Clean Coal Technologies Inc. (CCTC) Announces The Acceptance Of Its Russian Patent

NEW YORK, NY / ACCESSWIRE / September 21, 2018 /Clean Coal Technologies, Inc., (OTCQB: CCTC) ("CCTI" or the "Company"), the leading clean-energy company utilizing patented and proven technology to convert run of mine coal into a cleaner burning and more efficient fuel, today announced that a Russian patent for its first of a kind coal enhancement technology has been accepted.

"The protection of our IP is core to our success as we commence commercialization and global roll out," said Mr. Robin Eves, CEO. The timing of the patent in Russia which was applied for in 2013 is very fortuitous as we advance negotiations with one of the largest coal producers in Russia. India continues to source imported coal and have focused on a number of target countries including Russia to provide them with higher quality and affordable coal. We believe our unique technology can play a crucial role in this market and we can now move forward knowing that we are adequately protected."

About Clean Coal Technologies, Inc.

Clean Coal Technologies, Inc., a cleaner-energy technology company with headquarters in New York City, NY, holds patented process technology and other intellectual property that converts raw coal into a cleaner burning fuel. The Company's trademarked end products, "Pristine(tm)" coals, are significantly more efficient, less polluting, more cost-effective, and provide more heat than untreated coal. The principal elements of the Company's pre-combustion technology are based on well-proven science and tried-and-tested industrial components. The Company's clean coal technology may reduce some 90% of chemical pollutants from coal, including Sulfur and Mercury, thereby resolving emissions issues affecting coal-fired power plants.
