CES Synergies, Inc. Receives Subcontract and Begins Work on Historic Bridge Remediation

CRYSTAL SPRINGS, Fla., Sept. 20, 2016 (GLOBE NEWSWIRE) -- **CES Synergies, Inc.** (OTCQB:CESX) is pleased to announce that its subsidiary, Cross Environmental Services, Inc. (CES), has received a subcontract and has begun remediation services for a project to rehabilitate a historic railroad bridge. The subcontract is based on time and materials and estimated at just over \$500,000.00.

CES' scope of work will consist of the restoration of the historic landmark bridge for its relocation to a public park where it will be accessible to the public. The work consists of two phases—phase one will be the spot removal of the asbestos and lead coatings at the disassembly points on the bridge and the wrapping of the bridge sections for transport to the staging area by the contractor. During phase two, CES will completely remove the remaining asbestos and lead coatings and then apply a stabilizing primer to prevent corrosion.

“CES' past remediation work on bridges has given us the experience to complete this unorthodox renovation project,” stated Mr. John Tostanoski, CEO of CESX. “Our work is being completed in double shifts by crews working up to seven days a week in order to meet our customer's goals.”

About CES:

CES Synergies, Inc., through its subsidiary, Cross Environmental Services, Inc., is a specialty environmental services company providing quality environmental contracting solutions, demolition and remediation services to commercial and industrial customers, as well as federal, state and municipal entities.
