

Clean Coal Technologies (CCTC) Announced Today the Receipt of Strategic Patents and Upcoming Annual Shareholder Meeting

NEW YORK, NY / ACCESSWIRE / April 26, 2019 /Clean Coal Technologies, Inc., (OTCQB: CCTC) ("CCTI" or the "Company"), the leading clean-energy company utilizing patented and proven technology to convert run of mine coal into a cleaner burning and more efficient stabilized fuel, today announced the granting of several key patents for their Pristine™ technology.

"We are very pleased to announce that Japan, South Korea, Mexico and Australia have granted us full patents on our Pristine™ technology" said Sean Mahoney, CCTI Press Officer. "These patents are vital in protecting our technology in these coal countries and we are now in a position to further advance the partnerships we have with confidence of intellectual property protection"

"We have several partnerships with government institutions and commercial entities in these countries and we are now in a position to advance these relationships with full patent protection. These patents take up to 7 years from initial application to be granted and are valid for up to 20 years," concluded Mahoney.

The Annual shareholder Meeting for Clean Coal Technologies, Inc will take place on April 30, 2019 at the Marriott Hotel, Stamford CT 06901 at 10:00am.

About Clean Coal Technologies, Inc.

Clean Coal Technologies, Inc., a cleaner-energy technology company with headquarters in New York City, NY, holds patented process technology and other intellectual property that converts raw coal into a cleaner burning fuel. The Company's trademarked end products, "Pristine" coals, are significantly more efficient, less polluting, more cost-effective, and provide more heat than untreated coal. The principal elements of the Company's precombustion technology are based on well-proven science and tried-and-tested industrial components. The Company's clean coal technology may reduce some 90% of chemical pollutants from coal, including Sulfur and Mercury, thereby resolving emissions issues affecting coal-fired power plants.
