## **Intellipharmaceutics Announces First Quarter 2010 Results**

TORONTO, April 13, 2010 (GLOBE NEWSWIRE) -- Intellipharmaceutics International Inc. (Nasdaq:IPCI) (TSX:I), a pharmaceutical company specializing in the research, development and manufacture of controlled and targeted novel oral solid drugs, today reported the results of operations for the three month period ended February 28, 2010. All comparative information is that of the predecessor company Intellipharmaceutics Ltd. ("IPC Ltd"). All dollar amounts referenced herein are in United States dollars unless otherwise noted.

The loss for the three month period ended February 28, 2010 was \$1.4 million, or \$0.13 per common share, compared with a loss of \$0.6 million, or \$0.06 per common share for the three month period ended March 31, 2009. The increased period-over-period loss is mainly due to increases in both research and development expenses and increases in selling, general and administrative expenses.

The Company increased research and development expenditures as a result of a stronger financial position during the three month period ended February 28, 2010 in comparison to the three month period ended March 31, 2009. This stronger financial position is allowing Intellipharmaceutics to pursue its strategy of advancing its products from the formulation stage through product development, regulatory approval and manufacturing before out-licensing marketing and sales rights to established organizations.

The increase in selling, general and administrative expenses is due to an increase in expenses related to legal fees, wages, and marketing cost and due to certain expenditures which were not incurred in the comparable period as Intellipharmaceutics was not a publicly traded company during that time.

At February 28, 2010, Intellipharmaceutics' cash totaled \$5.0 million, compared with \$8.0 million at November 30, 2009. The decrease is a result of cash used in operating activities, the payment of C\$0.7 million in costs associated with the October 22, 2009 Plan of Arrangement and Merger Transaction and the repayment of C\$0.8 million, representing a partial amount due to Dr. Isa Odidi and Dr. Amina Odidi, principal stockholders, directors and executive officers, for cash advances made by them to the Company as a shareholder loan. Interest payable on this loan that had been accrued in the amount of C\$0.1 million was also paid during the first quarter. Subsequent to quarter end, the Company received C\$0.9 million in research & development tax credits. The Company expects to receive an additional C\$1.1 million during the second half of fiscal 2010 comprised of other research & development tax credits.

Intellipharmaceutics anticipates its base cash operating burn, excluding any potential proceeds from partnering initiatives, will be approximately C\$5.1 million during the remainder of fiscal 2010. Depending on the progress of these partnering initiatives, the Company may elect to increase or reduce expenses associated with its current development plan.

In addition, the Company expects to make payments in relation to C\$0.1 million for costs associated with the October 22, 2009 Plan of Arrangement and Merger Transaction and may make payments on related party payables during the second half of 2010 up to the amount of \$0.5 million. As at February 28, 2010, the Company had an outstanding promissory note payable to Dr. Isa Odidi and Dr. Amina Odidi in the amount of \$1.5 million. Repayments of the related party loan are restricted under the terms of the loan such that repayment can only be made from revenues received, proceeds from the issuance of securities, or scientific tax credits received in cash.

## Corporate Update

- The appointment of Graham Neil, CA, as Chief Financial Officer and Vice-President, Finance was announced on February 12, 2010. Mr. Neil is a Chartered Accountant with over 10 years of public company and healthcare industry experience. Most recently Mr. Neil served as CFO for a NASDAQ- and TSX-listed development-stage company. Prior to his public company experience, Mr. Neil served with KPMG.
- On March 11, 2010 Intellipharma announced that Novartis Pharmaceuticals Corporation and Celgene Corporation have settled their patent suit in the U.S. District Court for the District of New Jersey, and Elan Pharma International Ltd. has settled its patent suit in the U.S. District Court for the District of Delaware, with Intellipharma Corp., a wholly-owned subsidiary of Intellipharma International Inc., and its licensee Par Pharmaceutical, Inc. over a generic version of the Attention Deficit Hyperactivity Disorder drug Focalin XR(R) (dexamethylphenidate hydrochloride). The terms of the settlements are confidential and remain subject to regulatory and court approval.

## About Intellipharma

Intellipharma International Inc. is a pharmaceutical company specializing in the research, development and manufacture of controlled and targeted novel oral solid drugs. The Company's patented Hypermatrix(TM) technology is a unique and validated multidimensional controlled-release drug delivery platform that can be applied to the efficient development of a wide range of existing and new pharmaceuticals. Based on this technology, Intellipharma has a pipeline of products in various stages of development in therapeutic areas that include neurology, cardiovascular, GIT, pain and infection. Several of these products are partnered.

Intellipharma's lead generic product under development is Dexamethylphenidate XR (dexamethylphenidate hydrochloride), a generic version of Focalin XR(R), which is an extended-release capsule for the treatment of Attention Deficit Hyperactivity Disorder. In 2008, Focalin(R), including Focalin XR(R), had U.S. sales of approximately U.S. \$350 million.

Intellipharma's lead non-generic product under development is Rexista(TM), an abuse- and alcohol-resistant controlled-release oral oxycodone formulation for the relief of pain. Rexista(TM) is a unique dosage form designed to be resistant to the well-documented abuses associated with currently marketed oxycodone products such as abuse of these drugs by nasal inhalation when crushed or powdered and by injection when combined with solvents. Rexista(TM) is also designed to resist release of the entire dose when consumed

with alcohol, a significant problem with some opioid drugs. In 2008, oxycodone had U.S. sales of approximately U.S. \$2 billion.
