cleancoal@trilogy-capital.com](mailto:cleancoal@trilogy-capital.com) with the subject "Clean Coal Conference Call."

## **About Clean Coal Technologies, Inc.**

Clean Coal Technologies, Inc., a cleaner-energy technology company with headquarters in New York City, NY, holds patented process technology and other intellectual property that converts raw coal into a cleaner burning fuel. The Company's trademarked end products, "Pristine™" coals, are significantly more efficient, less polluting, more cost-effective, and provide more heat than untreated coal. The principal elements of the Company's pre combustion technology are based on well-proven science and tried-and-tested industrial components. The Company's clean coal technology may reduce some 90% of chemical pollutants from coal, including Sulfur and Mercury, thereby resolving emissions issues affecting coal-fired power plants.
