# Global Blockchain to Spearhead Development of Digital Wallet for Playboy Enterprises

VANCOUVER, British Columbia, May 30, 2018 (GLOBE NEWSWIRE) -- **GLOBAL BLOCKCHAIN TECHNOLOGIES CORP.** (CSE: BLOC, BLOC.CN, BLOC.CNX) (FSE:BWSP) (OTC:BLKCF) ("**BLOC**" or the "**Company**") is pleased to announce that it will work with Playboy Enterprises Inc. ("Playboy") to develop a digital wallet that will enable the integration of [Vice Industry Token](#) ("VIT") into the Playboy.tv web media portal. The combination of Playboy.tv's content with VIT's engagement-monetization technology will allow users to get paid just for watching video content; the Company and Playboy will usher in a new era of media consumption that will enrich viewer engagement, and shift the imbalanced online media power dynamic to benefit the audience. The two companies are also exploring potential additional uses for cryptocurrency-powered businesses in the future.

"We see tremendous value in the VIT, because it embraces the way in which the media world has changed," says Reena Patel, the Chief Operations, Licensing and Media Officer for Playboy. "It went from pay-to-view before the internet, to free-to-view with the internet. Free content was wildly popular at first – but as the internet became saturated with it, it revealed what the true hot commodity was... human attention. VIT recognizes this by paying its users just to watch videos, such as those on Playboy.tv. With BLOC helping to drive this integration, Playboy.tv will be one of the first to ride this wave in an era where human attention is more valuable than ever."

The blockchain on which VIT is built, is designed to allocate a certain percentage of new tokens to be paid to users in exchange for their actions. These actions include watching videos, making comments, and placing votes, such as "likes" and "dislikes". Users of VIT on Playboy.tv will be able to earn VIT tokens for these actions – and they can spend them on the Playboy.tv platform for premium content and subscriptions. Additional uses are being arranged for as well, meaning that the current state of VIT as it relates to Playboy is just the beginning.

Steven Nerayoff, BLOC's Chairman said, "As one of the earliest adopters of blockchain technology, this is a thrilling project to be part of. Most cryptocurrencies fail because they are unable to match up with a real-world use, which resigns them to a fate of being nothing more than an experiment of speculation and baseless hype. In this situation, Playboy specifically benefits from having a cryptocurrency like VIT on its side. This is where investors should be paying attention, because the coins and tokens that go nowhere all have one thing in common – no real-world use. For VIT, being part of Playboy is a huge step in real-world cryptocurrency use that will translate to success."

The Company is currently building a cryptocurrency wallet for Playboy that can hold VIT, making storage and use of the token easy for the user, in a way that integrates with Playboy.tv using an Application Programming Interface (“API”). Users can add VIT tokens to their wallet by earning them on Playboy.tv or they can buy them from an exchange. To spend the tokens on Playboy.tv, there will be native API-based payment processing functionality on the Playboy.tv website, making it even easier to use than a credit card.

“Human attention is a seriously valuable commodity, and media companies these days are too focused on selling ads to realize that,” says Shidan Gouran, the President and CEO of BLOC. “Between Facebook, Instagram, Twitter, YouTube, and every other media platform out there, they are all desperate for the limited resource that is human attention. Since Playboy.tv will be able to pay people with VIT just for watching videos, that will pull the platform way ahead of the pack, attracting significantly heightened viewership of Playboy.tv, and the use of VIT.”

Playboy announced its integration of VIT in a press release issued earlier this year. The Company is playing a strategic role in planning and executing the integration, leveraging its management’s experience with cryptocurrencies and the world of internet entertainment to maximize the output of this relationship. The integration of VIT into Playboy.tv and the wallet is set to be launched before the end of 2018.

### **Cautionary Note Regarding Forward-Looking Information**

This news release contains "forward-looking information" within the meaning of applicable securities laws. Generally, any statements that are not historical facts may contain forward-looking information, and forward-looking information can be identified by the use of forward-looking terminology such as "plans", "expects" or "does not expect", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates" or "does not anticipate", or "believes", or variations of such words and phrases or indicates that certain actions, events or results "may", "could", "would", "might" or "will be" taken, "occur" or "be achieved". Forward-looking information includes, but is not limited to the Company's goal of streamlining the current arduous, lengthy and complicated process that interested investors need to undergo in order to gain exposure to the cryptocurrency space with a view to becoming the first vertically integrated originator and manager of top-tier blockchains and digital currencies. The Company has no assets and its business plan is purely conceptual in nature and there is no assurance that it will be implemented as set out herein, or at all. Forward-looking information is based on certain factors and assumptions the Company believes to be reasonable at the time such statements are made, including but not limited to: statements and expectations regarding the ability of the Company to (i) successfully engage senior management with appropriate industry experience and expertise, (ii) gain access to and acquire a basket of cryptocurrency assets and pre-ICO and ICO financings on favourable terms or at all, (iii) successfully create its own tokens and ICO's, and (iv) execute on future M&A opportunities in the cryptocurrency space; receipt of required regulatory approvals; the availability of necessary financing; permitting and such other assumptions and factors as set out herein. Forward-looking information is subject to known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements of the Company to be materially different from those expressed or implied by such forward-looking information, including but not limited to: risks related to changes in cryptocurrency prices; the estimation of personnel and operating costs; general global markets and economic conditions; risks associated with uninsurable risks; risks associated with currency fluctuations; competition faced in securing experienced personnel with appropriate industry experience and expertise; risks associated with changes in the financial auditing and corporate governance standards applicable to cryptocurrencies and ICO's; risks related to potential conflicts of interest; the reliance on key personnel; financing, capitalization and liquidity risks including the risk that the financing necessary to fund continued development of the Company's business plan may not be available on satisfactory terms, or at all; the risk of potential dilution through the issuance of additional common shares of the Company; the risk of litigation. Although the Company has attempted to identify important factors that could cause actual results to differ materially from the forward-looking information set out in this presentation, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such forward-looking information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such information.

Accordingly, readers should not place undue reliance on forward-looking information. Forward-looking statements are made based on management's beliefs, estimates and opinions on the date that statements are made and the Company undertakes no obligation to update forward-looking statements if these beliefs, estimates and opinions or other circumstances should change, except as required by laws. Investors are cautioned against attributing undue certainty to forward-looking statements.

Neither the CSE nor its Regulation Services Provider (as that term is defined in the policies of the CSE) accepts responsibility for the adequacy or accuracy of this release.
