Initial gross profit margins increased 1.2% during the third quarter 2018 to 52.1% from 50.9% in the same quarter last year. The margin improvement was driven from a higher penetration of full price business. Gross profit declined approximately \$900 thousand as a result of overall sales volume declines.

Selling, general and administrative expenses for the third quarter 2018 increased \$138 thousand to \$15.5 million compared to the same quarter of the prior year after excluding acquisition related expenses incurred in the third quarter of 2018 of \$9.6 million. Excluding acquisition related expenses, selling, general and administrative expense rates increased to 38.8% from 36.2% in the third quarter 2017. Operating expense increases, excluding acquisition related costs, primarily relate to higher direct store labor expenses this year versus the prior year period.

Adjusted EBITDA for the third quarter of 2018 was \$2.3 million as compared to \$3.2 million for the same quarter last year.

For the third quarter of 2018 and 2017, net loss and loss per share were \$10.6 million and \$0.89 per share compared to \$0.2 million and \$0.12 per share, respectively.

Management uses Adjusted EBITDA as a measure of operating performance to assist in comparing performance from period to period on a consistent basis and to identify business trends relating to the Company's financial condition and results of operations. The Company believes Adjusted EBITDA provides additional information for determining its ability to meet future debt service requirements and capital expenditures.

Non-GAAP Financial Measures

This press release contains non-GAAP financial measures. Generally, a non-GAAP financial measure is a numerical measure of a company's historical or future financial performance, financial position, or cash flows that either excludes or includes amounts which are not normally excluded or included in the most directly comparable measure calculated and presented in accordance with generally accepted accounting principles generally accepted in the United States (GAAP). Management uses these non-GAAP financial measures to evaluate the performance of the business over time on a consistent basis, identify business trends relating to the financial condition and results of operations and make business decisions. The Company believes that providing non-GAAP measures is useful to provide a consistent basis for investors to understand the Company's financial performance in comparison to historical periods and to allow investors to evaluate the performance using the same methodology and information as that used by management. However, investors need to be aware that non-GAAP measures are subject to inherent limitations because they do not include all of the expenses included under GAAP and they involve the exercise of judgment of which charges are excluded from the non-GAAP financial measure. Investors should consider these non-GAAP financial measures in addition to, and not as substitutes for or superior to, the Company's other measures of the Company's financial performance that the Company prepares in accordance with GAAP. Further, non-GAAP information may be different from the non-GAAP information provided by other companies.
